

Description: To meet many of OSHA's program needs, OSHA is proposed to develop a system to collect occupational injury and illness data from establishments in portions of the private sector. OSHA will collect data from 100,000 employers with 50 or more employees in selected high hazard industries. These data will allow OSHA to calculate occupational injury and illness rates and to focus its efforts on individual workplaces with ongoing serious safety and health problems. Successful implementation of the data collection initiative is critical to OSHA's reinvention efforts and the data

requirements tied to the Government Performance and Results Act (GPRA).
