NUCLEAR REGULATORY COMMISSION

10 CFR Part 32

RIN: 3150-AD69

Preparation, Transfer for Commercial Distribution, and Use of Byproduct Material for Medical Use

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule; clarification.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending regulatory text and the response to a public comment contained in a final rule published in the Federal Register on Friday, December 2, 1994, entitled "Preparation, Transfer for Commercial Distribution, and Use of Byproduct Material for Medical Use." This action is necessary following reconsideration by the NRC regarding the requirements for the information to be included on labels for radioactive drugs to be transferred for commercial distribution. The effect of this action is to reduce regulatory burden and uncertainty for licensees that manufacture and distribute radiopharmaceuticals that

contain byproduct material for medical use.

EFFECTIVE DATE: January 1, 1995.

ADDRESSES: Copies of the public record, including the final regulatory analysis and any public comments received on the proposed rule, may be examined and copied for a fee in the Commission's Public Document Room at 2120 L Street, NW. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Telford (301) 415–6229 or Mr. Samuel Z. Jones (301) 415–6198, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

SUPPLEMENTARY INFORMATION:

I. Background

On Friday, December 2, 1994 (59 FR 61767), the NRC published in the Federal Register a final rule regarding 10 CFR Parts 30, 32, and 35 (Preparation, Transfer for Commercial Distribution, and the Use of Byproduct Material for Medical Use). On Thursday, November 17, 1994, the NRC staff received comments on the regulatory guides associated with this rulemaking action during a public meeting with the NRC's Advisory Committee on the Medical Uses of Isotopes (ACMUI). Initially, the NRC staff believed that these comments could be resolved through appropriate regulatory guidance. However, these comments resulted in the NRC staff concluding that the final published requirements in 10 CFR 32.72(a)(4)

(1) Contained an undue burden with regard to the information required to be included on syringe labels; and

(2) Were not clear with regard to what was meant by a "container."

The NRC staff subsequently developed revised regulations to specify the information to be included on each label. In this rulemaking, the NRC is modifying the requirements of 10 CFR 32.72(a)(4) before the published effective date of January 1, 1995. This rulemaking will minimize intrusion into areas related to the practice of medicine in a manner consistent with the Commission's policy as published on February 9, 1979 (44 FR 8242), entitled "Regulation of the Medical Uses of Radioisotopes; Statement of General Policy" and minimize the regulatory burden on licensees. The specific revised requirements and response to the public comment are provided in this document.
