SUPPLEMENTARY INFORMATION: HMC has recently submitted a proposal to develop a mining facility to be located just North of the historic Ruby Hill Mine, South of Highway 50, approximately 1.5 miles Northwest of the town of Eureka, Nevada. The project would consist of construction, operation, reclamation, and closure of an open pit mine including waste rock dump, heap leach facilities, mine office/warehouse, truck shop, haul roads, ore stockpiles, access road, diversion ditches, power transmission lines, water supply wells and pipelines, process solution transmission pipelines and a landfill. The project area is located within portions of Township 19 North, Range 53 East MDM, sections 2 to 11, inclusive, 14 to 18, inclusive, and 20-23 inclusive and portions of Township 20 North, Range 53 East sections 28 and 31 to 35, inclusive. Under the proposed action, an estimated total disturbance of 731 acres would occur. The area described includes about 729 acres of public land administered by the BLM, and 2 acres of private land owned by HMC. Project access will be via an improved gravel road from Highway 50. Current estimates call for mining 3,000-4,000 tons of ore and 30,000-40,000 tons of waste rock per day with front end loaders and off-highway haulage trucks.

Potentially significant and significant direct, indirect, cumulative and residual impacts from the proposal will be analyzed in the EIS. Significant issues to be addressed in the EIS include those relating to air quality, cultural resources, and social and economic values. Additional significant issues to be addressed may arise during the scoping process. Federal, state, and local agencies and other individuals or organizations who may be interested in or affected by the BLM's decision on this plan of operation are invited to participate in the scoping process.
