List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89

## §39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

95–04–08 Boeing: Amendment 39–9160. Docket 94–NM–153–AD

Applicability: Model 747–300 and –400 series airplanes equipped with BFGoodrich stretched upper deck evacuation slides, part number (P/N) 7A1323–1, –2, –3, –4, –105, –106, –107, –108, –109, or –110; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent loss of air pressure or noninflation of the inflation tubes of an evacuation slide, which could impede the evacuation of passengers from the airplane during an emergency, accomplish the following:

(a) Within 36 months after the effective date of this AD, modify the BFGoodrich stretched upper deck evacuation slide, P/N 7A1323-(), in accordance with the Accomplishment Instructions of BFGoodrich Service Bulletin 7A1323–25–266, Revision 1, dated September 30, 1994.

Note 2: Installation of the "product improvements," specified in paragraph 2.J. of

the Accomplishment Instructions of the service bulletin, is not required by this AD.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with BFGoodrich Service Bulletin 7A1323-25-266, Revision 1, dated September 30, 1994. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from BFGoodrich Company, Aircraft Evacuation Systems, Dept. 7916, Phoenix, Arizona 85040. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, Transport Airplane Directorate, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on April 6, 1995.

Issued in Renton, Washington, on February 16, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service. [FR Doc. 95–4378 Filed 3–6–95; 8:45 am] BILLING CODE 4910–13–U

## 14 CFR Part 39

[Docket No. 93-ANE-40; Amendment 39-9154; AD 95-04-02]

Airworthiness Directives; Rolls-Royce, plc RB211–524 Series Turbofan Engines

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment adopts a new airworthiness directive (AD), applicable to certain Rolls-Royce, plc RB211–524 series turbofan engines, that requires a one-time modification of the nozzle guide vane (NGV) assembly to incorporate vane core reinforcement inserts which would prevent release of

the stage 2 NGV seal ring, rotor contact, and severance of the rotor drive arm. This amendment is prompted by a report of an uncontained stage 1 low pressure turbine failure. The actions specified by this AD are intended to prevent release of the stage 2 NGV seal ring, which could result in an uncontained engine failure.

DATES: Effective May 8, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 8,

ADDRESSES: The service information referenced in this AD may be obtained from Rolls-Royce, plc, P.O. Box 31, Derby, England DE2 8BJ; telephone 44–332–242424, 44–332–249936. This information may be examined at the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Eugene Triozzi, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (617) 238–7148,

fax (617) 238-7199.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Rolls-Royce, plc (R-R) RB211-524 series turbofan engines was published in the Federal Register on October 4, 1993 (58 FR 51585). That action proposed to require a one-time modification of the nozzle guide vane (NGV) assembly to incorporate vane core reinforcement inserts which would prevent release of the stage 2 NGV seal ring, rotor contact, and severance of the rotor drive arm in accordance with R-R Mandatory Service Bulletin (SB) No. RB.211-72-9672, Revision 1, dated November 6, 1992.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter concurs with the rule as proposed.

One commenter states that the proposed rule should provide separate compliance times for spare engines. The commenter further states that the proposed rule notes that no U.S. registry engines would be affected. The commenter has one affected spare engine, and states that an acceptable
