[Announcement 546]

National Physical Activity Program

Introduction

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 1995 funds for the two competitive categories of a one-year grant program for National Physical Activity Program. National organizations which have experience in promoting physical activity are encouraged to apply, as well as those that have not traditionally been active in the physical activity promotion field but are experienced in reaching women, older adults, and/or racial/ethnic minority populations (including African-Americans, Hispanics/Latinos, Asians/Pacific Islanders, and American Indians/Alaska Natives).

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention

objectives of "Healthy People 2000," a PHS-led national activity to reduce morbidity and mortality and improve the quality of life. This announcement is related to the priority area of Physical Activity and Fitness. (To order a copy of "Healthy People 2000," see the section **WHERE TO OBTAIN ADDITIONAL INFORMATION.**)

Authority

This program is authorized under Section 317(k)(2) [42 U.S.C. 247(k)(2)] of the Public Health Service Act, as amended.

Smoke-Free Workplace

PHS strongly encourages all grant recipients to provide a smoke-free workplace and to promote the nonuse of all tobacco products, and Public Law 103-227, the Pro-Children Act of 1994, prohibits smoking in certain facilities that receive Federal funds in which education, library, day care, health care, and early childhood development services are provided to children.

Eligible Applicants

Eligible applicants are national organizations that are public, private, nonprofit, and for-profit or voluntary agencies that have organizational capacities and experience to assist constituencies, their affiliates, and/or other relevant agencies in the promotion of physical activity. National organizations are those that operate at the national level, and have activities or offices in at least ten States or territories. This announcement is limited to national organizations to ensure dissemination of consistent messages and information to all States within a short period of time.

States or their bona fide agents or instrumentalities are not eligible for funding under this program announcement.

A physical activity network currently exists among States for the promotion of physical health activities.

No applications will be accepted from applicants who do not meet the eligibility criteria.

Availability of Funds

Approximately \$700,000 is available in FY 1995 to fund approximately 14 awards in two competitive categories. It is expected that the average award will be \$50,000, ranging from \$20,000 to \$100,000.

1. Approximately \$350,000 will be available to fund national organizations whose mission does not focus on physical activity, but which traditionally serve one or more of the following target populations: women,

older adults, and racial/ethnic minorities.

2. Approximately \$350,000 will be available to fund national organizations experienced in physical activity promotion.

It is expected that the awards will begin on or about September 30, 1995, and will be made for a 12-month budget period within a project period of up to one year. Funding estimates may vary and are subject to change.

Purpose

The purpose of National Physical Activity Program is to mobilize constituencies and establish or enhance partnerships within and among national organizations to actively promote regular, moderate-intensity physical activity.

Program Requirements

Organizations will be required to focus on building or expanding physical activity promotion efforts within their constituencies and in partnership with other national organizations. Activities supported through this program announcement must be directly related to the promotion of regular, moderate-intensity physical activity.

To achieve the purpose of this program, the recipient will be responsible for the following activities:

1. Implement organizational policies and initiatives promoting physical activity within affiliates and/or other organizations serving target populations at the national, State, and local levels.

2. Provide technical advice, training, and assistance, as appropriate.

3. Participate in CDC's national promotion of physical activity.

4. Disseminate programmatic information, and target such information to appropriate recipients.

5. Mobilize constituencies and establish or enhance partnerships to achieve one or more of the following goals:

- Media advocacy through national, State, local, or organizationally-based initiatives;
- Educational interventions which may include education of the public about physical activity recommendations and ways to comply, incentives and competition, community mobilization, etc.
- National, State, and/or local policy initiatives that encourage physical activity, such as encouraging developers building housing projects to include sidewalks, bike/pedestrian paths, and open recreation areas.
- Support planning or implementation of community infrastructure changes which encourage physical activity.
