## FEDERAL WILDLAND FIRE POLICIES—Continued

	Current Department of the Interior <sup>1</sup>	Current Forest Service <sup>2</sup>	Proposed Federal
Preparedness	Bureaus will maintain an adequate state of preparedness and adequate resources for wildland fire suppres- sion. Preparedness plans will include considerations for cost-effective train- ing and equipping of suppression forces, maintenance of facilities and equipment, positioning of resources, and criteria for analyzing, prioritizing, and responding to various levels of fire situations.	Plan, train, equip, and make available an organization that ensures cost-ef- ficient wildfire protection in support of land and resource management di- rection as stated in Fire Management Action Plans. Base presuppression planning on the National Fire Man- agement Analysis System.	Agencies will ensure their capability to provide safe, cost-effective fire pro- tection in accordance with land man- agement plans through appropriate planning, staffing, training, and equip- ment.
Suppression	Wildfire losses will be held to the mini- mum possible through timely and ef- fective suppression action consistent with values at risk and within the framework of land-use objectives and plans.	Conduct fire suppression in a timely, ef- fective, and efficient manner with a high regard for public and firefighter safety.	Fires are suppressed at minimum costs, considering benefits and values at risk and consistent with resource objectives.
Administrator & Employee Re- sponsibility.	Wildfires are considered emergencies, and their suppression will be given priority over normal Departmental programs.	Every Forest Service employee has the responsibility to support and participate in wildfire suppression activities as the situation demands.	Employees who are trained and cer- tified will participate in the wildland fire program as the situation de- mands; noncertified employees with operational, administrative, or other skills will support the wildland fire program as needed; and administra- tors will be responsible, accountable, and make employees available.
Protection Prior- ities.	The standard criterion to be used in es- tablishing protection priorities is the potential to destroy: (1) Human Life, (2) Property, and (3) Resource Val- ues. (National Interagency Mobiliza- tion Guide, March 1995, NFES 2092.).	The standard criterion to be used in es- tablishing protection priorities is the potential to destroy: (1) Human Life, (2) Property, and (3) Resource Val- ues. (National Interagency Mobiliza- tion Guide, March 1995, NFES 2092.).	Protection priorities are (1) life and (2) property or natural resources, based on relative values at risk, commensu- rate with suppression costs.
Interagency Co- operation.	Bureaus will coordinate and cooperate with each other and with other pro- tection agencies for greater efficiency and effectiveness.	Develop and implement mutually bene- ficial fire management agreements with other Federal agencies and countries. Cooperate, participate, and consult with the States on fire protec- tion for non-Federal wildlands.	Fire planning, prescription, prepared- ness, suppression, monitoring, and research will be conducted on an interagency basis with the involve- ment of all partners.
Standardization	The National Wildfire Coordinating Group (NWCG) provides a formalized system to agree upon standards of training, equipment, aircraft, suppres- sion priorities, and other operational areas. (Memorandum of Understand- ing, NWCG; II, Function and Pur- pose.).	The National Wildfire Coordinating Group (NWCG) provides a formalized system to agree upon standards of training, equipment, aircraft, suppres- sion priorities, and other operational areas. (Memorandum of Understand- ing, NWCG; II, Function and Pur- pose.).	Agencies will use consistent planning processes, funding mechanisms, training and qualification require- ments, operational procedures, val- ues-at-risk methodologies, and public education programs for all fire man- agement activities.
Wildland/Urban Interface.	Emergency assistance may be pro- vided to properties in the vicinity of public and Indian lands so long as Departmental lands or the public's in- terest is not jeopardized. Bureaus will develop and participate in inter- agency fire prevention cooperatives.	Structural fire suppression, which in- cludes exterior and interior actions on burning structures, is the responsibil- ity of State and local government. Structural fire protection from ad- vancing wildfire within the National Forest protection boundary is the re- sponsibility of State and local fire de- partments and the Forest Service.	The operational role of Federal agen- cies, as a partner in the wildland/ urban interface, is wildland firefight- ing, hazard fuels reduction, coopera- tive prevention and education, and technical assistance. Structural fire protection is the responsibility of State and local governments. Federal agencies may assist with exterior structural suppression activities under formal agreements that state the mu- tual responsibilities of the partners, including funding. (The National Park Service and Bureau of Indian Affairs have full structural protection author- ity for their facilities on their land and may also enter into formal agree- ments to assist State and local gov- ernments with full structural protec- tion.)
