Environmental Impact: The reallocation of Navy and Marine Corps aviation assets in this recommendation will have a generally positive impact on the environment, particularly on the air quality at Cherry Point, North Carolina, and Jacksonville, Florida. The introduction of additional aircraft and personnel to the Norfolk, Virginia, area is not expected to have an adverse impact on the air quality of that area since the net effect of moving these particular assets, when compared to the force structure reductions by FY 2001, is a reduction of personnel and aircraft from FY 1990 levels at this receiving activity. However, it is expected that conformity determinations will be required for the movements to NAS Oceana and NAS Atlanta. The utility infrastructure at each of the receiving sites is sufficient to handle the additional personnel. At none of the receiving sites will there be an adverse impact on threatened/endangered species, sensitive habitats and wetlands, or cultural/historical resources occasioned by this recommendation.
