<<VP\_18-file\_Test\_Search\_long.txt>> <<VP\_18-file\_Test\_Search.txt>> To al <<VP\_18-file\_Test\_Search.txt>> 1,

I've attached 2 log files created by the new utility.

The first file demonstrates the output, except for the format, as defined in Utility 1 (and yes it did contain a single file from 9/12/2003).

The second file demonstrates the output as defined in utility 2. Interestingly, seems we have quite a few duplicates in the 18-files that I was provided. Also, I believe that I see what appear a pattern in which the Journal Mailbox may not have been cleared for the messages moved to PST after its creation. I am troubled that there seems to be a lot of dates for which there was little email. I also believe there are a few dates missed all together. You be the judge.

I did not loop the search because I knew that I would have limited time.
