Scientology - Handbook for Preclears

Scientology - Advanced Procedure & Axioms

Electropsychometric Auditing
What to Audit

Course Books of Lectures

Foreword

In these simple techniques it may be difficult discover the depth of data which is Scientology, just as it was difficult in the complicated techniques of Dianetics to discover a simple therapy.

Dianetics was a productive field, a very valuable step, but it was experimental in application. Scientology is no experiment. Twenty-two years of research are behind it - three years of widespread application are behind it.

Scientology is essentially
"knowing how to know": It
produces a state of mind
wherein it becomes possible
to know Why you are here,
How to attain your goals.

A Heal Clear can be
produced with as little as
80 hours of Scientology.
Sometimes a migraine
headache can be relieved
in as little as 50 minutes.
Here is the field of miracles,
miracles done quickly
to order by auditors

trained for a very short
while.

I am very proud to
give you these techniques.
I have spent some
eighty thousand hours in
intensive investigation over
the last many years to
bring about Scientology.
At first none thought a
nuclear physicist had any
business in the field of
the human mind. Then,
when early results were
proven all Dianetics

became the "only validated
psychotherapy known to Man"
strange, badly aberrated
people began to see in it
a way to make millions -
such never used it, didn't
believe in it, but in money
there is power and men go
quite mad with it. Thus,
the last two years of this
search were rather grim -
self seeking persons doing
all they could to stop this
work for their own gain,
even before the work was
complete. Such a circum-

stance went all out of hand
in 1952 when I, interested
only in attaining what you
will read here, was sud-
denly attacked by a man
who had posed as my
friend. In a moment this
person had swept away
the \$125,000 which was to
finish this research.

Then I asked some of my
friends to send me enough
to complete my work. They
did and their contributions
have let me carry on to
this end. Without their
help this work would have

-10-

been "finished" in quite another sense. They permitted me a respite from financial worry and, more important to me personally, I could myself relax enough to get some processing.

I will write other books about these processes - but this book is for them —

Thank you —

Leonard Shostak

- 11 -

Chapter One -

You can find the Auditor's Code elsewhere. It is enough here to say that an auditor is one who clears away the errors of his fellows and that a good auditor in doing so does not lay further error in.

The goal of the auditor is to rehabilitate the self-determinism of his preclear, to bring back his hope and power, to get his preclear

-12-

up to where the preclear,
all of his own, KNOWS.

The preclear has to
take very little on faith
with these techniques.
He simply runs what he
is told.

The auditor should not
bully his preclear or
evaluate for him.

Most important, the
auditor should choose for
his preclear a person
worth salvaging, who will
in his turn help another.
We have so much to do!

- 13 -
Chapter Two

Life is a static, according to the Axioms. A static has no motion. It has no wave length. The proofs and details of this are elsewhere in Scientology.

This static has the peculiarity of acting as a "mirror". It records and holds the images of motion. It can even create motion and record and hold the image of that. It records also space and time in order to record motion which

is, after all, only "change
in space through time".

In a mind, any mind,
the basic bengness is
found to be a static which
can create motion and
on which motion can be
recorded.

Memory is a recording
of the physical universe.
It contains, any memory, a
Time index (when it happened)
and a pattern of motion.
Like a lake reflects the
trees and moving clouds,
so does a memory reflect

the physical universe.

Sight, sound, pain, emotion, effort, conclusions and many other things are recorded in this static for any given instant of observation.

Such a memory we call a "facsimile". The mind, examining a facsimile it has made, can see it, feel it, hear it, re-experience the pain in it, the effort, the emotion.

There are billions of facsimiles available to any mind. Billions of billions. These facsimiles can

be brought into present time by the environment and "unseen" or "unknown" by the awareness of awareness of the mind, can re-impress their pains, efforts and aberrations upon the being, thus making one less liable to survive.

All unknowingnesses, confusion, aberrations, psycho-somatic ills are traceable to facsimiles.

One believes he can use any facsimile he has ever received. He has been hurt. He uses the facsimile of being hurt to hurt another.

But as one survivor as well as everything else survives, to hurt another is wrong. One regrets the injury, seeking to turn back time (which is regret). Thus the facsimile he used becomes interlocked with his facsimile of trying to use it and both facsimiles "hang up" and travel with present time. One even gets the pain he seeks to inflict on another, this being the action against him of the facsimile he

sought to give, by action,
to another. It startles
the preclear, when run
through a boyhood fight,
wherein he hit another
boy in the eye, to feel
the pain in his own eye
at the instant of the blow.
And so it is with all
inflicted injuries.

This is a simple
matter of the interaction
of the pictures of energy.

This is a "maybe"
indecision, inaction. This
is aberration - trying to do
unto others what was done
to you - good or bad.

- 19 -
Chapter Three

If Life - or Theta, as it is called in Scientology, (θ), is a mirror and a creator of motion which can be mirrored, it follows then that mirror-wise, the whole of the laws of motion, magnetism, energy, matter and space and time can be found in thought and behavior and even thinking partake of the physical universal laws regarding matter, energy, space and time. This even

The laws of Newton can be found operative in thought.

Fortunately all this is beyond the need of an auditor's immediate grasp of the subject for if it were not an auditor would have to be first a nuclear physicist before he could begin to make the lawe well and the able more able.

Some understanding of the matter is, however, desirable - otherwise some very weird phil-

osophies will develop which will benefit none. And Man has been ridden to death by philosophies which, unproven by any result, yet achieved enough prominence to spoil many a society—(Schopenhauer or Nietzsche for example). And many a scientific effort has fallen into disrepute because of philosophical misrepresentations. Kant and Hegel all but ruined any hope nuclear physics or the humanities had by wild misinterpretation (in resounding language) of Indian philosophy and other

early efforts to resolve the riddle of existence. Let us see how very basic and simple are the reasons why we audit what we audit.

Life can create motion or use motion or mirror motion. Motion is a change in space. Any change involves time. Conversely, for there to be time, there must be change. If no change occurs we have the illusion of a static again.

The main trouble with facsimiles is that they "hang up" in time, then become timeless and then give the concept of "no change". Our pre-clear desiring to change for the better cannot change because he is "hung up" in a memory which he "can't" change. The auditor wants change. Timelessness or foreverness prevents change and these unwelcome conditions come about when a facsimile "hangs

"up" in present time. This makes the preclear feel he is unable to change.

No matter what you do for him, if you do not get him "into present time" or (the same thing) get the facsimiles out of present time you have no change."

Thus we had better know what makes a facsimile "hang up" and "hang up" act upon the preclear.

We see that a fac-

simile is a mirror of old motions. It is undone and gotten out of present time by dropping out its "motion"

Only the mind can put the "motion" of a facsimile back into motion in the physical universe

The facsimile is "made" by the mind's ability to duplicate the wave or motion patterns of the physical universe.

A "live" attention unit operates only in present time. A facsimile

is composed of "dead" attention units, a pattern once made by "live" units in some past present time. For example one sees a man. His attention units could be said in that instant to make up the pattern of what he sees. A moment later he has a facsimile made up of "dead" attention units. He can "see" this man again simply by throwing live units at patterns of dead units. The facsimile can come "alive" and active.

only when scanned by
live units. Then it can
stay "alive" so long as
live units are fixed on
it. It will not "run
out" or dissipate unless
a large number of live
units are played on it.
Thus a facsimile can
"hang up". This is an
analogy, but it will
do for an auditor.

An auditor can "see"
his preclear as a mind
which is surrounded by
old facsimiles which
are given just enough

attention to keep them "in present time." It is the task of the auditor to drop all facsimiles into an inactive state. It is a grim fact that one really doesn't think with these heavy facsimiles. One could survive quite well if he had no facsimiles!

Thought can pervade an area or approximate a situation and know. It thinks, the mind, with light facsimiles or no facsimiles at all.

Thus there is a compulsion early on the track to have facsimiles. Then as one ceases to "know" one is at length no longer in control of his facsimiles but is their victim. Given enough facsimiles a Man dies, a Theta being decays until it can't even be a Man.

How then does one strip away facsimiles from the present time of the preclear? The auditor would have to audit billions of them to

erase all the facsimiles
the preclear has made
or "borrowed" and which
now act heavily upon
him, giving him illness,
degradation and aberrations
as well as amnesia as
to his actual past.

Chapter Four

A wave length is a characteristic of motion. Many motions are too random, too chaotic to have orderly wave lengths.

An orderly wave length is a flow of motion. It has a regular repeated distance between its crests. Take a rope or the garden hose and give it a flip. You will see a wave travel along it.

Energy, whether electrical, light or sound has some such patterns.

Flow

This is a smooth flowing wave. Its length is between crests. It is measured in units of length such as centimeters or inches or feet.

A flow can have many patterns.

These still have wave length. We are not here much interested in patterns or characteristics. We are interested in lengths.

Here are some rough estimates of wave lengths which produce reactions on the mind, a tone scale of wave lengths. (Accurate lengths not given here.)

θ ————— ∞ w.l. or
0.0 w.l.

39.0 ————— .00000000000000000000000000000002
aesthetics cm

8.0 ————— Analytical Thought .0000002
cm

1.5 ————— Emotion .024 cm
Tone w.l.

Note how gross is emotion, how tiny is the wave producing aesthetics (art).

A wave length is not the power of a wave. A small length, given enough volume, is deadlier & stronger than a gross wave.

Now we see that a facsimile can have a mirrored set of wave lengths which match any wave in the physical universe. Actually Theta can create waves. Thus a facsimile can contain heavy effort or emotion and throw that

back at the preclear. A facsimile, restimulated by the preclear's attention units, can contain enough force to bow his back out of shape, sear his flesh, give him actual electrical shocks or make him hot enough to run a fever, to say nothing of changing his ideas.

Theta can be forced to have a facsimile it did not create. Hit a man, operate on him, beat him, give him a shock, he will then have a facsimile which can

reactivate when his attention units, later on, accidentally sweep over it.

However, Theta, to be made to have and hold any facsimile must be "built down". The only reason Theta will hold to a facsimile, the only mechanical way it can hold any facsimile is by having it attached to Theta itself.

We can see that facsimiles are unnecessary, restrictive and, in short, are control mechanisms. To

control anyone it is necessary to do one of two things:

- ① To give him a basic facsimile strong enough to put him in pain if he fails to obey it;
- ② To build on such heavy facsimiles.

For example a dog is beaten for barking and told to be quiet. Afterwards it is only necessary to tell him to be quiet. This is both operations in one.

In the case of a man - much studied stuff than

a dog, it requires a very heavy facsimile as a basic and facsimiles such as operations, accidents, beatings have to have as a basic facsimiles so strong their counterpart cannot as yet be duplicated on Earth. And the basic facsimile must answer a condition - a very important one - its wave lengths must have at least in part a near approximation of theta itself.

What wave most closely approximates

theta? It would be one
of nearly infinite length,
and that wave is found
to be aesthetics, the wave
length of the arts.

Reason, analytical waves,
are too coarse to attain
theta's or "wave length".
Art alone may do so.

The proof of all this is
its workability. And it
works. We have then:

Aesthetics

Reason

Emotion

Effort

To make theta hold a

facsimile of emotion or effort or even reason, the facsimile must itself contain an aesthetic wave.

The last alone can hold the recordings of pain, grief, exhaustion, aberration, force in upon theta.

If we had to take the emotion, effort and reason or misreason off the whole track, we would have a long task.

If we remove the compulsions toward aesthetics, we have cut away its only bridge by which heavy facsimiles

can be appended to Theta.
Theta manufactures aesthetics.
Implanted aesthetic waves,
then, if strong enough, could
obsess Theta into acting on
enforced aesthetics.

This does not say
aesthetics are bad. It
says enforced aesthetics
are bad. You can't beat a
woman into being beautiful.
You could beat her into
being obsessed about beauty.

Of your free will that
which you see as beautiful
gladdens you. Out of an
obsessive aberration all
beauty becomes hideous

even when the abberree
cries out how lovely it
is.

Just as we have en-
forced and inhibited PRC,
we have enforced and
inhibited aesthetics. These,
processed, drop off the
heavy facsimiles which
are thus tied to Theta.

Process aesthetics and
occasions vanish and
current life can be cleared
in a few hours.

But what manner of
incident is held by an
aesthetic wave and how
processed? It is so simple.

-43-

Chapter Five

Neither you nor a pre-clear need accept "whole track" or the identity of the Thetan as described fully in What To Audit. Not to begin. You'll very rapidly make up your own mind about it, with exclamation points, when you start the process "Black and White".

To audit an "assist," a grief charge, an eugram, see earlier works. These items are still with us. That "Black and White" solves

ograms and locks wholesale does not mean single incident running was not effective and that it should not be known. But these and their techniques have no place here in 88.

Single incident processing, effort processing, the running of secondaries are all replaced by "Black and White".

Straight wire, lock scanning, valence shifting are all replaced by "Concept Processing".

The reason for this is that "Black and White" and "Concept running" make

Clears, Mest and Theta, in a very short time and they are so simple that one cannot mistake any of his moves. And while an auditor can get complete results with them, they do not try his wits. They are 1, 2, 3 processes.

Concept Processing and "Black and White" mean the goals of Scientology will be reached very soon. And they mean that none in Scientology should be other than a Mest clear.

As for "whole track" and thetas I wouldn't dare

I wouldn't say a word if "Black and White" didn't show them up with alarming velocity. A preclear can soar so in tone on "whole track" and "Black and White" that his capabilities so acquired cannot be ignored even by the bitterest foe of truth and freedom.

As detailed in "What to Audit" there are many electronic implants on the whole track. In other words, any preclear has in the last few thousand years been

placed in an electronic field and rendered null, void and obsessed by very heavy "electrical" currents.

The object was slavery, a compulsion to be good and obedient and to have a West body.

As one makes a dog tame by beating him, one has been made to obey by being beaten with force fields.

A heavy blow gives amnesia. A heavy force field can utterly nullify

The entire personalness of
a being.

You will be long in
processing before you
finally discover to your
own joy that you are you,
not a perishable mortal
body.

You will find electronic
incidents very vicious and
so heavy that they
push one down scale to
a not beingness which
is summed by "I am not"
"I know not". Disbelief,
distrust and many other
low scale concepts rise
as you run these heavy

incidents.

Somtimes, of great conviction, however, await your first contact with "Black and White."

The electronic fields are ready to be run. They are "in present time". They contain heavy effort and emotion. And they also contain an aesthetic band.

The aesthetic waves along
pin these facsimiles to Theta.

You run out the aesthetic wave band and you have run the incident.

Chapter Six

The running of "Black and White" is very simple, simple to do, easy to audit.

The best auditing and the fastest by far is done with the E-meter. The meter practically runs the case. And, most important, it spares the auditor too close a concentration on his preclear, the only aberrative thing about auditing.

Black and White can be self-audited but in this case the E-meter

becomes quite vital.

Tell any preclear to "see" if he can find a "white area" around him. He will perceive, clearly or weakly, a blackness or a spotty black-whiteness, a greyness or a whiteness around him, above or below him. It may be in patterns or there may be color in it. You don't want anything but whiteness.

Tell the preclear to "turn it all white". He will find that if he puts his attention in the center of the sphere or if he pushes

or pulls a little he can
get the field white.

Tell him to keep it
white. He will have to
change and shift his
~~attention~~ around in the
field but he can do it.

If his attention keeps
slipping off the field will
turn black on him. Keep
telling him to put his
~~attention~~ back on the
place that turns the area
around him white.

If you have him on
a meter, as you should,
you will be able to "read"

exactly what is happen-
ing.

If the needle steadily
climbs to the left (rises),
he is keeping the field
white. The incident is
running out.

If the needle stops
or is "sticky" he has
a large section of black
in the field he must
make white. The incident,
with black in it, is not
running out.

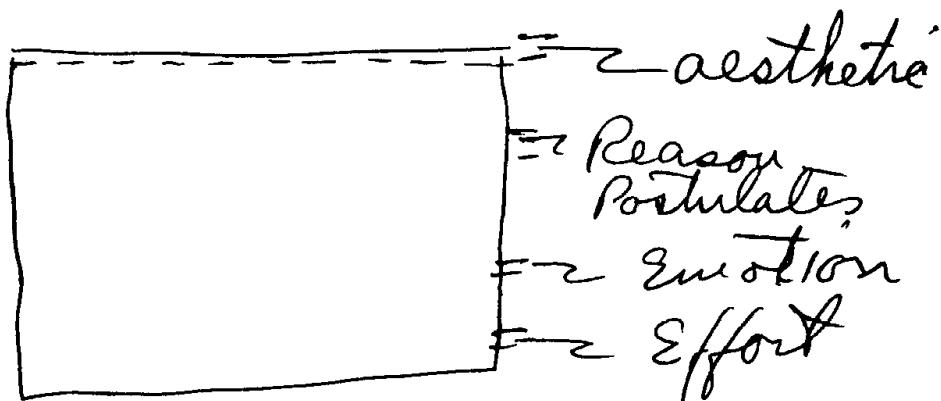

If the needle rises
and jerks suddenly to the
right (drops) he has just
gotten a somatic and the

suddenness and amount of
the drop measure the
amount of pain.

To audit all you
do is make him keep
the field white. Black
spots will appear just
before the somatic hits.
Theoretically the entire
incident could be run
without somatics simply
by keeping it white.

The aesthetic wave is
all you want out of the
incident. This gone the
rest vanishes. It is
like having a heavy

curtains hanging by a thin strip. Cut the strip and you cut down the whole curtain.

Run the aesthetic band only.
The incident is gone.

Run out the heavy electronic incidents and all heavy facsimiles go for only an electronic case keep a Thelan aberrated and form a base "sticky" enough to cause other incidents and

locks to stay in present
time or restimulate.

When the preclear
cannot get the field, an
electronic flow is bouncing
him. Get his attention to
the flow source and keep
putting it back every
time it bounces until
he can manage it. Or
unburden the case with
concept running. For if
he cannot get white,
you must take off some
of the "upper" burden of
locks by concept running.

What I boil off???

Boil-off, that sinking into grogginess or even unconsciousness cannot be permitted. It wastes time and does no good. How to stop it?

Your pc is sending or receiving a white flow. If he stays at it until after he should have reversed it, it goes black and he will start to boil. By quickly shifting the flow of attention or direction of motion in the

incident whiteness returns
and the tendency to "boil-
off" vanishes.

Hence, by discovering
the source of boil-offs
and how to stop them
we save much time.

Chapter Seven

What do we mean by aesthetic?

We mean solely and only Beautiful.

Beauty is theta. Any wave close to theta is taken by theta for beauty. A harmony of wave motions is evidently a lower harmonic of beauty. A disharmony of wave motions, no matter how high the wave length, is ugliness. But ugliness is also a wave, a disharmony with the wave length of beauty.

^x honor, gallantry, purity are lower wave lengths. They can be run until Beauty is found.

but very close to it.

Light and dark waves, as they appear to attention units, go in harmonies all the way down the scale from .000000000000000000000002 centimeters to the bottom.

high wave beauty
high wave ugliness

It must be remarked that
this is an approximation,
a rough analogy, for the
auditor, not the engineer.

Do Not get Beauty entangled here with Love or anything else but beauty. Beauty is a wave length closely

resembling theta or a
harmony approximating
theta. Ugliness is a
disharmony in wave discord
with theta.

Theta will stop ugliness
or disharmony or try to stop
it; that is to say the wave
of ugliness will disrupt
theta.

This may sound quite
poetic. It is in fact
very "hard-boiled" engin-
eering. It is just a matter
of wave lengths, apparently.

Thus an incident must
have a beauty factor if it

is to append itself to Theta. Or it must be underlain by an incident with such a beauty factor.

The "beauty" in this case, and where we will find it to audit, is actually a counterfeit of Theta, an obsessive beauty which enforces beauty and forbids ugliness.

Theta, left alone, will seek beauty and fight or shun ugliness. It would have to be able to if it could be aberrated

into an obsession about beauty. That this obsession is present, an auditing test leaves no doubt.

If your preclear will run the concept of beauty in the white of an electronic incident and the concept of ugliness on the black if it insists on coming in, the incident will run out.

Direct the preclear's attention to the white and

-64-

have him get the concept that it is beautiful. He will not have to employ much effort to keep it white if he keeps this concept.

If the black keeps encroaching, have him run the concept of ugliness on it. It will lose force.

Some preclears are so badly aberrated that black has become the only desirable shade. Here is the criminal. The preclear can run how

beautiful black is He
won't do it for long.

The original incidents
when they were laid in
were designed to be
obsessive. Most have
the beauty-ugly motive.
This makes the victim
obsessed to keep all
calm and not fight.

There are even scenes -
"Hot facsimiles" pictures
made of raw energy -
to show him beauty - as
if Theta had no concept.

The other twin which a preclear gets in some incidents is good-evil. Good is a rational level wave, a harmonic on beauty, much lower. It evolves up into beauty when run and should to get the incident free. Evil, of course is as black as white is good. Religious obsessive incidents (complete with religious scenes) come in easily and run when the white is run with

the concept "good." This soon goes up scale to beauty.

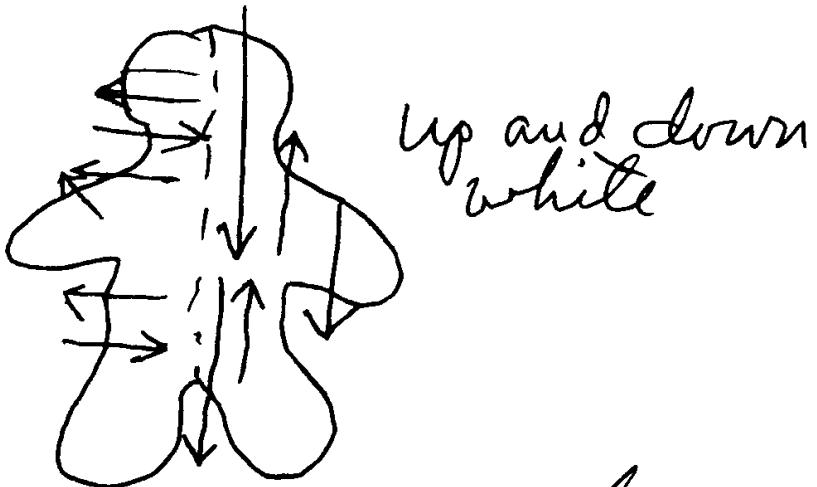

All electronic incidents run out on black and white with the concept of beauty and with a placing of attention so that the white turns on as bright as possible.

These incidents were intended to be confusing, the better to make a slave obey (they thought). By running half the

-68-

waves one way and half
the other, a beauty-ugly
conflict was created.

Back and
forth
white.

up and down
white

One side appears to go
black when the other is
run. Just get the concept
of beauty and follow the
waves and the concept
runs out the confusion.

Chapter Eight

Concept Running is easily done. The pre-clear "gets the idea" of knowing or not being and holds it, while looking at his time track. The concept runs out or the somatic it brings on runs out and the concept itself is run. It is not addressed at individual incident but at hundreds.

A concept is a high wave thought, above perception or reason or

single incidents. Thus as concepts are run, many incidents made tumble into view.

Concepts can be "in-run" or "out-run". This would be somebody having the concept of the preclear or the preclear having the concept himself. If the preclear runs a concept and starts to boil-off, have him reverse the flow. If he was running it, as his own, have him

run it as another's
and he will immediately
cease the boil-off.

You can have a
concept of anything,
even a concept of
confusion. The top
and bottom scale
of the Chart of Attitudes
make good concept
material.

But the only concepts
we have to use in
running out locks
or whole lives, knocking
away scores of incidents
at a time are:

- * Beauty
- * Ugliness
- * Cause of Ugliness
- * Cause of Beauty
- * Ato-Sympathy
- * Sympathy
- * Good
- * Evil

Wherever there is an
occusion or a case
make the prelear ren
these on it. Wherever
the scenery or people are
too bright or fixe I have
him run these on it.

That's all.

* (start, stop, change, attainment, inability to reach)

- 73 -
Chapter Nine

You can run Beauty
and ugliness on parts of
the body, on people in
the preclear's past and
on the current and former
bodies of the preclear.

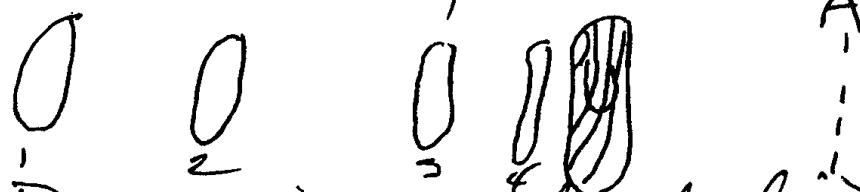

When you do the last
you will find this pattern
showing up in his current
body:

Each line
is a ridge
past body,
turned
a visio of 

on the vertical
left by some
The ridges,
white, bring
a former body.

The preclear, as a Theta diminished in size as time went on. The first impression seems like a very small person, about down to the thighs from the level of the mouth.

The preclear had bodies further away than this.

Decreasing control distances.

If #2, as an eugram, is in bestimulation, the preclear will think he is at position P behind himself, whereas he is solidly frozen by operations into his own fleet body.

To separate preclar
from bodies and discover
why he thinks he is
only the current body
run this about bodies,
particularly on old facsimiles
of bodies a few feet in front
of him:

Non-Sympathy for body
Sympathy for Body
Propositions for Body -
Here he will rapidly
recover the sensation of his
becoming nothing and the
body everything. Run Beauty -
ugliness on all bodies he has

Chapter Nine

The patterns of attention
or wave flows are :

source
 \times

Simple flow

Fix attention Source

Sphere or disc

out from center.

Fix attention on Center

then on the surface,
collapsing it.

Explosion.

Imploding into center.

Fix attention on Center

the on surface, getting
out from it.

A retractor wave.

Put attention on
both directions

Work on all flows at once.
until they turn white.

For everything that you find happened to the preclear, he did something like it to another.

Run any incident until it seems "sticky". Then run the opposite. Back and forth as required. Incidents run, then, 1st the Motivator or DEDEX, then the overt or DED.

For every inflow there is an outflow in all present time locked facsimiles. Any flow run until it goes black will turn white or erase when the direction of flow is reversed.

When any part of the body puts out in a single direction only or too long, it will aberrate.

The Thetan puts in the wave of Beauty into bodies, gets back low level or sex (just below beauty). The Thetan doesn't get a beauty wave back from bodies. Putting out too long the Thetan keys in the "Beauty" counterpart of a facsimile. This electronic incident comes into play. Run the Thetan putting out or failing to put out beauty into bodies and situations.

Chapter Ten

An auditing formulae to
make a Theta clear.

- ① Read questions to PC from
Handbook for Preclears until Auditor
has confidence.
- ② Run Beauty - highly current
life until all occlusions gone.
- ③ Run by Black and White any
electronic incident which shows
up while doing ②. Alternate
such incident with current life
until current life clears.
- ④ Run all blanketing's.
- ⑤ Run most distinct body
preclear can contact. Run out,
- ⑥ Run closer and closer bodies
until preclear is clear.
