HOW TO USE THE DVD

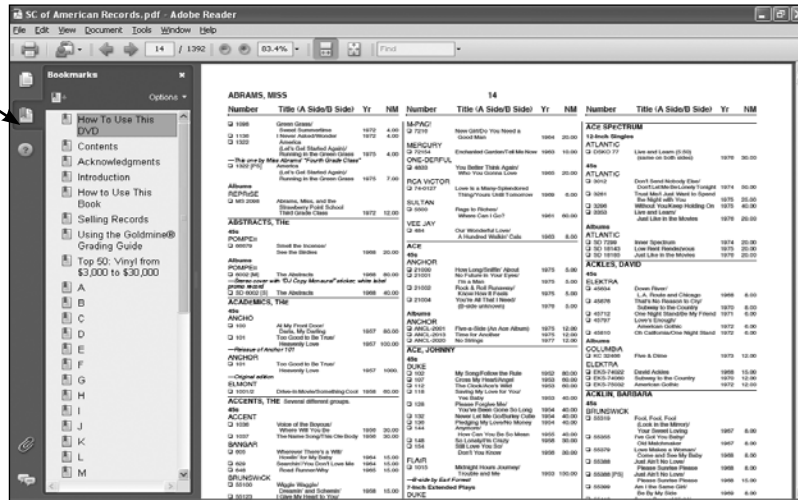

This DVD is PC and Macintosh® compatible when used with Adobe Acrobat Reader® version 6.0 or later. A step-by-step free download of Adobe Acrobat Reader® 8 is available at www.adobe.com. Adobe Reader® 8 was used in creating the instructions that follow.

To help you successfully navigate through the PDF document, several types of searches are available.

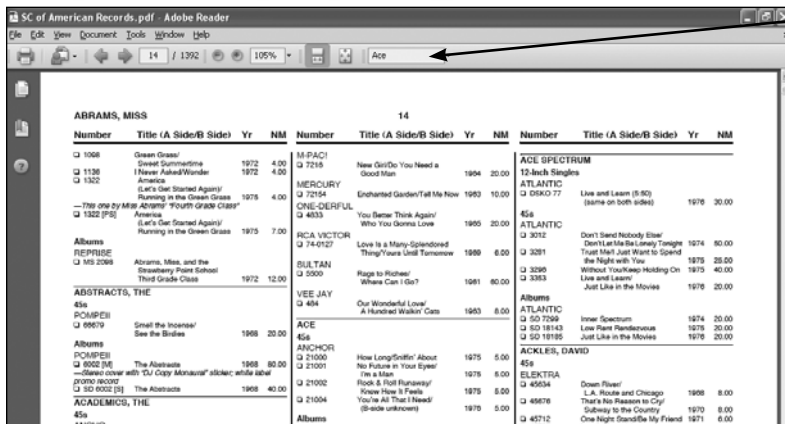

USING BOOKMARKS

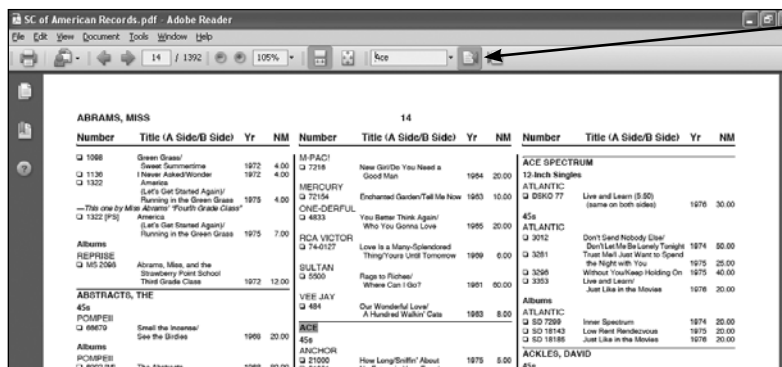

Click on the Bookmarks icon to open the Bookmarks window. Use these links to go to specific points of interest. To scroll through pages in each section, use the arrows at the top of the screen (see next page for instructions to find page navigators).

USING THE FIND BOX

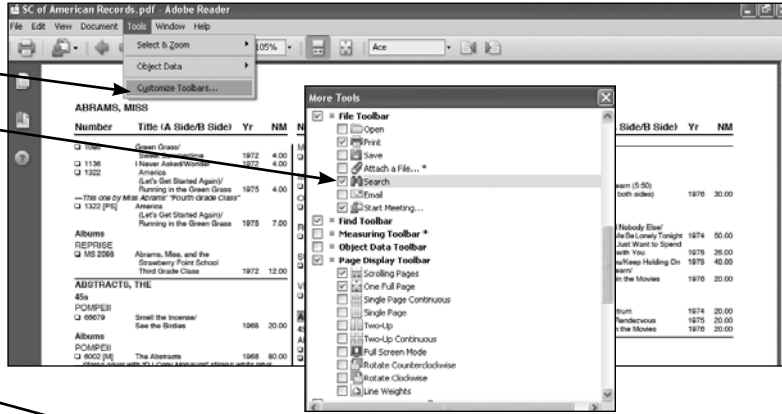

Locate the find box in the tool bar and enter the word(s) you are searching for.

To navigate through the results of your search, use the Find Next icon.

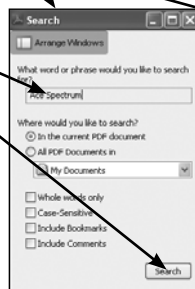

USING THE SEARCH OPTION

Locate the Search button by choosing Customize Toolbars in the Tools pull-down menu. Check Search (binocular icon) to have the Search option available in the toolbar.

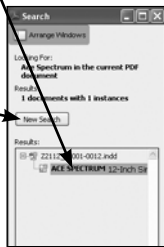

Click on the Search icon to open the Search dialog box.

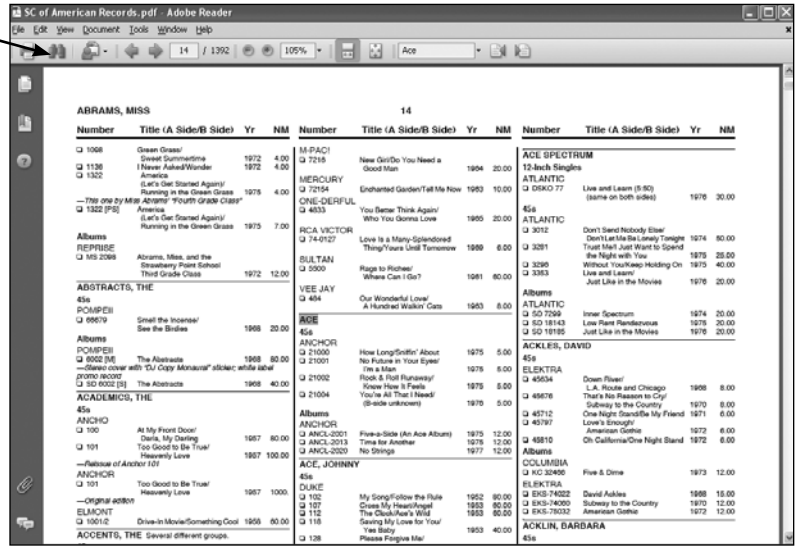

In the Search dialog box, enter the word(s) you are searching for and click on the Search button.

The list of results will appear in the dialog box. Click on the listings to view each page that contains your searched word(s).

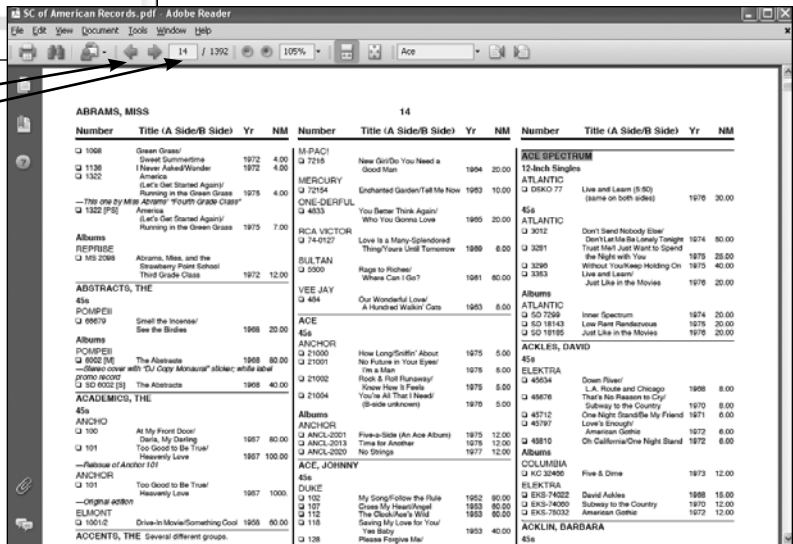

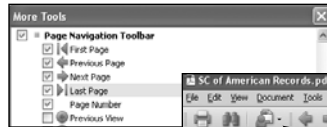

To begin a new word search, click on the New Search button.

USING PAGE NAVIGATORS

Activate the Page Navigator Toolbar by choosing Customize Toolbars in the Tools pull-down menu. Check each tool as shown at right. You are now able to page through the PDF document by using the arrows at the top of the screen or by entering a page number you wish to view.

Acknowledgments

Each new edition of the *Standard Catalog of American Records 1950-1975* is more complete and more accurate than the one before it, in part because of the many people who contribute to its success.

Since the last edition was released, I've received hundreds of letters and e-mails from people who found something to love, to add or to correct, or all of the above, about the information it contained.

Here are only a few of the many people whose e-mails and letters contributed to this book—with apologies to all I missed:

Tormod Aas	Jason McIntosh
Gary Baird	Bob Morris
Gregg Bennett	Norman W. Nonnweiler
Gale Britton	Troy Patterson
Burr Brockway	Steve Pimper
David Bush	Dick Rosemont
Dan Campbell	Steve Schroeder
Tim Cronin	Tim Scott
Dennis Favreau	Bob Self
Rob Friedman	Tim Sewell
Joe Hill	Jeff Smith
James Howe	Bill Trent
Herb Jensen	Randy Watts
Greg Loescher	Ed Worcester
Ernie Mabrey	Rob Ziella
Kent McCombs	

Special thanks to John Tefeller, who gave his time for the interview contained in this introduction. He's knowledgeable and a lot of fun to talk with. Also, special thanks to Bruce Spizer, who has supported the *Goldmine*® price guides for many years with information and photographs. Many of the Beatles photos in the color section are from his collection. For information on his numerous books on the Beatles' American records, see his Web site at www.beatle.net.

Also, thanks to all the people at Krause Publications who helped make this book happen: Dan Brownell, my editor, who is good at spotting inconsistencies and getting me to correct them, among many other things; Joe Kertzman and Paul Kennedy in acquisitions; Stacy Bloch in design; Bob Best and Kris Kandler in the photography studio; the staff of *Goldmine*®, past and present; and everyone else at KP and F+W Publications who remain supportive of the *Standard Catalog*.

I also want to thank you, the reader, for buying and appreciating the *Standard Catalog* over the years.

Introduction

Welcome to the sixth edition of the *Goldmine*® *Standard Catalog of American Records 1950-1975*. We continue to be amazed and humbled by your reactions to what we've done.

Some years ago, Krause Publications believed that a comprehensive price guide that actually listed the records, and didn't simply group them by record label, was needed. And the results are in: Three of the first five editions completely sold out, and the other two came close. For this, we thank you.

Record collecting continues to grow as a new generation of buyers discovers vinyl. The mainstream media continues to note that, as the sales of compact discs continue to decline, the same is not true of vinyl records, both used and new. So if this is the first time you've picked up this book, welcome and dig in!

The first edition, which came out in 1998, was three years in the making. Since then, we've received thousands of letters, e-mails and phone calls with praise and critiques, most of which also offer suggestions for additions and corrections. Many of these we've used as the basis for adding more information on performers whose first record came out in 1975 or earlier. Thousands of records are listed in the 1,400 pages of this guide that are not listed anywhere else.

For regular readers, you'll see more listings than in any prior edition of the *Standard Catalog*, and more photos, too, including an expanded color section.

What's new in this edition?

Most of the changes in the 6th Edition are tweaks rather than overhauls. The format remains the same as it was in the 5th Edition: We are running three

columns of listings per page instead of two, and for the vast majority of items, the only price we now list is the Near Mint price. This was done mostly to save space. The number of records we list in each edition increases, but the number of pages does not. And push finally came to shove with the fifth edition.

At the bottom of each page is a gray bar that explains the ratio between the Near Mint value and lesser grades. Unless noted otherwise in the notes to a particular item, a Very Good Plus record is worth about half of the listed price, and a Very Good record is worth about 25 percent of the listed price.

As with prior editions of the *Standard Catalog*, the listings for those artists who are included are more complete than ever. Some areas in which the listings have improved:

- We continue to add to what was already one of the most comprehensive listings of jukebox EPs. Demand for these items continues to increase, and increased knowledge of them will only help their collectibility.
- Fewer of the “contents unknown” listings are unknown than ever before.

The eBay effect

In general, eBay has not been kind to “old-line” record collecting. Some items once believed to be rare have been found to be more common than expected, thus their values have stayed the same or, in some cases, even declined since the first edition of this book in 1998.

At the same time, eBay has had a positive effect on the values in some areas, especially modern jazz and vinyl records of the era when they mostly disappeared from the chain stores. Demand in these areas is much greater than once believed. Not to mention that, when a truly rare item does come up for bid (often inadvertently from a seller who has no idea what he or she has), the sky can be the limit.

You could theoretically use eBay as a sole determinant of market value, but you'd miss all of the market that happens elsewhere. You'd also miss anything that was sold more than 90 days ago, which is approximately how long the general public has access to eBay results on its site. (At least one site that archives eBay auction results exists, but it focuses on big-ticket items and certain genres over others; it won't help at all with more common material.)

We look at as many sources as possible in determining the prices in this book, not just one, thus the *Goldmine*® *Standard Catalog of American Records 1950-1975* remains vital to your enjoyment of collecting vinyl.

How to Use This Book

To quote my late father, who was often asked by his children who found a task difficult, “How do you do this?” He often replied, “Very carefully.”

That is the same advice we give to you.

The prices in this book are taken from many sources, both online and off, and from the advice of many correspondents. *It is only a guide; it is not holy writ*. When using the prices in this book, to use another famous disclaimer, “Your mileage may vary.”

That said, we at least can tell you what is in each listing and what it means. We have decided to emphasize some areas that seem to confuse the most readers, so those who do understand how to use the listings based on a casual glance of the listings, please bear with us.

Records in this book, except for the sections after the letter Z, are listed alphabetically by artist. The artist's name is in **BOLD CAPITAL LETTERS**. They are mostly alphabetized the way our computer did, so blame anything that seems out of order on that.

In some cases, we know that the artist name was used by several different performers. When we don't know for sure which are which, we have left them together. When we do know with some certainty, we have separated them.

In most but not all cases, the most collectible or famous is listed first, usually with the number (1) in parentheses following it. The exceptions are those artists whose fame or number of records overshadows any other performer with the same name, or those who rarely used “The” in front of their name, such as Eagles or Outlaws. The rest of the performers with the same name will be arranged alphabetically by record label and will be followed by the appropriate parenthetical number – (2), (3), (4), and so on. Finally, those for which we don't know where they go are listed with a (U) for Unknown after the name.

Underneath some artists are cross-references or other information we feel is helpful. Cross-references to other artists are in CAPITAL LETTERS.

We then have put the different formats of records in separate lists, in this order:

- 12-Inch Singles
- 45s
- 7-Inch Extended Plays
- Albums

These headings are in **bold** so that they stick out more easily.

Under each type of record, we have grouped the listings by label. Under each record label are the individual listings in numerical, not necessarily chronological, order. The exception is with RCA Victor label 45s (1949-1976). We first list those with a two-digit numerical prefix (such as 47 or 48), then those with a three-digit numerical prefix (such as 447), then those with an APBO prefix (1973-1974), then finally, those with a two-digit letter prefix such as GB or PB.

Each line starts with a check box, which you can use to keep track of what you have. The record number follows. Then comes, in some cases, a couple letters enclosed in [brackets]. These designate something special as follows:

[B]: the album is listed as stereo, but some of the tracks are in mono (the “B” means “both” stereo and mono);

[DJ]: some sort of promotional copy, usually for radio stations, and not meant for public sale;

[EP]: a 12-inch extended play album, usually with only four to six tracks. It is normally no more than half the length of a regular album. Rarely used to describe 12-inch records before the 1980s; before that, it refers to similar 7-inch records;

[M]: mono record (all 12-inch records released in either mono only or in both mono and stereo before 1968; this is also used for certain mono 45s if a stereo counterpart with a similar number exists);

[P]: the album is listed as stereo, but only part of it is “true” two-channel stereo;

[PD]: picture disc (graphics actually appear as part of the record and not merely on the label area; these also are usually identified as such below the listing);

[PS]: picture sleeve, for 45s and 7-inch EPs. **NOTE: This value is for the sleeve BY ITSELF.** To get the value of the record with the picture sleeve, ADD the two values together!

[Q]: quadraphonic record (mostly from the years 1972-1976, these were usually remixed, sometimes radically, to play on systems with four separate speakers);

[R]: the album is listed as stereo, but actually is all, or almost all, rechanneled or “fake” stereo (called “Duophonic” by Capitol or “Enhanced for Stereo” or “Simulated Stereo” by Decca); these almost always are less sought-after than the same material in “true mono”;

[S]: stereo record (again, for those discs pressed in both mono and stereo). If we’re not sure of an album’s “true” stereo content, or if we know an album is all, or almost all, true stereo, we use “S.” This also appears before certain 45s and EPs from the late 1950s and early 1960s, usually when there is also a mono counterpart;

[10]: a 10-inch album, most of which are from the early years of LPs, 1948-1954, and are quite difficult to find in top condition;

[(x)] where x is a number: the number of records in a set.

You’ll next find the title listed as best as we can determine. Sometimes, discerning the actual title of an LP isn’t as straightforward as you might think; titles can be listed differently on the front cover, back cover, label, and spine.

For 45s, you’ll find both sides of each record listed, with a slash or double slash separating the two sides of the disc. We have used chart information or double-sided promo records to try to list the A-side first. **Sometimes, this differs from what the record itself claims is the A-side.**

For extended play singles, the songs on each side are listed in the order they appear on the record, using the record itself and not the listings on the cover, as a guide. A double slash indicates the end of Side 1 and the start of Side 2.

Some contents listings for extended play singles are preceded by an asterisk (*). This indicates that these are indeed the songs on this record, but this may or may not be the correct order as they appear on the disc itself.

Also, for EPs, we have two listings, one for the record and one for the cover. The cover has the actual title of the EP; this title may or may not appear on the record. This is one reason for listing them separately. Another is that, even though 7-inch EPs were sold as if they were miniature albums, buyers often treated them as if they were expanded singles and tossed the covers.

After that information is the year of release of the record, based on record label information or chart data. **Sometimes, this differs from a year listed on a record itself. When in doubt, believe in the years WE list and NOT those on the record, unless you have an additional source OTHER THAN a year on the record label or jacket that proves us incorrect.**

Finally, each line ends with an approximate value in Near Mint condition.

Some records have an additional line of type *underneath the listing, in italics*. That denotes something about the item listed above it, such as who also is on the record, or color of label or color of vinyl.

In the back section, after the letter Z, records are sorted differently.

We have broken these sections into “Original Cast Recordings,” “Soundtracks,” “Television Albums” and “Various Artists Collections.”

Within each of these categories, these are arranged alphabetically by the **title** of the release, ignoring “A,” “An” and “The.” Albums that begin with a number, formerly at the beginning of the listings in each section, are now sorted as if the number were spelled out.

Underneath each title are the applicable releases, arranged alphabetically and numerically by label. (Thus the original version is not necessarily listed first!) Those lines start with a check box, then are followed by the label and number listed together. Any applicable abbreviations – the same as used in the A-Z section – follow; then the year of release; then the pricing information. Finally, some items have more information below the listing in *italics*.

Along the bottom of each page is a banner that tells you how to determine the value of records in lesser condition based upon the Near Mint value.

Most items worth more than \$2,000 in Near Mint, and some that are worth less than that, don’t follow the 1:2:4 ratio, because they are rare in any condition. Those items have the Very Good and Very Good Plus prices in the record’s notes.

Selling Records

By far the most often asked question over the years has been some variation of the following:

How do I sell my records and get the most for them?

First, here’s the Reader’s Digest version of the answer to the question:

1. You will get more for your records if you can sell them directly to someone who wants what you have (a collector), rather than selling to someone who is going to turn around and re-sell them (a dealer).

2. A corollary to the first line of advice above: The prices in this book are **RETAIL** prices—what collectors might pay for these from a seller. They are **NOT** dealer’s buying prices!

3. If you want to sell all your records at once to the same person, whether that person is a dealer or collector, expect to get almost nothing for them, no matter what condition or genre they are.

4. The more time you spend on the project, the more you’ll likely get for each record.

Now, some more details:

First, buy this book and use it. You are better off working from a position of knowing what you have rather than guessing.

Look through it and see if you have anything that is more valuable than the average. If not, or if your records and sleeves are “well loved” (say, VG condition or worse), it probably isn’t worth your time to work hard to sell them. Be kind to a friend: Give them to someone who collects records. Or sell them at your next garage/rummage sale for 10 cents or a quarter each. Or donate them to Goodwill, the Salvation Army, the St. Vincent de Paul Society, or some other charity with a thrift shop, and get a tax receipt. But don’t throw them away! We never recommend that unless your records are in truly poor condition.

Maybe your stash has some records of above-average value, or maybe you actually took good care of your records and they are still in VG+ condition or better. You can do either of two things:

- sell them to a dealer;
- sell them yourself, directly to collectors.

What to expect when selling to a dealer. As we already mentioned, the prices in this book are **NOT** dealer’s prices; they are collector’s prices. Also, please note that the prices in this book are a guide and not sent down from on high. You are in for a rude awakening if you expect to get these prices from a dealer.

For something genuinely rare, you might get 40 to 60 percent of the “book value.” For many of these, all a dealer has to do is contact the right customer, and the record is sold. For less expensive records, though, don’t expect to get more than 10 to 25 percent of the “book value.” The less valuable a record is, the lower the percentage of the retail price a dealer will give you for it. Sellers, even those who only sell online, have overhead costs they have to recover, such as inventory, rent, utilities, postage and packing fees, employees, insurance, taxes, listing fees, bandwidth, and many more costs a dealer has to recoup to stay in business. Some dealers won’t even try

to get records from people who say they consulted a price guide, because these sellers sometimes get delusions about what they “deserve” for their records. If this happens to you, don't say we didn't warn you.

Sometimes, the hardest part of selling to a dealer is finding one. Most large cities, and many smaller ones, have used record stores. The best way to find them in your area is to look in your local Yellow Pages. Depending on who published the phone book, used record stores are found either under the heading “Records, Tapes and Compact Discs – Retail” or “Compact Discs, Tapes and Records – Retail.” Just because you've found that store (or stores) doesn't mean they will buy your records. From a dealer's standpoint, common records are almost literally a dime a dozen. You might get only a token amount for a pile of records if all of them are fairly common, regardless what this price guide says. But if the alternative is getting nothing for them, you'll probably be happy with the result. And you no longer have the records in your way.

It is becoming more frequent, however, that the dealer may not want your records at all, especially if they will only end up in the bargain bin.

What to expect when selling to a collector. In the era of online auctions, this is a more appealing alternative than it used to be. Regardless what method you use, it will take longer and require more patience than selling to a dealer. Plus, if you will be selling through the mail, you have some additional costs, most notably for good packaging and postage. But it can be worth the effort.

It takes work to sell your records directly to someone who wants them for a collection. **We do not have lists of record collectors that you can contact, so please don't ask. Finding collectors is up to you.**

Before the Internet, you basically had two options for doing it yourself to reach the collector's market: setting up at record shows/fairs, or advertising in record collecting magazine. And both still have their place.

For a seller, the record show is a great place to meet other collectors and dealers, get ideas and advice, and see some records you might not see anywhere else. Also, some high-value deals still take place at shows. If you like the direct interaction and the wheeling and dealing—and can resist the temptation to add to your own inventory or collection with the proceeds—then selling at a record show may be for you.

Record collector magazines have shrunk in recent years, but they remain a viable outlet for certain kinds of collectibles. They are best for selling middle- to higher-priced items that allow you to make up for the cost of the ad and still make money. And, as most serious collectors read such magazines, an ad letting them know of your existence can pay dividends.

The major record collecting magazine in the United States today is *Goldmine*[®], which is published by F+W Publications; if you've never seen it, you can find it at many major bookstores and independent record shops, or a sample copy can be obtained by calling 800-258-0929.

For most people with an accumulation of records who want to “eliminate the middleman,” online has been the way to go since the late 1990s. And the most popular site for this action is eBay (www.ebay.com).

Online selling seems to draw two widely different audiences. One is much the same as a stand-alone record store, except on a global scale rather than a regional one. Browsers who know next to nothing about record collecting and the relative scarcity of the listed pieces are common. These are people who can sometimes be fooled into paying too much for a common record if they get caught up in “auction fever,” where the thrill of the hunt can override their rational knowledge that the item can be had cheaper somewhere else or with a bit more patience at eBay.

The other audience drawn to online sales is the hyper-specialist, and this is often where items can justifiably go for much more than in a retail store. Thanks to search engines, a fan of, say, Elvis Presley can type in the words “Elvis Presley” and find nothing but the Elvis Presley-related material. People who specialize in one artist will usually pay more—sometimes a *lot* more—than someone who collects a broader range of artists. Because they are specialists, though, they also know which items are common, so they don't get taken on the easy stuff.

As a seller, you are reaching a larger audience than you would in a record collecting magazine, but a much less targeted one. The Internet seems to be a good place to sell lower-priced items that might take up valuable space in an expensive print ad. But many more valuable items fetch less online than they do through more traditional means.

To do the best at selling online:

- Use the following *Goldmine*[®] Grading Guide. Don't say that your records are in “good condition,” because “good” is a low grade... unless, of course, they really *are* in only “good” condition.

- Grade your records conservatively, and mention any flaws with them in your description.

- Always mention the label and number of any record you sell. I am amazed at how many auctions lack this basic, and vital, information.

- Take a picture of, or scan, everything you sell, and post those images with your auctions. If possible, use multiple images. Photos can tell the potential buyer more than your words will.

- That said, don't alter your images in any way or steal someone else's better images! Your buyers probably won't deal with you again when they find out that your “pristine” record or sleeve has serious flaws.

- Answer all of your customers' questions, no matter how arcane or trivial they may seem. It could be the difference between a sale and no sale.

- Make your minimum bid the lowest amount you'll be willing to take for the item. Many items sell for only the minimum.

- However, if you really want to sell, don't set that minimum too high. It is better to start an auction low and watch the action send an item to new heights than to put a high minimum on an item. If you feel queasy, use a hidden reserve price, below which you won't sell the item.

- Charge a reasonable amount for shipping. It is expected that buyers will pay for shipping. But don't try to make a profit at it, either. If you charge more than what the Postal Service or your private shipper of choice charges to send an item, explain why.

- Once you sell the items, pack them well. Some customers will have specific requests on how they want an item sent. Listen to them!

Remember, too, that with tens of thousands of records for sale at any given time, approximately half of all records on eBay receive no bids at all. In addition to not following the advice for sellers listed above, it's possible that no one wanted to buy your record during the time your record was posted. Maybe at another time, you'll get bidders.

Using the *Goldmine*[®] Grading Guide

Nothing is more important in determining the value of your records than their condition! Yes, their relative rarity and demand is important, but a collector or dealer will pay much more for a record in Near Mint condition than one in Very Good Minus condition.

However, I've found that most people with collections or accumulations have an inflated sense of the condition of their discs. I don't know how many times I've heard people who think they know what they are talking about tell me, “My records are all Mint!” Sure, and I've got some ocean front property in Arizona to sell you.

The truth is that most records, especially from before the 1970s, are *not* in anything close to Mint or Near Mint condition. That is why a collector will pay a premium for such a disc if he or she has to have it.

This book lists values for records in Near Mint condition. Records in lesser condition are worth a fraction of the Near Mint prices.

For most collectors, Very Good is the lowest grade for which they will pay more than bargain-bin prices. And some won't even do that. Lower-grade records are only good as place holders, until a better copy comes along, or as examples of truly rare records that are difficult to find in any condition.

Regular 45s are usually sold with one grade for the entire record, unless it has a picture sleeve. In those cases, separate grades are given to the disc and sleeve.

Most of the time, LPs are sold with two grades, one for the record and one for the cover. In this book, we list only one grade, however, because **with some exceptions, albums without covers are worthless, and covers without the accompanying record are worthless.** If an album is graded VG for the cover and VG+ for the record, add the two values together and divide by 2 to get a rough estimate of the value of a “mixed grade” LP.

Most records are graded visually. This is because most record dealers have lots of records—hundreds of thousands in some cases—and they don't have the time to play their entire stock. That said, some defects are easy to see, such as scratches and warps. Others are subtle, such as groove wear from using a cheap or poorly aligned tone arm. It has been our experience that older LPs and 45s (1950s to about 1971) tend to play better than they look, and newer records (at least until 1989) tend to play worse than they look.

When grading your records, do so under a strong light. Look at everything carefully, and then assign a grade based on your overall observations.

Some records will be worthy of a higher grade except for defects such as writing, tape or minor seam splits. Always mention these when selling a record! For some collectors, they will be irrelevant, but for others, they will be a deal-breaker. For all, they are important to know.

Also, some records and sleeves were made for promotional purposes only. Again, always mention if a record is a promo copy when advertising it for sale! For collectors of 45s especially, this information can be vitally important; sometimes, the desirable song appears *only* on stock copies of the 45.

One of the obstacles to the further growth of record collecting is poor grading and a lack of consensus as to what constitutes a “Very Good Plus” or “Near Mint” record or cover. Over the years, the *Goldmine*® Grading Guide has tried to standardize this. It is now the most widely used guide for the buying and selling of vinyl albums; many eBay auctions and stand-alone Web sites swear by it. But we recognize that there are many variables to grading a record. As a seller, you are better off grading conservatively and surprising the buyer with a better record than was expected, than by grading based on wishful thinking and losing a customer.

That said, here are the standard grades for records, from best to worst.

Mint (M)

These are absolutely perfect in every way. Often rumored but rarely seen, Mint should never be used as a grade unless more than one person agrees that the record or sleeve truly is in this condition. There is no set percentage of the Near Mint value these can bring; it is best negotiated between buyer and seller.

Near Mint (NM or M-)

A good description of a NM record is “it looks like it just came from a retail store and it was opened for the first time.” In other words, it’s nearly perfect. Many dealers won’t use a grade higher than this, implying (perhaps correctly) that no record or sleeve is ever truly perfect.

NM records are shiny, with no visible defects. Writing, stickers or other markings cannot appear on the label, nor can any “spindle marks” from someone trying to blindly put the record on the turntable. Major factory defects also must not be present; a record and label obviously pressed off center is not Near Mint. If played, it will do so with no surface noise. (NM records don’t have to be “never played”; a record used on an excellent turntable can remain NM after many plays if the disc is properly cared for.)

NM covers have no creases, ring wear or seam splits of any kind. **NM picture sleeves** should look as if they never housed a record. This is a great reason to remove your 45s from their picture sleeves and keep them separate. Just keeping the 45 inside the sleeve will cause damage than can reduce the grade of the sleeve.

These are high standards, and they are *not* on a sliding scale. A record or sleeve from the 1950s must meet the same standards as one from the 1990s or 2000s to be Near Mint! It’s estimated that no more than 2 to 4 percent of all records remaining from the 1950s and 1960s are truly Near Mint. This is why they fetch such high prices, even for more common items. Do not assume your records are Near Mint. They *must* meet these standards to qualify!

Very Good Plus (VG+) or Excellent (E)

A good description of a VG+ record is “except for a couple minor things, this would be Near Mint.” Most collectors, especially those who want to play their records, will be happy with a VG+ record, especially if it is toward the high end of the grade (sometimes called VG++ or E+).

VG+ records may show some slight signs of wear, including light scuffs or very light scratches that do not affect the listening experience. Slight warps that do not affect the sound are OK. Minor signs of handling are OK, too, such as telltale marks around the center hole, but repeated playing has not misshapen the hole. There may be some very light ring wear or discoloration, but it should be barely noticeable.

VG+ covers should have only minor wear. A VG+ cover might have some very minor seam wear or a split (less than one inch long) at the bottom, the most vulnerable location. Also, a VG+ cover may have some defacing, such as a cut-out marking. **Covers with cut-out markings can never be considered Near Mint.**

VG+ picture sleeves might show some very light creasing where it is obvious that a record once resided (or still does reside). A VG+ picture sleeve might have some very minor seam wear or a split (less than one inch long) at the bottom, the sleeve’s most vulnerable location.

Very Good (VG)

Many of the imperfections found on a VG+ record are more obvious on a VG record. That said, VG records—which usually sell for no more than 25 percent of a NM record—are among the biggest bargains in record collecting, because most of the “big money” goes for more perfect copies. For many listeners, a VG record or sleeve will be worth the money.

VG records have more obvious flaws than their counterparts in better shape. They lack most of the original gloss found on factory-fresh records. Groove wear is evident on sight, as are light scratches deep enough to feel with a fingernail. When played, a VG record has surface noise, and some scratches may be audible, especially in soft passages and during a song’s intro and ending. But the noise will not overpower the music otherwise. Minor writing, tape, or a sticker can detract from the label. Many collectors who have jukeboxes will use VG records in them and not think twice. They remain a fine listening experience, just not the same as if it were in better shape.

VG covers and sleeves will have many signs of human handling. Ring wear in the middle or along the edges of the cover where the edge of a record would reside, is obvious, though not overwhelming. Some more creases might be visible. Seam splitting will be more obvious; it may appear on all three sides, though it won’t be obvious upon looking. Someone might have written or stamped a price tag on it, too.

Lower Grades

Good (G), Good Plus (G+) or Very Good Minus (VG-) records go for 10 to 15 percent of the Near Mint value, if you are lucky.

Good does not mean bad! The record still plays through without skipping, so it can serve as filler until something better comes along. But it has significant surface noise and groove wear, and the label is worn, with significant ring wear, heavy writing, or obvious damage caused by someone trying to remove tape or stickers and failing miserably. A Good to VG- cover has ring wear to the point of distraction, has seam splits obvious on sight and may have even heavier writing, such as, for example, huge radio station letters written across the front to deter theft.

If the item is common, it’s probably better to pass it up. But if you’ve been seeking it for a long time, get it cheap and look to upgrade.

Poor (P) and Fair (F) records go for 0 to 5 percent of the Near Mint value, if they go at all. More likely, they end up going in the trash. Records are cracked, impossibly warped, or skip and/or repeat when an attempt is made to play them. Covers are so heavily damaged that you almost want to cry. Only the most outrageously rare items ever sell for more than a few cents in this condition—again, if they sell at all.

Sealed Records

Very few 45s were ever sold “sealed” at retail. Two exceptions are the Pink Floyd single “When the Tigers Broke Free” and the Grateful Dead’s gray vinyl edition of “Touch of Grey.” If still sealed, these can bring even higher prices than listed in the book, assuming none of the signs of abuse that distract from the condition of the picture sleeve.

Some 7-inch EPs definitely were sold sealed, especially in the 1960s. I’ve sometimes come across copies that were open but still had shrink wrap on them. Most sealed records you will encounter are LPs. Still-sealed albums can—and do—bring even higher prices than listed in the book.

But one must be careful when paying a premium for sealed records of any kind for several reasons:

1. They may have been re-sealed;
2. The records might not be in Near Mint condition;
3. The record inside might not be the original pressing or the most desirable pressing;
4. Most bizarre of all, the wrong record might be inside. I’ve had this happen to me; I opened a sealed album by one MCA artist only to find a record by a different MCA artist inside! Fortunately, I didn’t pay a lot for that sealed LP. I would have been quite upset if I had!

Rare Record Market: An Interview with John Tefeller

Hardly a day goes by—indeed, on some days, hardly an hour goes by—without someone calling John Tefeller about their records. Most of them have seen his ads and want to sell. And in almost all those cases, he turns them down.

That's because Tefeller, a dealer in rare records from Grants Pass, Oregon, is very discriminating in what he buys for his monthly auctions. And that's why he says that his auctions, which appear 12 times a year in *Goldmine*® magazine and online on his Web site, www.tefeller.com, are among the most successful rare record sales anywhere.

"In the last five or six months, I'm up to a 98 percent sale rate," Tefeller said earlier this year in an interview for the *Standard Catalog of American Records*. "In my most recent auction [as of the interview date], I had 229 records on the list, and I sold 219 of them. Other dealers can't figure out what I'm doing right. They are astounded."

Consider that most record sellers are happy to sell about half the items they list in an auction. Indeed, Tefeller said that at one time, he sold about 50 percent of the items in his auctions, and that was still good. But he thinks that, after 30 years of buying and selling records, "I have it down to a science now. I know what the marketplace is, and I know what people want to buy, and I don't make too many mistakes."

If you've never seen Tefeller's auctions, they are loaded with a combination of truly rare records and almost-perfect copies of classics that, because of their popularity, are rarely seen in like-new condition. Tefeller's auctions consist exclusively of six categories:

- Blues;
- R&B, including 1950s vocal groups;
- Motown and girl groups, "which I usually lump together, though I know they aren't the same thing—far from it";
- Surf and rock instrumentals;
- 1950s rock & roll;
- 1960s rock & roll.

Just as important to Tefeller is that he genuinely likes the music he sells. One needs only to read the descriptions in his auctions to see the enthusiasm he holds for these genres.

Within each of these categories, Tefeller senses a continuing demand for the hard-to-find items. "As long as you understand the parameters and conditions, prices are up, up, up," he said. "I'll buy anything good that I think is good. When [sellers] do have the right stuff, I make them happy."

Taking each category separately, he says that he has fewer buyers for the R&B vocal group stuff on 45s "except for the really, really rare pieces. That's because most of the collectors of vocal groups already have great collections, and there aren't as many new buyers coming into the genre. That said, the 78 market for vocal groups is still strong."

Tefeller is happy to note that several of his favorite styles of music have found new audiences, even though the music is more than 40 years old. "Rockabilly has transcended the generations, as have blues and surf music," he said. "And if anything, girl groups are actually more popular than they were 10 years ago."

His one warning: "With '50s and '60s rock, you have to be careful that you don't get stuck on the big names. You have to be really careful with Buddy Holly, Bill Haley and artists like that."

As for the biggest name of them all, Elvis Presley, Tefeller said, "Elvis is dead and left the building and took his record buyers with him. Generic Elvis stuff is in the tank." Only a few Elvis-related items fetch decent sums these days, he said. Those include the first five Elvis Sun 45s and 78s, "which aren't that rare, but plenty of people want to pay a lot of money for them," as well as early promos and picture sleeves and sealed early LPs. "And that's it," Tefeller said.

Genres that Tefeller generally doesn't buy because they fall outside the six areas he does:

- Easy listening. "There's almost no market for it."
- Country. "Country is very difficult. There are only a few select items that are worth anything, but you have to do a lot of digging to find that stuff. When I get country music, I sell it on eBay."
- Classical music. "The same thing is true of classical as it is in country."
- Jazz. "There's almost no money in jazz 45s; there's a little bit in jazz EPs because of the artwork, and there can be a lot of money in jazz LPs if you have the right stuff. But it can be really easy to get stuck."
- Soul outside of Motown. "It's such a fickle marketplace," he said "It's one of the last areas where people can find stuff easily if they do a little bit of

looking. If the market for Northern Soul did not exist, there would be a lot of starving record dealers. I don't know the market, and I don't want to take the time to learn it. I don't need every piece of the pie."

He feels that most items listed in this price guide under \$50 are rarely going to attract anywhere near that, "and most items in the \$10-\$20 range, you'll be lucky to get a dollar or two." But with items that start to approach three figures, "I can often get more than the 'book value' for them," Tefeller said.

However, he could not emphasize enough how important the condition of your records is: "You better have something really rare before you'll get something for it," he said, "and if it's not really rare, it has to be like new. Anything less than 'like new' is going to be unsaleable in today's world."

"With LPs, the money is with sealed records," he added. "But then it becomes a very tricky situation, because records can easily be re-sealed. You have to buy from reliable sellers. The sealed album market is really dangerous waters, but that's where the money is, in investment quality pieces."

Tefeller is no fan of eBay, though he uses it to sell some things that either don't sell in his regular auctions or don't fit into them. Even then, he might post 50 items at a time and sell between 45 and 48 of them, which is a phenomenal success rate for an eBay seller. "Other people can't figure out how I do it, even on eBay," he said. "But you can't put out mediocre auction lists and then hope to sell everything. They've turned eBay into a giant flea market, where they just try to sell whatever they have, and then they're frustrated when they don't sell anything."

But he sees the future of record collecting as bright, even if he thinks the marketplace will shrink. "Eventually, records will be collected by a smaller number of people than collect them today," Tefeller said. "But in a world of iPods and computers, they will have learned to appreciate and enjoy the artifact. And the original artifact will always be in demand by somebody."

Top 50: Vinyl from \$3,000 to \$30,000

Many people would pass a record bin at a Goodwill store and simply ignore it, or wonder why the store even bothers putting records out. The following list illustrates that there are some extremely valuable records to be found. Who knows what might turn up in a bargain bin or at a garage sale?

BARRIX, BILLY

45

CHESS

1662 Cool Off Baby/Almost 1958 VG \$5,000 VG+ \$7,500 NM \$10,000

This record has been counterfeited; most of these are obvious on sight because neither the typeface nor the blue color matches original Chess 45s of the era, the fake label is glossy and originals aren't, and the publisher information at 3 o'clock is flush left on the originals and centered on the fake.

BEATLES, THE

45s

DECCA

31382 My Bonnie/The Saints 1962 VG \$7,500 VG+ \$11,250 NM \$15,000

By "Tony Sheridan and the Beat Brothers"; black label with color bars (all-black label with star under "Decca" should be a counterfeit).

VEE JAY

Spec. DJ No. 8 Ask Me Why/Anna 1964 VG \$5,000 VG+ \$7,500 NM \$10,000

Though it doesn't fit into any known Vee Jay numbering system (other "Spec. DJ No." records are rumored, but none are confirmed), this is an authentic 1964 promotional release.

7-Inch Extended Play

VEE JAY

1-903 [PS] Souvenir of Their Visit to America

1964 VG \$4,000 VG+ \$6,000 NM \$8,000

"Ask Me Why/The Beatles" plugged on promo-only sleeve.

Albums

CAPITOL

ST 2553 [P] Yesterday and Today 1966 VG \$4,000 VG+ \$6,000 NM \$8,000

"First state" butcher cover (never had other cover on top); cover will be the same size as other Capitol Beatles LPs.

UNITED ARTISTS

UAS 6366 [PA] Hard Day's Night 1964 VG \$6,000 VG+ \$9,000 NM \$12,000

Pink vinyl; only one copy known, probably privately (and secretly) done by a pressing-plant employee.

VEE JAY
 PRO 202 [DJ] Hear the Beatles Tell All
 1964 VG \$6,000 VG+ \$12,000 NM \$18,000
White label promo with blue print.
 SR 1062 [B] Introducing the Beatles 1964 VG \$3,000 VG+ \$5,500 NM \$8,000

Song titles cover; with "Love Me Do" and "P.S. I Love You"; oval Vee Jay logo with colorband only! This album has been heavily counterfeited; please check the label of your copy carefully. If the words "Introducing the Beatles" are above the center hole of the record, and the words "The Beatles" are below, it is automatically a counterfeit and almost worthless.

SR 1062 [B] Introducing the Beatles 1964 VG \$4,000 VG+ \$8,000 NM \$12,000
"Ad back" cover; with "Love Me Do" and "P.S. I Love You" (both mono); oval Vee Jay logo with colorband only!

SR 1085 [B] The Beatles and Frank Ifield on Stage
 1964 VG \$4,000 VG+ \$8,000 NM \$12,000
Portrait of Beatles cover; "Stereo" on both cover and label.

BRENSTON, JACKIE

45
 CHESS
 1458 Rocket "88"/Come Back Where You Belong
 1951 VG \$5,000 VG+ \$7,500 NM \$10,000
Early rockabilly classic; obscenely rare, even though the 45s were pressed later.

BROWN, CHARLES

Album
 ALADDIN
 LP-702 [10] Mood Music 1952 VG \$3,000 VG+ \$5,250 NM \$7,500
Red vinyl.

BURNETTE, JOHNNY

Album
 CORAL
 CRL 57080 [M] Johnny Burnette & the Rock 'N' Roll Trio
 1956 VG \$2,000 VG+ \$4,000 NM \$6,000
Originals have maroon labels, machine-stamped (not engraved) numbers in the dead wax, printing on jacket's spine and "Printed in U.S.A." in lower right of back cover.

CASTELLES, THE

45
 GRAND
 122 My Wedding Day/Heavenly Father 1955 NM \$7,000
Cream label original.

CRYSTALS, THE (1)

45
 PHILLES
 111 (Let's Dance) The Screw — Part 1/(Let's Dance) The Screw — Part 2
 1963 VG \$3,000 VG+ \$4,500 NM \$6,000.

Light blue label; no "D.J. Only Not for Sale" on label; "Audio Matrix" stamped in dead wax (counterfeits do not have this).

DYLAN, BOB

Albums
 COLUMBIA
 CL 1986 [M] The Freewheelin' Bob Dylan
 1963 VG \$4,000 VG+ \$8,000 NM \$12,000
"Guaranteed High Fidelity" on label; plays "Let Me Die in My Footsteps," "Rocks and Gravel," "Talkin' John Birch Blues" and "Gamblin' Willie's Dead Man's Hand." Label does NOT list these. In dead wax, matrix number ends in "--1" followed by a letter.

CS 8786 [S] The Freewheelin' Bob Dylan
 1963 VG \$15,000 VG+ \$22,500 NM \$30,000

"360 Sound Stereo" in black on label (no arrows); record plays, and label lists, "Let Me Die in My Footsteps," "Rocks and Gravel," "Talkin' John Birch Blues" and "Gamblin' Willie's Dead Man's Hand." No known stereo copies play these without listing them, but just in case, check the trail-off for the numbers "XSM-58719-1A" and "XSM-58720-1A." If the number after the dash is "2" or higher, it's the standard version.

FIVE KEYS, THE

45
 ALADDIN
 3127 Red Sails in the Sunset/Be Anything, But Be Mine
 1952 VG \$3,000 VG+ \$4,500 NM \$6,000

FLAMINGOS, THE

45
 PARROT
 811 I Really Don't Want to Know/Get With It
 1955 VG \$4,000 VG+ \$6,000 NM \$8,000
Red vinyl.

HIDE-A-WAYS, THE

45
 RONNI
 1000 Can't Help Lovin' That Girl of Mine/I'm Coming Home
 1954 VG \$2,000 VG+ \$4,000 NM \$6,000

HORNETS, THE

45s
 STATES
 127 I Can't Believe/Lonesome Baby
 1953 VG \$4,000 VG+ \$6,000 NM \$8,000
Black vinyl.
 127 I Can't Believe/Lonesome Baby
 1953 VG \$7,500 VG+ \$10,000 NM \$15,000
Red vinyl.

IMPRESSIONS, THE

45
 VEE JAY
 280 For Your Precious Love/Sweet Was the Wine
 1958 VG \$4,000 VG+ \$6,000 NM \$8,000
As "Jerry Butler and the Impressions."

KEROUAC, JACK

Album
 DOT
 DLP-3154 [M] Poetry for the Beat Generation
 1959 VG \$5,000 VG+ \$7,500 NM \$10,000
Acknowledged to be extremely rare; approximately 130 copies were distributed and only a small handful are known to exist today; the same performance is on Hanover 5000.

LARKS, THE (3)

45
 APOLLO
 1184 My Reverie/Let's Say a Prayer
 1951 VG \$4,000 VG+ \$6,000 NM \$8,000
Red vinyl.

LEWIS, SMILEY

Album
 IMPERIAL
 LP-9141 [M] I Hear You Knocking 1961 NM \$6,000
Green vinyl (one copy known).

MELLO-HARPS, THE

45
 DO-RE-MI
 203 Love Is a Vow/Valerie 1956 VG \$4,000 VG+ \$6,000 NM \$8,000

MIDNIGHTERS, THE

Album
 FEDERAL
 295-90 [10] Their Greatest Hits 1954 VG \$4,000 VG+ \$6,000 NM \$8,000

MILBURN, AMOS

Album
 ALADDIN
 LP-704 [10] Rockin' the Boogie 1952 NM \$8,000
Red vinyl, blue cover.

MILBURN, AMOS/WYNONIE HARRIS/ETC.

Album
 ALADDIN
 LP-703 [10] Party After Hours 1952 NM \$8,000
Red vinyl, blue cover.

NU-TONES, THE

45

HOLLYWOOD STAR
