#### Diphenylamine; Technical Amendment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; technical amendment.

**SUMMARY:** EPA is issuing a technical amendment to a regulation on diphenylamine to change its designation from a "fungicide" to a "plant regulator." EPA is making this technical amendment to better characterize the chemical.

**FOR FURTHER INFORMATION CONTACT:** By mail: James A. Tompkins, Fungicide/Herbicide Branch (7505C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. #### SUPPLEMENTARY INFORMATION:

Diphenylamine is currently registered for use on apples to prevent the appearance of the skin discoloration known as "storage scald." Storage scald is an abiotic disorder not caused by fungus, bacterium, or living agent. The most widely accepted theory is that a substance known as alpha-farnescene is given off by the apple which when combined with oxygen leads to the formation of free radicals resulting in the destruction of cell substance compartmentalization and death of the skin cells. Diphenylamine applied to the skin of the apple acts as an antioxidant to prevent the combination of alpha-farnescene with oxygen. The term "plant regulator" is a better descriptive term than "fungicide" to describe the use of diphenylamine on apples to prevent the appearance of storage scald.
