EPA,⁶ section 182(f) exemptions are granted on a contingent basis and last for only as long as the area's monitoring data continue to demonstrate attainment. Monterey Bay is required to continue to operate an appropriate air quality monitoring network, in accordance with 40 CFR part 58, to verify the attainment status of the area.

If, prior to redesignation of the area to attainment, a violation of the ozone NAAQS is monitored in Monterey Bay (consistent with the requirements contained in 40 CFR part 58 and recorded in AIRS), the section 182(f) exemption would no longer apply, as of the date EPA makes a determination that a violation has occurred. EPA would notify the area that the exemption no longer applies, and would also provide notice to the public in the Federal Register. If the exemption is revoked, the area must comply with any applicable NO_X requirements set forth in the CAA. Thus, a determination that the NO_X exemption no longer applies would mean that the applicable NO_X NSR, general and transportation conformity, and I/M provisions would immediately be applicable (see 58 FR 63214 and 58 FR 62188) in Monterey Bay.

If Monterey Bay is redesignated to attainment of the ozone NAAQS, NOx RACT is to be implemented as provided for as contingency measures in the maintenance plan.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the EPA must determine whether the regulatory action is "significant", and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. It has been determined that this action is not a "significant regulatory action" under the terms of Executive Order 12866, and is therefore not subject to OMB review.

Under sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"),

signed into law on March 22, 1995, EPA must assess whether various actions undertaken in association with proposed or final regulations include a Federal mandate that may result in estimated costs of \$100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

EPA's final action relieves requirements otherwise imposed under the CAA and, hence does not impose and Federal intergovernmental mandate, as defined in section 101 of the Unfunded Mandates Act. This action also will not impose a mandate that may result in estimated costs of \$100 million or more to either State, local or tribal governments in the aggregate, or to the private sector.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 25, 1995. Filing a petition for reconsideration by the Administrator of this rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such a rule. This action may not be challenged later in proceedings to enforce its requirements. Section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: April 12, 1995.

Felicia Marcus,

Regional Administrator. Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52-[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401-7671q.

Subpart D—California

2. Subpart F is amended by adding § 52.235 to read as follows:

§ 52.235 Control strategy for ozone: Oxides of nitrogen.

EPA is approving an exemption request submitted by the Monterey Bay Unified Air Pollution Control District on April 26, 1994 for the Monterey Bay ozone nonattainment area from the NO_X RACT requirements contained in

section 182(f) of the Clean Air Act. This approval exempts the area from implementing the oxides of nitrogen (NO_x) requirements for reasonably available control technology (RAČT), new source review (NSR), the related requirements of general and transportation conformity regulations, and applicable inspection and maintenance (I/M). The exemption is based on ambient air monitoring data and lasts for only as long as the area's monitoring efforts continue to demonstrate attainment without NO_X reductions from major stationary sources

40 CFR Part 81

[CA132-1-6898; 5159-6]

California, Sacramento Ozone Nonattainment Area, Reclassification to Severe

AGENCY: Environmental Protection Agency (EPA). **ACTION:** Final rule.

SUMMARY: On November 6, 1991, the Sacramento Metro ozone nonattainment area was classified under the Clean Air Act (CAA) as "Serious" with an attainment date of no later than 1999. On November 15, 1994, California submitted the State implementation plan (SIP) for ozone attainment. For the Sacramento Metro ozone nonattainment area, the SIP relied on an attainment date of 2005. On December 29, 1994, the State submitted a revision to the SIP which reaffirmed the 2005 attainment date. EPA construes these submittals to be a voluntary request for a reclassification of the Sacramento Metro area from a "Serious" to a "Severe" ozone nonattainment area pursuant to section 181(b)(3) of the CAA. EPA is granting California's request for reclassification of the Sacramento Metro area to "Severe" in today's document. EFFECTIVE DATE: June 1, 1995.

ADDRESSES: Materials relevant to this document can be found in the following locations: EPA Air Docket Section, Attn: Docket No. A-94-09, Environmental Protection Agency (Mail Code-6102), Waterside Mall, Room M-1500, 401 M Street, S.W., Washington, DC 20460, (phone 202-260-7549).

The docket is available for public inspection between 8:30 a.m. and 12 noon, and between 1:30 p.m. and 3:30 p.m. EPA may charge a reasonable fee for copying.
