# Rainbow Text Masking

Visit this tutorial in:

[German](#)

- [DOWNLOAD THE .FLA](#)
- **SKILL LEVEL: EASY**
- Know how to Create symbols (Graphics)
- Move objects around the stage
- Add Motion tweening
- Masking layers

## TUTORIAL

Screenshot of the Frames you will create in this tutorial:

This is really easy to do

1. Start by making 2 layers  
Label the top layer Text  
Label the bottom layer Box
2. In the top layer - write out the word or sentence you wish to mask. Convert it to a symbol.  
Place it on the edge of the stage - - we will come back to this layer later
3. On the bottom layer draw a box with a color fill and no border lines

4. Next to the first box draw another box - same size - but use a different color

5. Repeat for the 3rd box.  
You may need to move each box closer together - just be sure not to overlap them.  
The boxes should be in the center of the stage

6. **Back to layer 1**

Now you have to make the text scroll across the color boxes.

- In keyframe 1 move the text to the left so it is not over any of the boxes.
- Insert a keyframe at 20.
- At keyframe 20 move the text to the right so it is not over any of the boxes.
- Add a motion tween from 1 to 20.
- Last but not least - add a mask to layer 1
