currencies was essentially unchanged on balance over the intermeeting period, though it was weaker through much of the period.

M2 contracted further in October while M3 expanded at a moderate pace, buoyed by continued rapid growth in large-denomination time deposits. For the year through October, M2 grew at a rate at the bottom of the Committee's range for 1994 and M3 at a rate in the lower half of its range for the year. Total domestic nonfinancial debt has continued to expand at a moderate rate in recent months.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. In furtherance of these objectives, the Committee at its meeting in July reaffirmed the ranges it had established in February for growth of M2 and M3 of 1 to 5 percent and 0 to 4 percent respectively, measured from the fourth quarter of 1993 to the fourth quarter of 1994. The Committee anticipated that developments contributing to unusual velocity increases could persist during the year and that money growth within these ranges would be consistent with its broad policy objectives. The monitoring range for growth of total domestic nonfinancial debt was maintained at 4 to 8 percent for the year. For 1995, the Committee agreed on tentative ranges for monetary growth, measured from the fourth quarter of 1994 to the fourth quarter of 1995, of 1 to 5 percent for M2 and 0 to 4 percent for M3. The Committee provisionally set the associated monitoring range for growth of domestic nonfinancial debt at 3 to 7 percent for 1995. The behavior of the monetary aggregates will continue to be evaluated in the light of progress toward price level stability, movements in their velocities, and developments in the economy and financial markets.

In the implementation of policy for the immediate future, the Committee seeks to increase significantly the existing degree of pressure on reserve positions, taking account of a possible increase in the discount rate. In the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial, and monetary developments, somewhat greater reserve restraint or somewhat lesser reserve restraint would be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with modest growth in M2 and M3 over coming months.

By order of the Federal Open Market Committee, January 4, 1995.
