## **NUCLEAR REGULATORY** COMMISSION

[Docket Nos. 50-254 and 50-265]

Commonwealth Edison Co.; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant **Hazards Consideration Determination,** and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-29 and DPR-30 issued to Commonwealth Edison Company (ComEd, the licensee) for operation of the Quad Cities Nuclear Power Station, Units 1 and 2, located in Rock Island County, Illinois.

The proposed amendments would change the Technical Specifications by: (1) Revising the low pressure value at which the High Pressure Coolant Injection (HPCI) and Reactor Core Isolation Cooling (RCIC) systems can be tested to 150 psig, and (2) to test these systems against a system head corresponding to reactor vessel pressure when steam is supplied to the turbines at 920 psig to 1005 psig for high pressure testing and 150 psig to 325 psig for low pressure testing.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated because:

The proposed changes revise the testing requirements for the low pressure HPCI and RCIC systems, and as such do not affect any accident precursors or initiators. Therefore, the proposed changes do not increase the probability of any previously evaluated accident.

Similarly, the proposed changes implement testing requirements which will
