

The following is an example of page 1:

**Advantages:**

Comfortable for continuous wear.

Least bulky of all designs.

Good flotation when inflated.

Most comfortable for use in hot weather.

After inflation, this PFD will support most wearers in a face-up position in the water.

Available in one universal adult size.

**Disadvantages:**

Needs proper rearming and maintenance in order to provide flotation.

Some users may need assistance to properly rearm inflator.

Will not provide flotation without inflation.

**Intended Uses:**

General boating activities by adults.

Inland waters, or where there is a good chance of a fast rescue.

Continuous wear so it's available in an emergency.

Do not wear an inflatable PFD under restrictive clothing, because automatic or accidental manual inflation could restrict breathing or injure you.
