33 CFR Part 117

[CGDO5-94-076]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Scotts Hill, NC

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the regulations governing the operation of the Figure Eight Island swingbridge across the Atlantic Intracoastal Waterway, mile 278.1, located in Scotts Hill, North Carolina, by restricting recreational vessels to bridge openings every half hour. This is intended to reduce the amount of bridge openings to relieve the increased volume of vehicular traffic crossing this bridge, while still providing for the reasonable needs of navigation.

EFFECTIVE DATE: This rule is effective on May 26, 1995.

Draft Information

The principal persons involved in drafting this document are Bill H. Brazier, Project Officer, and LCDR C.A. Abel, Project Attorney, Fifth Coast Guard District.

Regulatory History

On November 8, 1994, the Coast Guard published a Notice of Proposed Rulemaking entitled Atlantic Intracoastal Waterway, Scotts Hill, North Carolina, in the Federal Register (59 FR 55601). The commend period ended January 9, 1995. The Coast Guard did not receive any comments on the Notice of Proposed Rulemaking. On January 13, 1995, the Coast Guard issued Public Notice 5-845 requesting comments on the Notice of Proposed Rulemaking. The comment period ended February 13, 1995. No comments were received. A public hearing was not requested and one was not held.

Background and Purpose

The Figure Eight Beach Homeowners Association, Inc. has requested that openings of the Figure Eight swingbridge mile 278, Atlantic Intracoastal Waterway, be restricted for recreational vessels to every half hour due to the increase in vehicular traffic across the bridge. Currently, this bridge opens on signal at all times. The Coast Guard has decided to reduce the required bridge openings for recreational vessels from "on demand" to openings on the hour and half hour, as needed. The bridge will continue to open on signal at all other times for all other vessels. The Coast Guard believes that recreational vessels will not be unduly restricted in passage through the bridge, since they can plan their vessel transits around the hour and half opening restriction.

Regulatory Evaluation

This proposal is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this final rule to be so minimal that a full regulatory evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Coast Guard must consider whether this final rule, will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Because it expects the impact of this final rule to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this final rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.).

Federalism

The Coast Guard has analyzed this final rule under the principles and criteria contained in Executive Order 12612, and has determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this final rule and concluded that under section 2.B.2.e.(32)(e) of Commandant Instruction M16475.1B (as revised by 59 FR 38654; July 29, 1994), this rule is categorically excluded from further environmental documentation. A Categorical Exclusion Determination and checklist has been prepared and placed in the rulemaking docket.
