Acetone Peroxide Explosive

MATERIALS:

Name	Source
Hydrogen Peroxide	Hair Bleach, Drug Stores and Hair supply Stores
Acetone	Hardware Stores and Drug Stores
Sulfuric Acid	Clear battery acid boiled until white fumes appear.

Eye Dropper or Syringe w/ glass tube
Graduated Cylinder (cc or ml)
Thermometer (0 to 100 degrees C)
Glass Containers
Large Pan
Ice and Salt
Water
Paper Towels

PROCEDURE:

- 1) Mix 30 ml of Acetone and 50ml of Hydrogen Peroxide into a glass container and mix thoroughly.
- 2) Cool it by placing it in a larger container containing ice, salt, and water. Now cool it to 5 degrees Celsius.
- 3) Add 2.5 ml of concentrated sulfuric acid to the mixture slowly (drop by drop w/ the eye dropper). Stir the mixture w/the thermometer keeping the temperature between 5-10 degrees Celsius. If the Temperature rises stop adding the sulfuric acid until it cools down then start adding it again.
- 4) Now that you got all the acid into the mixture continue stirring for another 5 minutes.
- 5) Now let the mixture stand for 12 to 24 hours in the ice/salt bath.
- 6) After 12 hours the crystals of acetone peroxide will precipitate out of the once clear solution. Precipitation should be done after 24 hours.

(continued on next page)

- 7) Now filter out the crystals through a paper towel attached to a jar with a rubber band. Then after that wash the crystals by pouring ice cold water over them, letting the water rinse the crystals and filter down through the paper towel into the jar.
- 8) Select a container and allow them to dry.

USES:

Now this can be used as an explosive however it is the simplest detonator ever made. It works best in 2.5 inch lengths of brass tubing with one end sealed. The only drawback is that it must be used quickly as Acetone Peroxide deteriorates quickly. I have found that keeping it refrigerated seems to make it last longer however for optimum effects it should be used 7 days after manufacture at the latest. It also can be used to detonate almost every Ammonium Nitrate compound, and Ammonium Nitrate itself for that matter.
