TABLE 1.—COMMERCIAL MANAGEMENT MEASURES FOR 1995 OCEAN SALMON FISHERIES (Continued) [B. Minimum size limits (Inches)*]

	Chinook		Coho		
	Total length	Head-off	Total length	Head-off	Pink
North of Cape Falcon			16.0	12.0	None.
Cape Falcon to Humbug Mountain	26.0 26.0	19.5 19.5			None. None.

Chinook not less than 26 inches (19.5 inches head-off) taken in open seasons south of Cape Falcon may be landed north of Cape Falcon only when the season is closed north of Cape Falcon.

* Metric equivalents for chinook: 26.0 inches=66.0 cm, 19.5 inches=49.5 cm. Metric equivalents for coho: 16.0 inches=40.6 cm, 12.0 inches=30.5 cm.

C. General Requirements, Restrictions, and Exceptions

C.1. *Hooks*—Single point, single shank barbless hooks are required.

C.2. *Spread*—A single leader leading to an individual lure or bait.

C.3. Transit Through Closed Areas with Salmon on Board—It is unlawful for a vessel, that has been issued an ocean salmon permit by any state, to have troll gear in the water while transiting any area closed to salmon fishing while possessing salmon.

C.4. Landing Salmon in Closed Areas— Legally caught salmon may be landed in closed areas unless otherwise prohibited by these regulations.

C.5. *Control Zone 2*—The area immediately adjacent to the mouth of Tillamook Bay is closed as established by the Oregon Department of Fish and Wildlife in state regulations.

C.6. Consistent with Council management objectives, the State of Oregon may establish some additional late-season, all-salmonexcept-coho fisheries in state waters.

C.7. For the purposes of California Fish and Game Code Section 8232.5, the definition of the Klamath management zone for the ocean salmon season shall be that area from Humbug Mountain, Oregon, to Horse Mountain, California.

C.8. Inseason Management—In addition to certain automatic inseason actions and specific inseason regulatory modifications noted under Section D below, NMFS may make inseason adjustments to fisheries north of Cape Falcon which are consistent and complementary to Council spawner escapement objectives in the event that management agreements or understandings with Canada warrant re-evaluation of the Council's assumptions about prior interceptions.

C.9. *Halibut Retention*—Trollers must obtain a license from the International Pacific Halibut Commission (206–634–1838) by May 1 to retain Pacific halibut caught incidental to the salmon troll fishery during May through June in Area 2A (all waters off the States of Washington, Oregon, and California). A salmon troller may participate in this fishery or in the directed commercial fishery targeting halibut, but not both. During the May through June troll fishery, no more than 1 halibut may be landed for each 20 chinook landed by a salmon troller. Any halibut retained must be in compliance with the minimum size limit of 32 inches (81.3 cm). A salmon troller must have 20 chinook on board before retaining a halibut. The Oregon Department of Fish and Wildlife will monitor landings and if they are projected to exceed the 16,068 pound (7.3 mt) preseason allocation, NMFS will take inseason action to close the incidental halibut fishery through a notice published in the **Federal Register**.

D. Possession, Landing, and Special Restrictions by Management Area

If prevented by unsafe weather conditions or mechanical problems from meeting special management area landing restrictions, vessels must notify the U.S. Coast Guard and receive acknowledgement of such notification prior to leaving the area where landing is required. This notification shall include the name of the vessel, port where delivery will be made, approximate amount of salmon (by species) on board, and the estimated time of arrival.

D.1. U.S.-Canada Border to Carroll Island, August/September All-Salmon-Except-Chinook Season-The fishery will follow a cycle of 4 days open and 3 days closed, continuing the cycle until the earliest of September 15 or attainment of the coho quota (see E.1.) or pink harvest guideline. Each vessel may possess, land and deliver no more than 80 coho per open period. Vessels must land and deliver within the area or in adjacent closed areas. All salmon must be landed and delivered within 24 hours of each closure. If the catch exceeds 6.000 coho in the first 4-day cycle, the fishery may be modified inseason to maximize the likelihood that the fishery will continue for at least 3 cycles by either (1) adjusting the landing and possession limit or (2) prohibiting retention of coho. The Fraser River Panel of the Pacific Salmon Commission intends to maintain jurisdiction over the level of ocean commercial harvest of pink salmon north of Carroll Island in 1995 and is expected to set a quota of 160,000 pink salmon for this fishery.

D.2. Sisters Rocks to House Rock in May— The fishery will be open only on the following days through the earlier of May 31 or attainment of the chinook quota (see E.4.): May 1–2, 5–6, 10–11, 14–15, 18–19, 23–24, 27–28 and 31. The Oregon Department of Fish and Wildlife and NMFS may adjust the open/closure cycle through the inseason management process as necessary to manage the fishery. All salmon caught in the area must be landed and delivered in the immediate area ports only (Gold Beach, Brookings, or Port Orford) within 24 hours of each closure. Landing limits may be imposed inseason as required to maintain an orderly fishery.

D.3. Sisters Rocks to Mack Arch in July and August-The fishery will be open only on the following days through the earlier of August 31 or attainment of the chinook quota (see E.5.): July 24-25, 28-29, August 1-2, 5-6, 9-10, 13-14, 17-18, 21-22, 25-26, and 30-31. The Oregon Department of Fish and Wildlife and NMFS may adjust the open/closure cycle through the inseason management process as necessary to manage the fishery. All salmon caught in the area must be landed in the immediate area ports only (Gold Beach, Brookings, or Port Orford) within 24 hours of each closure. Landing limits may be imposed inseason as required to maintain an orderly fishery.

E. Quotas

E.1. North of Cape Falcon—All non-treaty troll and recreational ocean fisheries will be limited by either (a) an overall 0 chinook quota or (b) impacts on critical Washington coastal and Puget Sound natural coho stocks equivalent to the preseason quota of 75,000 coho. The troll fishery will be limited by overall catch quotas of 0 chinook and 18,750 coho. Any transfers between subarea quotas of 5,000 fish or less shall be done on a fishfor-fish basis.

E.2. Florence South Jetty to Cape Arago in August—Limited to a catch quota of 14,000 chinook.

E.3. Cape Arago to Humbug Mountain— Limited by catch quotas of 13,500 chinook for the May/June fishery and 10,000 chinook for the September/October fishery.

E.4. *Sisters Rocks to House Rock*—Limited by a catch quota of 1,000 chinook in May.

E.5. *Sisters Rocks to Mack Arch*—Limited by a catch quota of 1,200 chinook for July and August.
