published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) for all other producers and/or exporters of this merchandise, the cash deposit rate shall be 24 percent, the rate established in the first notice of final results of administrative review published by the Department (47 FR 10268, March 10, 1982).

These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: April 25, 1995.

Paul L. Joffe,

Deputy Assistant Secretary for Import Administration.

National Oceanic and Atmospheric Administration

[I.D. 042595C]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of modification 2 to permit 900 (P770#66), modification 1 to permit 914 (P770#67), and modification 5 to permit 795 (P503A).

SUMMARY: Notice is hereby given that NMFS has issued modifications to permits authorizing takes of listed species for the purpose of scientific research, subject to certain conditions set forth therein, to the Northwest Fisheries Science Center, NMFS (NWFSC) and the Idaho Department of Fish and Game (IDFG).

ADDRESSES: The applications and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Highway, Silver Spring, MD 20910–3226 (301–713–1401); and

Environmental and Technical Services Division, F/NWO3, NMFS, 525 NE Oregon Street, Portland, OR 97232– 4169 (503–230–5400).

SUPPLEMENTARY INFORMATION: Notice was published on January 19, 1995 (60 FR 3844) that an application had been filed by NWFSC (P770#66) for modification 2 to permit 900 to take listed species as authorized by section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531–1543) and the NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217–222).

NWFSC requested an increase in the take of juvenile, listed, Snake River spring/summer chinook salmon (Oncorhynchus tshawytscha) associated with Study 3, a preliminary evaluation of the new juvenile collection, bypass, and sampling facility at McNary Dam. The increased take was requested to test an automatic system for detecting and diverting run-of-the-river fish tagged with passive integrated transponders (PIT) from the population of fish moving through the collection facility. The purpose of the automatic PIT tag detector and diversion system is to facilitate the collection of scientific information on juvenile salmonid migration while minimizing adverse impacts to the fish. Modification 2 to permit 900 was issued on April 7, 1995. The increased take is valid for 1995 only. Permit 900 expires on December 31, 1998.

Notice was published on February 9, 1995 (60 FR 7752) that an application had been filed by NWFSC (P770#67) for modification 1 to permit 914 to take listed species as authorized by the above laws and regulations.

NWFSC requested an increase in the take of juvenile, listed, naturallyproduced and artificially-propagated Snake River spring/summer chinook salmon (Oncorhynchus tshawytscha) and juvenile, endangered, Snake River fall chinook salmon (Oncorhynchus tshawytscha) to assess the incidence of gas bubble disease (GBD) in selected aguatic biota of the Columbia River Basin during episodes of high spill volumes at Ice Harbor Dam on the Snake River and Bonneville Dam on the Columbia River in the Pacific Northwest. NWFSC also requested authorization to take juvenile,

endangered, Snake River sockeye salmon (*Oncorhynchus nerka*) for a new study to compare the prevalence of signs of GBD in juvenile salmonids collected from the reservoir and tailrace of Ice Harbor Dam on the Snake River and the reservoir of McNary Dam on the Columbia River with the prevalence of signs of GBD in fish examined by Fish Passage Center Smolt Monitoring Program personnel at the same two dams. Modification 1 to permit 914 was issued on April 14, 1995. The increased take is valid for 1995 only. Permit 914 expires on December 31, 1998.

Notice was published on January 19, 1995 (60 FR 3844) that an application had been filed by IDFG (P503A) for modification 5 to permit 795 to take listed species as authorized by the above laws and regulations.

Permit 795 authorizes a take of listed species associated with scientific research and enhancement activities, including a captive broodstock program, on endangered Snake River sockeye salmon (Oncorhynchus nerka). For modification 5, IDFG requested authorization to: (1) Release second generation progeny of anadromous sockeye salmon that returned to Redfish Lake in 1991, (2) release progeny of 1991 outmigrant sockeye females spawned in 1993 with anadromous sockeye males, (3) release broodyear 1993 progeny of anadromous sockeye females that returned to Redfish Lake in 1993, and (4) increase the annual number of outmigrant sockeye juveniles to be trapped and handled at the Redfish Lake Creek weir. Modification 5 to permit 795 was issued on April 19, 1995. Activities 1-3 are valid for 1995 only. Activity 4 is valid for the duration of the permit. Permit 795 expires on July 31, 1997.

Issuance of these modifications, as required by the ESA, was based on a finding that such modifications: (1) Were applied for in good faith, (2) will not operate to the disadvantage of the listed species that are the subject of the permits, and (3) are consistent with the purposes and policies set forth in section 2 of the ESA and the NMFS regulations governing listed species permits.

Dated: April 26, 1995.

Russell J. Bellmer,

Chief, Endangered Species Division, National Marine Fisheries Service.
