Title: NSPS for Storage Vessels for Petroleum Liquids (Subpart Ka), EPA ICR #1050.05; OMB #2060–0121). This ICR requests renewal of the existing clearance.

Abstract: This New Source Performance Standard (NSPS) regulates volatile emissions from petroleum liquid storage vessels. EPA will use the information to direct monitoring, inspection, and compliance efforts, thereby ensuring compliance with the NSPS. Owners and operators of all affected facilities must report to EPA any physical or operational change to their facility which may result in an increase in the regulated pollutant emission rate. All facilities must also maintain records on the facility operation that document: (1) The occurrence and duration of any startups, shutdowns, and malfunctions; (2) measurements of maximum true vapor pressure for each storage vessel; (3) period of storage for the petroleum liquid; (4) emissions data; (5) design specifications; and (6) an operation and maintenance plan for any vapor recovery and return or disposal system. In addition, owners and operators of facilities that use a floating roof must report any excessive gaps in tank seals, and notify the EPA when the seal gaps will be measured. These facilities must maintain records related to compliance for 2 years.

Burden Statement: Public reporting burden for this collection of information is estimated to average 5 hours per response, including time for reviewing instructions, searching existing data sources, gathering the data needed, and completing the collection of information. Public recordkeeping burden for this collection of information is estimated to average 113 hours per respondent.

Respondents: Owners or operators of petroleum storage vessels with a storage capacity exceeding 40,000 gallons and which commenced construction, reconstruction, or modification after May 18, 1978 and prior to July 23,1984.

Estimated Number of Respondents: 180.

Estimated Total Annual Burden on Respondents: 21,500 hours.

Frequency of Collection: On occasion. Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (2136), 401 M Street, SW., Washington, DC 20460.

Grants to Develop and Carry Out Authorized State Accreditation and Certification Programs for Lead-Based Paint Professionals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of funds availability; solicitation of applications for financial assistance.

SUMMARY: This notice announces EPA's intent to enter into cooperative agreements with states and territories and federally recognized Indian governing bodies which provide financial assistance for purposes of developing and carrying out authorized accreditation and certification programs for professionals engaged in lead-based paint activities pursuant to the Toxic Substances Control Act (TSCA), as amended by section 404(g) of the Residential Lead-Based Paint Hazard Reduction Act of 1992. The notice describes eligible activities, application procedures and requirements, and funding criteria. EPA anticipates that \$12,500,000 will be available during federal fiscal year 1995 (FY95) for awards to eligible recipients. There are no matching share requirements for this assistance and this is the second year funding is being made available for these grants. Subject to future budget limitations, EPA plans to provide this support on a continuing multi-year or program basis. All cooperative agreements will be administered by the appropriate EPA regional office. DATES: In order to be considered for funding during the FY95 award cycle,

all applications must be received by the appropriate EPA regional office on or before March 31, 1995. EPA will make its award decisions and execute its FY95 cooperative agreements by September 30, 1995.

FOR FURTHER INFORMATION CONTACT: For general information, contact: James Willis, Acting Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm E–543B, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD: (202) 554–0551. For technical information, contact the appropriate Regional Primary Lead Contact person listed in Unit VI of this notice.

SUPPLEMENTARY INFORMATION: TSCA section 404(g) authorizes EPA to award non-matching grants to states, territories, and federally-recognized Indian governing bodies to develop and carry out authorized programs for the training of individuals engaged in leadbased paint activities, the accreditation of training programs for these individuals, and the certification of contractors engaged in lead-based paint activities. To achieve authorization under Title IV of TSCA, programs must: (1) Be as protective of human health and the environment as the federal program established under TSCA section 402 or 406, or both, and (2) provide adequate enforcement. For states and territories that fail to obtain authorization within 2 years following promulgation of TSCA section 402 or 406 regulations, EPA must, by such date, administer and enforce a program for TSCA section 402 or 406.

Pursuant to Title IV of TSCA, EPA encourages states, territories, and federally-recognized Indian governing bodies to seek authorization of their own training, accreditation, and certification programs for lead-based paint activities. EPA therefore recommends that eligible parties seek funding through the TSCA section 404(g) assistance program, which is now being implemented to help achieve these ends. EPA further recommends that eligible parties plan to utilize this grant support in a way that complements any related financial assistance they may receive from other federal sources. EPA will, however, seek to ensure that all federally-funded lead activities are undertaken in a coordinated fashion.

EPA will work with prospective applicants to develop cooperative agreements which promote a variety of objectives deemed critical to the success of its national lead program. These include: (1) Permitting flexible
