

(ii) All openings to the outside must be covered by screening with openings of not more than 1.6 mm or by some other barrier that prevents insects from entering the packinghouse.

(iii) The packinghouse must have double doors at the entrance to the facility and at the interior entrance to the area where the avocados are packed.

(iv) Prior to the culling process, a sample of 250 avocados per shipment must be selected, cut, and inspected by Sanidad Vegetal and found free from pests.

(v) The identity of the avocados must be maintained from field boxes or containers to the shipping boxes so the avocados can be traced back to the orchard in which they were grown if pests are found at the packinghouse or the port of first arrival in the United States.

(vi) The avocados must be packed in clean, new boxes. The boxes must be clearly marked with the identity of the grower, packinghouse, and exporter, and the statement "Distribution limited to the following States: CT, DC, DE, IL, IN, KY, ME, MD, MA, MI, NH, NJ, NY, OH, PA, RI, VA, VT, WV, and WI."

(vii) The boxes must be placed in a refrigerated truck or refrigerated container and remain in that truck or container while in transit through Mexico to the port of first arrival in the United States. Prior to leaving the packinghouse, the truck or container must be secured by Sanidad Vegetal with a seal that will be broken when the truck or container is opened.

(viii) Any avocados that have not been packed or loaded into a refrigerated truck or refrigerated container by the end of the work day must be kept in the screened packing area.

(d) *Certification.* All shipments of avocados must be accompanied by a phytosanitary certificate issued by Sanidad Vegetal certifying that the conditions specified in this section have been met.

(e) *Pest detection.* (1) If any of the avocado seed pests *Heilipus lauri*, *Conotrachelus perseae*, *C. aguacatae*, or *Stenomoma catenifer* are discovered in a municipality during an annual pest survey, orchard survey, packinghouse inspection, or other monitoring or inspection activity in the municipality,

Sanidad Vegetal must immediately initiate an investigation and take measures to isolate and eradicate the pests. Sanidad Vegetal must also provide APHIS with information regarding the circumstances of the infestation and the pest risk mitigation measures taken. The municipality in which the pests are discovered will lose its pest-free certification and avocado exports from that municipality will be suspended until APHIS and Sanidad Vegetal agree that the pest eradication measures taken have been effective and that the pest risk within that municipality have been eliminated.

(2) If Sanidad Vegetal discovers the stem weevil *Copturus aguacatae* in an orchard during an orchard survey or other monitoring or inspection activity in the orchard, Sanidad Vegetal must provide APHIS with information regarding the circumstances of the infestation and the pest risk mitigation measures taken. The orchard in which the pest was found will lose its export certification immediately and will be denied export certification for the entire shipping season of November through February.

(3) If Sanidad Vegetal discovers the stem weevil *Copturus aguacatae* in fruit at a packinghouse, Sanidad Vegetal must investigate the origin of the infested fruit and provide APHIS with information regarding the circumstances of the infestation and the pest risk mitigation measures taken. The orchard where the infested fruit originated will lose its export certification immediately and will be denied export certification for the entire shipping season of November through February.

(f) *Ports.* The avocados may enter the United States at:

(1) Any port located in the northeastern States specified in paragraph (a)(3) of this section;

(2) The ports of Galveston or Houston, TX, or the border ports of Nogales, AZ, or Brownsville, Eagle Pass, El Paso, Hidalgo, or Laredo, TX; or

(3) Other ports within that area of the United States specified in paragraph (g) of this section.

(g) *Shipping areas.* Except as explained below for avocados that enter the United States at Nogales, AZ, avocados moved by truck or rail car may

transit only that area of the United States bounded on the west by a line extending from El Paso, TX, to Denver, CO, and due north from Denver; and on the east and south by a line extending from Brownsville, TX, to Galveston, TX, to Kinder, LA, to Memphis, TN, to Knoxville, TN, following Interstate 40 to Raleigh, NC, and due east from Raleigh. All cities on these boundary lines are included in this area. If the avocados are moved by air, the aircraft may not land outside this area. Avocados that enter the United States at Nogales, AZ, must be moved to El Paso, TX, by the route specified on the permit, and then must remain within the shipping area described above.

(h) *Shipping requirements.* The avocados must be moved through the United States either by air or in a refrigerated truck or refrigerated rail car or in refrigerated containers on a truck or rail car. If the avocados are moved in refrigerated containers on a truck or rail car, an inspector must seal the containers with a serially numbered seal at the port of first arrival in the United States. If the avocados are moved in a refrigerated truck or a refrigerated rail car, an inspector must seal the truck or rail car with a serially numbered seal at the port of first arrival in the United States. If the avocados are transferred to another vehicle or container in the United States, an inspector must be present to supervise the transfer and must apply a new serially numbered seal. The avocados must be moved through the United States under Customs bond.

(i) *Inspection.* The avocados are subject to inspection by an inspector at the port of first arrival, at any stops in the United States en route to the northeastern States, and upon arrival at the terminal market in the northeastern States. At the port of first arrival, an inspector will sample and cut avocados from each shipment to detect pest infestation.

Done in Washington, DC, this 29th day of June 1995.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.
