## OFFICE OF MANAGEMENT AND BUDGET

### National Information Infrastructure; Draft Report on "NII Security: The Federal Role"

**AGENCY:** Office of Management and Budget.

**ACTION:** Notice of Availability and Request for Comments.

**SUMMARY:** The NII Security Issues Forum of the Information Infrastructure Task Force (IITF) has released for public comment a draft report, "NII Security: The Federal Role." Security in the National Information Infrastructure, or NII, consists of the confidentiality, integrity, reliability, and availability of information and communications services. This report is being released in order to develop a consensus of the appropriate Federal role in NII security through a public dialogue. Specifically, this report summarizes the Forum's findings concerning security needs in

the NII; presents an analysis of the institutional, legal, and technical issues surrounding security of the NII; and proposes Federal actions to address these issues.

**DATES:** Comments must be submitted no later than September 18, 1995.

**ADDRESSES:** Electronic copies of the report may be obtained through the IITF bulletin board at iitf.doc.gov through both the Internet and the World-Wide Web. Dial-up access by modem is also available at 202-482-1920. Modem communications parameters should be set at no parity, 8 data bits, and one stop (N, 8, 1). Hard copies of the report may be obtained by contacting the Information Policy and Technology Branch of the Office of Management and Budget at (202) 395-3785. Comments must be submitted to the Office of Management and Budget, NEOB 10236, Washington, DC 20503, to the attention of Virginia Huth, or to huth\_v@a1.eop.gov.

**FOR FURTHER INFORMATION CONTACT:** Virginia Huth, Office of Management and Budget, (202) 395-3785 or huth\_v@a1.eop.gov.

**SUPPLEMENTARY INFORMATION:** To articulate and implement the Administration's vision for the National Information Infrastructure (NII), the Vice President formed the Information Infrastructure Task Force (IITF), chaired by Secretary of Commerce Ron Brown. The NII Security Issues Forum was established within the IITF to address the important cross-cutting issue of security in the NII. In addition to the IITF, the President has established the U.S. Advisory Council on the National Information Infrastructure, which includes representatives from industry, labor, State and local governments, and public interest groups.

Security is critical to the development and operation of a viable National Information Infrastructure. Without the confidence that information will go where and when it is supposed to go, and nowhere else, the NII will not be used to support health, education, commerce, public services, and advanced communications to the fullest extent.

To better understand what will be needed to make the NII adequately secure, the NII Security Issues Forum and members of the U.S. Advisory Council on the NII held seven public meetings with government officials and members of the private and public interest sectors to discuss the security needs of the NII. In order to continue and expand this public dialogue, the draft report, "NII Security: The Federal Role," is being issued for public

comment. Although members of the U.S. Advisory Council cosponsored the meetings and numerous representatives from the private sector participated in the meetings, this draft report is solely the product of the NII Security Issues Forum, a Federal government organization.
