(defun command-name (args)
  "documentation" (interactive "template")
 body)
An example:
(defun this-line-to-top-of-window (line)
  "Reposition current line to top of window.
With ARG, put point on line ARG."
  (interactive "P")
  (recenter (if (null line)
                 0
               (prefix-numeric-value line))))
The interactive spec says how to read arguments interac-
