HOW TO USE THIS CHART

This chart describes the route to human recovery and ultimate expansion of one's ability and power as a spiritual being. The field of human recovery belongs to DIANETICS. Above this is the area of Scientology, which brings an individual to higher states of being and ability.

The chart could be conceived as a map of the expansion of life, showing at each level the realization of a greater potential, with at the left under **Training**, a new knowledge and skill in handling life, in the middle column, an expanded **awareness** and at the right under **Processing**, the attainment of a higher state of beingness.

1. In your first reading of the chart you will probably have scanned it over in a general way and become familiar with many parts of it.

Be sure, next, to read across the top of the columns, to learn what each column describes. You'll see that the three main areas, TRAINING, AWARENESS CHARACTERISTICS and PROCESSING are co-ordinated in one's progress up the chart. Just as each level requires an auditor with an added field of knowledge and skill, at that level we find also a preclear ready to be run on the level, having attained all the Grades below.

2. Now, starting with the first introductory level (bottom line at left) read across the columns and find out what is accomplished, where it can be obtained and why it is important. Note that the INTRODUCTORY LEVELS are not prerequisites, but are there to help one begin and become familiar with fundamentals.

3. Even before you reach the level of DIANETICS the chart expands to encompass both training and processing. Read across each complete level, only moving up a level when you have satisfied your own understanding of each level as described. You will thereby gain a thorough grasp of the direction and magnitude of Dianetics and Scientology.

4. Read the books of Dianetics and Scientology available from every Church of Scientology or your local bookstore for continued expansion of your knowledge and use of the subjects.

5. In your study of this chart (and in any study) be sure you do not go past words you do not underst
