of the same date and title.)

**CONDITION FORMULAS--HANDLING A WITHHOLD**

*Refs:*

HCO PL. 11 Apr. 72	FURTHER DATA ON CORRECT DANGER CONDITION HANDLING
HCO PL. 2 Nov. 82	CONDITIONS HANDLINGS
HCO PL. 3 Aug. 85	COMPLETING CONDITIONS FORMULAS

(Excerpted from an LRH talk to Commodore's  
Messengers on 5 June 79.)

Formulas are based on natural laws.

We know the correct application of formulas can get some crashing wins.

But it will happen every once in a while that a guy has a withhold. Now that is no O/W write-up, it's just *one* thing. The proper operation of a formula might contain the necessity for the person to get off a withhold or to get off the withhold that he really had deserved the formula because he had done such and so.

This would call for a meter check such as "Do you have any overts and withholds that would prevent you from applying this formula?" Bang! That would be that.
