# B. Billing Energy

The billing energy for power purchased shall be the Measured Energy for the billing month, minus any kilowatt-hours on which BPA assesses the charge for unauthorized increase.

# Section VI. Other Adjustments and Special Provisions

A. Lower and Upper Pivot Aluminum Prices

Effective July 1, 1991, and every July 1 thereafter, the Lower and Upper Pivot Aluminum Prices set forth in section III.B of the rate schedule shall be adjusted following the procedures set forth in section VII.B of the GRSPs. The adjusted Lower and Upper Pivot Aluminum Prices shall supersede the Lower and Upper Pivot Aluminum Prices contained in section III.B of the rate schedule.

# B. Discount for Quality of First Quartile Service

If a purchaser requests First Quartile service with other than Surplus Firm **Energy Load Carrying Capability** (FELCC), a discount contained in section III.A.2 of this rate schedule shall be granted. This billing credit shall be applied to the monthly billing energy under section V.B for all power purchased under this rate schedule. No credit shall be applied to those purchases subject to unauthorized increase charges under section VI.F of this rate schedule. To qualify for the First Quartile Discount, the purchaser must request discounted rate service in writing by April 2 of each calendar year. By virtue of making such request, the Purchaser is agreeing to accept the level and quality of First Quartile service described in section 6 of the Variable Rate Contract. Such acceptance includes the waiver of contract rights provided in section 6.a(2)(a) of said contract.

### C. Unauthorized Increase

#### 1. Rate for Unauthorized Increase

- a. 100.00 mills per kilowatt-hour during the billing months August through March.
- b. 57.40 mills per kilowatt-hour during the billing months April through July.

### 2. Application of the Charge

During any billing month, BPA may assess the unauthorized increase charge on the number of kilowatt-hours associated with the DSI Measured Demand in any one 60-minute clockhour, before adjustment for power factor, that exceed the BPA Operating Level for that clock-hour, regardless of

whether such Measured Demand occurs during the Peak or Offpeak Period.

### D. Power Factor Adjustment

The adjustment for power factor, when specified in this rate schedule or in the power sales contract, shall be made in accordance with the provisions of both this section and section III.C.1 of the GRSPs. The adjustment shall be made if the average leading power factor or average lagging power factor at which energy is supplied during the billing month is less than 95 percent.

To make the power factor adjustment, BPA shall increase the BPA Operating Level by 1 percentage point for each percentage point or major fraction thereof (0.5 or greater) by which the average leading power factor or average lagging power factor is below 95 percent. BPA may elect to waive the adjustment for power factor in whole or in part.

## E. Outage Credit

Pursuant to section 7 of the General Contract Provisions, BPA shall provide an outage credit to any DSI to whom BPA is unable to deliver the full billing demand during that billing month due to an outage on the facilities used by BPA to deliver Industrial Firm Power. Such credit shall not be provided if BPA is able to serve the DSI's load through the use of alternative facilities or if the outage is for less than 30 minutes. The amount of the credit shall be calculated according to the provisions of section III.C.2 of the GRSPs.

# **Section VII. Resource Cost Contribution**

BPA has made the following determinations:

- A. The approximate cost contribution of different resource categories to the VI–95 rate is 85.8 percent Exchange and 14.2 percent New Resources.
- B. The forecasted average cost of resources available to BPA under average water conditions is 19.80 mills per kilowatt-hour.
- C. The forecasted cost of resources to meet load growth is 60.64 mills per kilowatt-hour.

# Schedule SI-95

# Special Industrial Power Rate Section I. Availability

This rate schedule is available to any DSI purchaser using raw minerals indigenous to the region as its primary resource and qualifying for this special power pursuant to the procedures established in section 7(d)(2) of the Northwest Power Act. This schedule is available for the contract purchase of this special class of industrial power

and also for the purchase of Auxiliary Power if requested by the DSI and made available by BPA. Schedule SI–95 supersedes schedule SI–93, which went into effect on October 1, 1993. Sales under this schedule are made subject to BPA's General Rate Schedule Provisions (GRSPs).

## **Section II. Rate**

A separate billing adjustment for the value of the reserves provided by purchasers of this special class of Industrial Power is not contained in the rate schedule; the adjustment is reflected in the Special Industrial Power Rate charges.

### A. Demand Charge

- 1. \$3.827 per kilowatt of billing demand occurring during all Peak Period hours during a billing month.
- 2. No demand charge during Offpeak Period hours.

### B. Energy Charge

1. 21.20 mills per kilowatt-hour of billing energy for the billing months September through March;

2. 15.08 mills per kilowatt-hour of billing energy for the billing months April through August.

## **Section III. Billing Factors**

### A. Billing Demand

The billing demand for power purchased under the Standard Special Industrial Power rate shall be the BPA Operating Level during the Peak Period as adjusted for power factor. If there is more than one BPA Operating Level during the Peak Period within a billing month, the billing demand shall be a weighted average of the Peak Period BPA Operating Levels for the billing month. The BPA Operating Level is defined in section III.A.10 of the GRSPs.

However, if BPA has agreed, pursuant to section 4 of the direct service industrial power sales contract, to sell Special Industrial Power on a daily demand basis (transitional service), BPA shall instead bill the purchaser in accordance with the provisions of section V.C of the GRSPs.

#### B. Billing Energy

The billing energy under the Special Industrial rate shall be the Measured Energy for the billing month, minus any kilowatt-hours on which BPA assesses the charge for unauthorized increase.

# Section IV. Adjustments and Special Provisions

### A. Curtailments

BPA shall charge the DSI for curtailments in accordance with the
