to develop the FMR estimates and may add other data sources as they are discovered and determined to be statistically valid. The following sources of survey data are used to develop the base-year FMR estimates:

(i) The most recent decennial Census, which provides statistically reliable rent

(ii) The American Housing Survey (AHS) data, conducted by the Bureau of the Census for HUD. AHS's have comparable accuracy to the decennial Census, and are used to develop between-census revisions for the largest metropolitan areas on a four-year revolving schedule.

(iii) Random Digit Dialing (RDD) telephone survey data, based on a sampling procedure that uses computers to select statistically random samples of

rental housing.

(iv) Statistically valid information, as determined by HUD, presented to HUD during the public comment and review period.

(2) Base-year FMRs are updated and trended to the midpoint of the program year they are to be effective using Consumer Price Index (CPI) data for rents and for utilities or using rentchange factors obtained from the RDD regional surveys. The RDD rent-change factors are developed annually for the metropolitan and nonmetropolitan parts

of the HUD-specified geographic regions not covered by CPI surveys, and are used to update the base-year FMR estimates within these regions.

(d) Bedroom size adjustments. (1) For most areas the ratios developed from the most recent decennial Census are applied to the two-bedroom FMR estimates to derive FMRs for other bedroom sizes. Exceptions to this procedure may be made for areas with local bedroom intervals below an acceptable range. To help the largest most difficult to house families find units, higher ratios than the actual market ratios may be used for three-bedroom and larger-size units.

(2) The FMR for single room occupancy housing is 75 percent of the FMR for a zero bedroom unit.

(e) Manufactured home space. The FMR for a manufactured home space is 30 percent of the FMR for a two-bedroom unit, or, where approved by HUD on the basis of survey data submitted in public comments, the 40th percentile of the rental distribution of manufactured home spaces for the FMR area. HUD accepts public comments requesting revision of the proposed manufactured home space FMRs for areas where space rentals are thought to differ from the 30 percent standard. To be considered for approval, the comments must contain statistically-

valid survey data that show the 40th percentile manufactured home space rent (excluding the cost of utilities) for the FMR area. Once approved, the revised manufactured home space FMRs establish new base-year estimates that will be updated annually using the same data used to update the Rental Certificate program FMRs.

4. Section 888.115 would be revised to read as follows:

§ 888.115 Fair market rents for existing housing: Manner of publication.

FMRs will be published at least annually in the **Federal Register**. The Department will propose FMRs and provide a comment period of at least 30 days for the purpose of identifying areas where the FMRs are believed to be too high or too low. To be considered for FMR revisions, public comments must include statistically-valid rental housing survey data that justify the requested changes. After the comments have been considered, the Department will publish a final notice announcing FMRs to be effective on October 1 each year.

Dated: January 30, 1995.

Henry G. Cisneros,

Secretary.
