### NUCLEAR REGULATORY COMMISSION

#### Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of the Office of Management and Budget review of information collection.

**SUMMARY:** The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection:

10 CFR Part 72—Licensing

Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste

3. The form number if applicable: Not applicable.

4. How often the collection is required: Required reports are collected and evaluated on a continuing basis as events occur. Applications for new licenses and amendments may be submitted at any time. Applications for renewal of licenses would be required every 20 years for an Independent Spent Fuel Storage Installation (ISFSI) and every 40 years for a Monitored Retrievable Storage (MRS) facility.

5. Who will be required or asked to report: Vendors of casks for the storage of spent fuel, licensees and applicants for a license to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and the Department of Energy for licenses to receive, transfer, package and possess power reactor spent fuel, high-level waste, and other radioactive materials associated with spent fuel and high-level waste storage in an MRS.

6. An estimate of the number of annual responses: 92

7. An estimate of the total number of hours needed annually to complete the requirement or request: 21,454 (an average of approximately 167 hours per response for applications and reports, plus approximately 756 hours annually per recordkeeper).

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: 10 CFR Part 72 establishes requirements, procedures, and criteria

for the issuance of licenses to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and requirements for the issuance of licenses to the Department of Energy to receive, transfer, package, and possess power reactor spent fuel and high-level radioactive waste, and other associated radioactive materials, in an MRS. The information in the applications, reports and records is used by NRC to make licensing and other regulatory determinations. The revised estimate of burden reflects an increase primarily because of the addition of requirements for decommissioning funding requirements, financial assurance provisions, documentation additions for decommissioning and license termination, and notification of incidents.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, N.W. (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Troy Hillier, Office of Information and Regulatory Affairs (3150-0132), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395-3084.

The NRC Clearance officer is Brenda Jo. Shelton, (301) 415-7233.

Dated at Bethesda, Maryland, this 28th day of June 1995.

For the Nuclear Regulatory Commission.
