permitting authority may request such information in writing and set a reasonable deadline for a response. The source's ability to operate without a permit, as set forth in § 71.7(b), shall be in effect from the date the application is determined or deemed to be complete until the final permit is issued, provided that the applicant submits any requested additional information by the deadline specified by the permitting authority.

(d) Confidential information. In a case where a source submits information to the permitting authority under a business confidentiality claim, the permitting authority will follow procedures found at 40 CFR part 2. Pursuant to § 2.301(e) of this chapter, information contained in the permit application regarding emissions data or a standard or limitation is not entitled to confidential treatment.

(e) Duty to supplement or correct application. Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide additional information as necessary to address any requirements that become applicable to the source after the date it filed a complete application but prior to release of a draft permit.

(f) Standard application form. Part 71 sources shall submit the following information using application forms provided by the permitting authority (or if provided by the permitting authority, an electronic reporting method). Information as described in this paragraph (f) for each emissions unit at a part 71 source shall be included in the application. A complete part 71 permit application shall include the following elements:

(1) Identifying information, including company name and address (or plant name and address if different from the company name), owner's name and agent, and telephone numbers and names of plant site managers/contacts.

(2) A description of the source's processes and products (by Standard Industrial Classification Code) including any associated with each alternate scenario identified by the source.

(3) The following emissions-related information:

(i) All emissions of pollutants for which the source is major, and all emissions of regulated air pollutants. A permit application shall describe all emissions of regulated air pollutants emitted from any emissions unit, except where such units are exempted under

paragraph (g) of this section. Fugitive emissions shall be included in the permit application in the same manner as stack emissions for each emissions unit, regardless of whether the source category in question is included in the list of sources contained in the definition of major source. Moreover, information related to the emissions of air pollutants sufficient to verify which requirements are applicable to the source, and other information necessary to collect any permit fees owed under the fee schedule established pursuant to § 71.9 must be provided.

(ii) Identification and description of all points of emissions described in paragraph (f)(3)(i) of this section in sufficient detail to establish the basis for fees and applicability of requirements of

the Act.

(iii) Emissions rates in tpy and in such additional terms as are necessary to establish compliance consistent with the applicable standard reference test method.

(iv) The following information to the extent it is needed to determine or regulate emissions: fuels, fuel use, raw materials, production rates, and

operating schedules.

(v) Identification and description of air pollution control equipment and compliance monitoring devices or activities, including brief descriptions of any appropriate operation and maintenance procedures and quality assurance procedures.

(vi) Limitations on source operation affecting emissions or any work practice standards, where applicable, for all regulated air pollutants at the part 71

source.

(vii) Other information required by any applicable requirement (including, but not limited to, stack height limitations developed pursuant to section 123 of the Act).

(viii) Calculations on which the information in paragraphs (f)(3)(i) through (vii) of this section is based.

(4) The following air pollution control requirements:

(i) Citation and description of all applicable requirements, and

(ii) Description of or reference to any applicable test method for determining compliance with each applicable requirement.

(5) Other specific information that may be necessary to implement and enforce other applicable requirements of the Act or of this part or to determine the applicability of such requirements.

(6) An explanation of any proposed exemptions from otherwise applicable requirements.

(7) Additional information as determined to be necessary by the

permitting authority to define alternative operating scenarios identified by the source pursuant to § 71.6(a)(8) or to define permit terms and conditions implementing § 71.6(a)(9) or § 71.6(p)

(8) Identification of those emissions units eligible for emissions trading under § 71.6(a)(9) and those emissions units at which changes may be processed under de minimis permit revision procedures contained in § 71.7(f).

(9) A compliance plan for all part 71 sources that contains all the following:

(i) A description of the compliance status of the source with respect to all applicable requirements.

(ii) A description as follows:

(A) For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with such requirements.

(B) For applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely

(C) For requirements for which the source is not in compliance at the time of permit issuance, a narrative description of how the source will achieve compliance with such requirements.

(iii) A compliance schedule as follows:

(A) For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with such requirements.

(B) For applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis. A statement that the source will meet in a timely manner applicable requirements that become effective during the permit term shall satisfy this provision, unless a more detailed schedule is expressly required by the applicable requirement.

(C) A schedule of compliance for sources that are not in compliance with all applicable requirements at the time of permit issuance. Such a schedule shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirements for which the source will be in noncompliance at the time of permit issuance. This compliance schedule shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the source is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction noncompliance
