C/S Series 35

EXTERIORIZATION ERRORS

(Reference HCO B 11 Apr 71 L3B. Reference
HCO B 27 Mar 71 Dianetic Erasure.)

Almost all the Errors in an Exteriorization Rundown are Dianetic errors. Most are very ordinary, even corny.

IT IS VITAL TO CORRECT AN EXT RD ERROR AS A FIRST ACTION.

There is one Ext RD error that is not a purely Dianetic error and that is the error doing anything else at all before an Ext RD is done properly or an Ext RD error is fully corrected.

When a pc is exteriorized by auditing and is then audited further without being given an Exteriorization Run Down, his TA will go high or low and he may be very upset. Heavy masses may come in and he may also get ill.

Ext RD errors also may go back to earlier Dianetic errors. A number of unflat incidents invite the overrun of these if they also occur on a Dianetic Chain.

To clean up a balled up Ext RD chain or incident one may have to find and clean up the Dianetic error it is sitting on during the clean up of the Ext RD error.

Using the new List L3B on every flow of the Ext RD up to Question 26 of L3B will in extreme (cases where all else fails) locate the trouble even where the auditing report is false or incorrect.

Auditors who can't run ordinary R3R with great success should not be let near an Exteriorization RD as their lack of smoothness in handling Dianetics will wreck the Ext RD.

DIANETIC AUDITORS

An excellent Dianetic Auditor can easily repair a messed up Interiorization rundown after a folder study and by use of L3B.

A Dianetic Auditor with an excellent Dianetic Record of wins can be given an Ext RD to do or to correct IF HE IS STARRATED ON THE EXT PACK AND THE TWO WAY COMM PACK. If a Dianetic Auditor does an Ext RD, the recall steps may be omitted.

REPAIR

Wherever you see a TA high and a pc in trouble your first suspicions should be

1. Audited past Ext in Auditing without an Ext RD being done.

2. Ext RD botched.

3. A previously messed up Dianetic action has gotten fouled up with the Ext RD.

4. The Ext Command was improperly cleared (such as "means go in and out again" "means trapped" "meant leaving" etc.).

5. Firefights and worries over the high or low TA have ensued after an Ext ball up has occurred.

6. Some major action like grades or items or Power have been run twice.

7. A C/S has hopefully kept on getting the pc audited without detecting the real reason as a flubbed Ext RD.

PERCENTAGES

The percent of misrun Ext RDs is high.

The liability of leaving them unrepaired is high.

Reasons for high TA are averaging out close to 100% as an unrun or a flubbed and unrepaired Ext RD.

EXT IN SESSION

When a pc Exteriorizes in session it is the End Phenomena for that process or action. One gently ends off in any case.

If the pc is now given or if he has had a completely okay Ext RD he can be audited further. Otherwise no.

If even years after an Ext RD the pc has a high TA or a low TA then Ext trouble is at once suspected and the original Ext RD and any repair of it is suspect and must be handled.

L3B has been redesigned to straighten out Ext RDs or ANY Dianetic errors.

There is no real trick to either running a correct Ext RD or repairing a flubbed one.

The whole clue is whether or not the auditor can audit plain ordinary garden variety R3R.

So when ANY auditor audits a pc past Exterior he should be checked out fully on the Ext RD checksheet so he won't continue to commit the error.

And when ANYONE REGARDLESS OF CLASS is going to run an Ext RD he must

(a) Be an expert Dianetic Auditor.

(b) Be Starrated on all the Ext RD pack.

And when any C/S is confronted with high TAs or low TAs and doesn't handle at once by getting an Ext RD properly run or properly repaired he must be re-checked on the Dianetics Pack and the Ext RD pack.

DN C/S 1

A very careful Dianetic C/S-1 must be done on a previously unindoctrinated pc before he is run on an Ext RD.

Otherwise it's all too new.

A CS-1 isn't auditing.

The pc who can't do what the auditor says or can't correct an erroneous action is lost.

A fully safe pc would be one who when he goes Ext in Auditing is made to do an HDC at once before he even gets any ruds put in and not audited again until he is an HDC. He'd be a pc who was relatively safe.

A pc who does what an inexpert auditor says without question can really get fouled up! Uneducated pcs require really flawless top notch auditors. The auditor who can audit an uneducated pc is a jewel. He really has to know his business. Because the pc does whatever he says. And if he says wrongly, then there goes the session. Ever notice pc corrections in a worksheet? "I think you by-passed an F/N." "This feels overrun." "I had Grade I last year." Such auditors are not fully enough trained to handle wholly green pcs!

SIMPLICITY

Honest fellows, it's as easy to run an Ext RD as it is to run "an ear pain."

It isn't even mysterious or tough.

IT IS ONLY VERY IMPORTANT TO DETECT WHEN IT NEEDS TO BE DONE OR REPAIRED.

There are no mysteries.

Some auditors have got me feeling like I'm trying to teach them to chew soft bread!
