

under review is the alignment of the requirements applicable to foreign vessels engaged in OCS activities with those applicable to U.S. vessels similarly engaged. Also, the Coast Guard is considering regulations for mobile inland drilling units (MIDUs). Under current Coast Guard policy, MIDUs are allowed to operate on the OCS out to a defined boundary line if they meet requirements for lifesaving, firefighting, and operations similar to those for fixed OCS facilities.

Comments are requested on these and other subjects related to safety on the OCS. After review of the comments, the Coast Guard will determine whether to go forward with this project. If the Coast Guard decides to go forward, it will publish an NPRM in a later issue of the **Federal Register** for review and comment by the public.
