#### Comment 5

In order to eliminate confusion and uncertainty of the scope, respondent argues that the Department should clarify the language of the scope and explicitly exclude products that are not intended to be part of the investigation. Specifically, respondent argues that the Department exclude unfinished oil country tubular goods and tubing products made in non-pipe sizes. Furthermore, respondent contends that language in the scope concerning "redraw hollows for cold-drawing when used in the production of cold-drawn pipe or tube," is confusing. Respondent suggests the Department revise this language to simply state that the scope excludes hollows for cold-drawing. This would eliminate confusion, while not changing the intended scope of the exclusion.

Petitioner asserts that a modification of the scope to Siderca's requests would be unsupported by substantial evidence on the record. With respect to OCTG, petitioner notes that the scope explicitly excludes OCTG when it is not used or intended for use in one of the listed applications and that no further clarification is necessary. Petitioner states that tubing in "non-pipe" sizes is expressly covered by the scope of the investigation when produced to one of the listed specifications or when used in a listed application. Petitioner maintains that the language in the scope with respect to redraw hollows was included expressly to ensure that hollows are actually cold-drawn and not sold directly as A-106 pipe.

We agree with petitioner for the reasons outlined in the "Scope Issues" section of this notice.

## **Case History**

Since the notice of preliminary determination on January 27, 1995 (60 FR 5351, January 27, 1995), the following events have occurred.

On February 10, 1995, we issued a supplemental questionnaire to respondent Mannesmann S.A. (MSA) and its affiliated Brazilian and U.S. sales organizations, Mannesmann Comercial S.A. (MCSA) and Mannesmann Pipe & Steel Corporation (MPS), respectively (collectively "Mannesmann"), concerning certain items in its December 9, 1994, response, which we deemed required further clarification and/or information prior to verification. On February 28, and March 9, 1995, Mannesmann submitted its responses to this questionnaire, including revised home market and U.S. sales listings.

In response to respondent's request, we postponed the final determination until June 12, 1995, pursuant to section 735(a)(2)(A) of the Act (60 FR 9012, February 16, 1995).

In our notice of preliminary determination we stated that we would solicit further information on various scope-related issues, including class or kind of merchandise. On February 10, 1995, we issued a questionnaire to interested parties to request further information on whether the scope of the investigation constitutes more than one class or kind of merchandise. Responses to this questionnaire were submitted on March 27, 1995.

In March and April, 1995, we conducted verification of Mannesmann's questionnaire responses. Our verification reports were issued in May, 1995.

On April 27, 1995, Koppel Steel Corporation, a U.S. producer of subject merchandise which appeared as an interested party from the outset of this investigation, requested co-petitioner status, which the Department granted.

Case and rebuttal briefs were submitted on May 19, 1995, and May 25, 1995, respectively. In its rebuttal
