significantly, respondents are expected to be forthcoming in their responses to the Department's requests for information. In this case, respondent failed to report fundamental information—cost data relating to one of its plants producing subject merchandise. In other words, respondent withheld information critical to verification and thus BIA is required.

Other Comments

Petitioner and respondent made additional comments on various charges and adjustments contained in MRW's home market and U.S. sales listings. However, since we are basing our final determination on BIA, we consider these comments to be moot.

Continuation of Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, 19 USC 1673b(d)(1), we directed the Customs Service to suspend liquidation of all entries of seamless pipe from Germany, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after January 27, 1995.

Pursuant to the results of this final determination, we will instruct the Customs Service to require a cash deposit or posting of a bond equal to the estimated final dumping margin, as shown below for entries of seamless pipe from Germany that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Margin percent
Mannesmannrohren-Werke AG All Others	58.23 58.23

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. The ITC will make its determination whether these imports materially injure, or threaten injury to, a U.S. industry within 45 days of the publication of this notice. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or canceled. However, if the ITC determines that material injury or threat of material injury does exist, the Department will issue an antidumping duty order.

Notification to Interested Parties

This notice serves as the only reminder to parties subject to administrative protective order (APO) in these investigations of their responsibility covering the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Failure to comply is a violation of the APO.

This determination is published pursuant to section 735(d) of the Act (19 USC 1673(d)) and 19 CFR 353.20.

Dated: June 12, 1995.

Susan G. Esserman.

Assistant Secretary for Import Administration.

Notice of Final Determination of Sales at Less Than Fair Value: Small Diameter Circular Seamless Carbon and Alloy Steel, Standard, Line and Pressure Pipe From Italy

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: June 19, 1995.

FOR FURTHER INFORMATION CONTACT:

Dolores Peck or James Terpstra, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–4929 or 482–3965, respectively.

FINAL DETERMINATION: The Department of Commerce (the Department) determines that small diameter circular seamless carbon and alloy steel, standard, line and pressure pipe (seamless pipe) from Italy is being, or is likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (the "Act") (1994). The estimated weighted-average margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since our negative preliminary determination on January 19, 1995 (60 FR 5358, January 27, 1995), the following events have occurred:

On February 1, 1995, we initiated a sales below cost investigation of the respondent, Dalmine, S.p.A. ("Dalmine"). We instructed Dalmine to respond to the complete cost questionnaire which it had previously used to only report constructed value data. Dalmine submitted its response to

this questionnaire on March 7. Supplemental cost and sales responses and revisions were submitted in February, March, and April 1995.

On February 8, 1995, we postponed the final determination until not later than June 12, 1995 (60 FR 9012, February 16, 1995).

We conducted verifications of Dalmine's sales and cost questionnaire responses in Italy and the United States in March and April 1995. Verification reports were issued in May 1995.

On April 27, 1995, Koppel Steel Corporation, an interested party to this investigation, requested that it be granted co-petitioner status, which the Department granted.

The petitioner and the respondent submitted case briefs on May 18 and rebuttal briefs on May 24, 1995.

On May 22, and May 30, 1995, respectively, the Department returned the respondent's case and rebuttal briefs and instructed the respondent to refile the briefs redacting new information. The respondent did so on May 25, and June 2, 1995.

Scope of the Investigation

The following scope language reflects certain modifications made for purposes of the final determination, where appropriate, as discussed in the "Scope Issues" section below.

The scope of this investigation includes seamless pipes produced to the ASTM A–335, ASTM A–106, ASTM A–53 and API 5L specifications and meeting the physical parameters described below, regardless of application. The scope of this investigation also includes all products used in standard, line, or pressure pipe applications and meeting the physical parameters below, regardless of specification.

For purposes of this investigation, seamless pipes are seamless carbon and alloy (other than stainless) steel pipes, of circular cross-section, not more than 114.3 mm (4.5 inches) in outside diameter, regardless of wall thickness, manufacturing process (hot-finished or cold-drawn), end finish (plain end, bevelled end, upset end, threaded, or threaded and coupled), or surface finish. These pipes are commonly known as standard pipe, line pipe or pressure pipe, depending upon the application. They may also be used in structural applications. Pipes produced in nonstandard wall thicknesses are commonly referred to as tubes.

The seamless pipes subject to these investigations are currently classifiable under subheadings 7304.10.10.20, 7304.10.50.20, 7304.31.60.50, 7304.39.00.16, 7304.39.00.20,
