Sales Below Cost in the Home Market

The Department disregarded sales below cost for the following firms and classes or kinds of merchandise:

Country	Company	Class or kind of merchandise
Italy	FAG SKF	BBs. BBs.

Changes Since the Preliminary Results

Based on our analysis of comments received, we have made the following changes in these final results.

• Where applicable, certain programming and clerical errors in our preliminary results have been corrected. Any alleged programming or clerical errors with which we do not agree are discussed in the relevant sections of the Issues Appendix.

• Pursuant to the decision of the United States Court of Appeals for the Federal Circuit in Ad Hoc Committee of AZ-NM-TX-FL Producers of Gray Portland Cement v. United States, 13 F.3d 398 (CAFC 1994) (Ad Hoc Comm.), we have allowed a deduction for presale inland freight in the calculation of foreign market value only as an indirect selling expense under 19 CFR 353.56(b), except where such expenses have been shown to be directly related to sales.

Analysis of Comments Received

All issues raised in the countryspecific case and rebuttal briefs by parties to these administrative reviews are addressed in the "Issues Appendix" which is appended to this notice of final results. General issues pertaining to these and all other reviews of the orders covering AFBs from various countries may be found in the "Issues Appendix" to "Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from France, Germany, Japan, Singapore, Sweden, Thailand, and the United Kingdom; Final Results of Antidumping Duty Administrative Reviews. Partial Termination of Administrative Reviews, and Revocation in Part of Antidumping Duty Orders," which is published in this issue of the Federal Register.

Final Results of Reviews

We determine the following percentage weighted-average margins to exist for the period May 1, 1992, through April 30, 1993:

Company	BBs	CRBs
FAG	2.74	(¹)
Meter	6.02	(¹)
SKF	3.79	0.00

¹ No U.S. sales during the review period.

Cash Deposit Requirements

To calculate the cash deposit rate for each exporter, we divided the total dumping margins for each exporter by the total net USP value for that exporter's sales for each relevant class or kind during the review period under each order.

In order to derive a single deposit rate for each class or kind of merchandise for each respondent (i.e., each exporter or manufacturer included in these reviews), we weight-averaged the purchase price (PP) and exporter's sales price (ESP) deposit rates (using the USP of PP sales and ESP sales, respectively, as the weighting factors). To accomplish this where we sampled ESP sales, we first calculated the total dumping margins for all ESP sales during the review period by multiplying the sample ESP margins by the ratio of total weeks in the review period to sample weeks. We then calculated a total net USP value for all ESP sales during the review period by multiplying the sample ESP total net value by the same ratio. We then divided the combined total dumping margins for both PP and ESP sales by the combined total USP value for both PP and ESP sales to obtain the deposit rate.

We will direct Customs to collect the resulting percentage deposit rate against the entered Customs value of each of the exporter's entries of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

Entries of parts incorporated into finished bearings before sales to an unrelated customer in the United States will receive the exporter's deposit rate for the appropriate class or kind of merchandise.

Furthermore, the following deposit requirements will be effective upon publication of this notice of final results of administrative review for all shipments of AFBs entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(1) of the Act: (1) The cash deposit rates for the reviewed companies will be the rates shown above, except that for firms whose weighted-average margins are less than 0.50 percent, and therefore de minimis, the Department shall not require a deposit of estimated antidumping duties; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the

original less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be the "All Others" rate for the relevant class or kind and country made effective by the final results of review published on July 26, 1993 (see Final Results of Antidumping Duty Administrative Reviews and Revocation in Part of an Antidumping Duty Order, 58 FR 39729, July 26, 1993). These rates are the "All Others" rates from the relevant LTFV investigations.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

Assessment Rates

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling and other simplification methods prevent entry-by-entry assessments, we will calculate wherever possible an exporter/importer-specific assessment rate for each class or kind of antifriction bearings.

1. Purchase Price Sales

With respect to PP sales for these final results, we divided the total dumping margins (calculated as the difference between FMV and USP) for each importer by the total number of units sold to that importer. We will direct Customs to assess the resulting unit dollar amount against each unit of merchandise in each of that importer's entries under the relevant order during the review period. Although this will result in assessing different percentage margins for individual entries, the total antidumping duties collected for each importer under each order for the review period will be almost exactly equal to the total dumping margins.

2. Exporter's Sales Price Sales

For ESP sales (sampled and non-sampled), we divided the total dumping margins for the reviewed sales by the total entered value of those reviewed sales for each importer. We will direct Customs to assess the resulting percentage margin against the entered Customs values for the subject merchandise on each of that importer's entries under the relevant order during the review period. While the Department is aware that the entered value of sales during the period of review (POR) is not necessarily equal to the entered value of entries during the
