

## 2. DSI

For service over DSI Delivery facilities, the charge is \$0.404 per kilowatt per month of Billing Demand.

## C. Redispatch Credit/Cost

When BPA implements redispatch procedures pursuant to the Network Integration Service Tariff, the total cost impact of such procedures shall be shared among Network Integration customers based on the ratio of each customer's NT Network Charge Billing Demand to the sum of all NT Network Charge Billing Demands. Such Billing Demands shall be for the month in which the redispatch cost is incurred. Redispatch cost shall be charged on NT customers' monthly bills in a lump sum amount.

To the extent that the cost borne by the NT customer whose resource was redispatched is greater than such customer's cost share (as determined above), a credit shall be given on the affected NT customer's monthly bill. To the extent that the cost borne by the affected NT customer is less than such customer's cost responsibility, the difference shall be charged on the affected NT customer's monthly bill.

*Section III. Billing Factors*

## A. Network Charge

## 1. Billing Demand

The monthly Billing Demand for the charge specified in section II.A. shall be the Customer's Load.

Where "Customer's Load" is the customer's Network Load measured during the hour of the Monthly Transmission Peak Load. For customers with 1981 Contracts, "Customer's Load" is the power taken under 1981 Contracts during the hour of the Monthly Transmission Peak Load. "Monthly Transmission Peak Load" is the monthly peak loading on the FCRTS for the billing month.

"Network Load" is the designated load of a Transmission Customer including the entire load of all designated Member Systems. A Transmission Customer's Network Load shall not be reduced to reflect any portion of such load served by the output of any generating facilities owned, or generation purchased, by the Transmission Customer, its Member Systems, or other customers served by the Transmission Customer under the Network Integration Service Tariff.

The Network Load is the Transmission Customer's actual total system load, including distribution losses. No distinction is made between load that is served with BPA power and load that is served with power from

other sources. To the extent the Transmission Customer is served with resources remote from their system, Network Load shall be measured at specified Points of Delivery.

## 2. Residential Exchange

For RPSA utilities, the Billing Demand shall be the demand calculated by applying the load factor, determined as specified in the RPSA, to the energy associated with the utility's residential load for each billing period. Residential load shall be determined in accordance with the provisions of the purchaser's RPSA.

## 3. Network Billing Demand Adjustment

The Network Charge Billing Demand determined under section III.A.1. shall be decreased by the power delivered under any BPA power sales contract, not including 1981 Contracts and 1996 Contracts, during the hour of the Monthly Transmission Peak Load. Adjustments shall be made for power delivered under contracts executed prior to October 1, 1996, that bundle the price for transmission with the price for power, or specify a transmission rate different than this NT Network rate.

## B. Delivery Charge

The monthly billing demand for the charges specified in section II.B. shall be the Customer's Load that occurs during the hour of the Monthly Transmission Peak Load at the Points of Delivery specified in BPA's Segmentation Study as Utility Delivery or DSI Delivery facilities.

## C. Adjustment for Metering

At those Points of Delivery that do not have meters capable of determining the demand on the hour of the Monthly Transmission Peak Load, the Billing Demand shall equal the highest hourly peak demand during the billing month at the Point of Delivery multiplied by 0.76.

*Section IV. Adjustments and Other Provisions*

## A. Customer Facilities Credit

Monthly bills for the Network Charge specified in section II.A. shall be reduced by a Customer Facilities Credit, if contractually specified. The Customer Facilities Credit is based on the annual cost of customer-owned transmission facilities which would be included in BPA's revenue requirement for the Network segment if BPA owned such customer facilities. The specification of which customer-owned transmission facilities shall be included in the Customer Facilities Credit shall be based on a determination of whether

BPA would be responsible for providing such facilities, in accordance with BPA's Customer Service Policy, if the requesting party were a BPA full requirements power customer. The annual cost of the identified customer-owned transmission facilities shall be based on the customer's costs. The Customer Facilities Credit will be specified as a monthly amount in an exhibit to the contract. The Customer Facilities Credit is not available to Metered and Computed Requirements Customers.

## B. Credit to NT Network Charge Bill

A credit shall be made to the monthly bill for Network Integration Transmission Service for Partial Requirements Customers who purchase transmission service under Integration of Resources (IR) or Formula Power Transmission (FPT) rate schedules. Such credit shall equal the portion of the monthly bill for IR or FPT service to the customer's Network Load.

## C. Credit to Delivery Charges

A credit shall be made to the monthly bill for Network Integration Transmission Service for customers who pay for Utility Delivery or DSI Delivery facilities under the Use-of-Facilities (UFT) rate schedule. The credit shall equal the monthly UFT charges for such Delivery facilities.

## D. Ancillary Services

Ancillary services that may be required to support NT transmission service are available under the APS rate schedule.

## E. Reactive Power Charge

Customers taking service under this rate schedule are subject to the Reactive Power Charge specified in section II.N. of the General Rate Schedule Provisions.

## F. Direct Assignment Facilities

BPA shall collect the capital and related costs of a Direct Assignment Facility under the Advance Funding (AF) rate or the Use-of-Facilities (UFT) rate. Associated costs, including but not limited to operations, maintenance, and general plant costs, also shall be recovered from the Network Integration Transmission customer under an applicable rate schedule.

## G. Rates Applicable to NT Service

The rates specified in section II are applicable to service over available transmission capacity. NT customers that integrate new Network Resources, new Member Systems, or new native load customers that would require BPA to construct Network Upgrades shall be
