C/S Series 53

SHORT HI TA ASSESSMENT C/S

The following C/S is one I use to get a fast result in handling a high TA. It does handle most of them. It is in a version the auditor can use directly.

_____ PC Name _____ date
_____ Auditor Name _____

(Auditor Grade for last session)

1. Assess pc Method 5 on this sheet (go down the list calling off the items to the pc, watching the meter. Mark any Tick, sF, F, IF, LFBD (to what TA), speeded rise or Blow Up).

2. Use only the ticks or falls or BDs. The rises will however show where mass lies.

A. If A or any of the A Group, and the pc has had an Int RD, Date - tell Pc date Int RD was run from Folder Summary, then date the point it was flat by exact time - hour, minute, second until it F/Ns and he says something blew.

Locate - have pc point where the Int RD was done, get distance away, part of room, etc. until it F/Ns and he says something blew.

If these do not happen it is not Flat so do L3B on each Flow and handle per the L3B directions.

If Pc has never had an Int RD, then give him a standard Int RD providing you have checked out on the Int-Ext pack and are good at R3R.

B. If any of these read, do an L4B on the earliest lists you can find that have not been corrected. Lacking these do an L4B in general. You can go over an L4B several times handling each read to F/N until the whole L4B gives nothing but F/Ns.

C. If any of these, handle with 2 wc comm and earlier similar to F/N. If more than one reads do biggest read first and then clean up each of the others E/S to F/N. If all read on assessment you have to get an F/N for each or 6 F/Ns.

D. If any of these, do full Drug RD as per HCO B 15 July 1971 Issue III.

E. If any of these do L3B and handle according to what is stated to do on L3B.

F. Do exactly as in A using the earliest time it was done.

G. Find out what it is. If Yogi or Mystic exercises or some such 2 wc E/S it to first time done, find out what upset had occurred before that and if TA now down do LIC on that period of pc's life.

General. Handle Int RD (A) if it reads at all before handling rest as nothing will go right if Int is still out. For the remainder prefer to handle any RD group if you get a RD. If in doubt about what to do, return to the C/S.
