(b) **Definitions.** For purposes of this section—

(1) **Intercompany transactions**—(i) *In general.* An intercompany transaction is a transaction between corporations that are members of the same consolidated group immediately after the transaction. S is the member transferring property or

providing services, and B is the member receiving the property or services.

Intercompany transactions include—

(A) S's sale of property (or other transfer, such as an exchange or contribution) to B, whether or not gain or loss is recognized;

(B) S's performance of services for B, and B's payment or accrual of its expenditure for S's performance;

(C) S's licensing of technology, rental of property, or loan of money to B, and B's payment or accrual of its expenditure; and

(D) S's distribution to B with respect to S stock.

(ii) **Time of transaction.** If a transaction occurs in part while S and B are members and in part while they are not members, the transaction is treated as occurring when performance by either S or B takes place, or when payment for performance would be taken into account under the rules of this section if it were an intercompany transaction, whichever is earliest. Appropriate adjustments must be made in such cases by, for example, dividing the transaction into two separate transactions reflecting the extent to which S or B has performed.

(iii) **Separate transactions.** Except as otherwise provided in this section, each transaction is analyzed separately. For example, if S simultaneously sells two properties to B, one at a gain and the other at a loss, each property is treated as sold in a separate transaction. Thus, the gain and loss cannot be offset or netted against each other for purposes of this section. Similarly, each payment or accrual of interest on a loan is a separate transaction. In addition, an accrual of premium is treated as a separate transaction, or as an offset to interest that is not a separate transaction, to the extent required under separate entity treatment. If two members exchange property, each member is S with respect to the property it transfers and B with respect to the property it receives. If two members enter into a notional principal contract, each payment under the contract is a separate transaction and the member making the payment is B with respect to that payment and the member receiving the payment is S. See paragraph (j)(4) of this section for rules aggregating certain transactions.

(2) **Intercompany items**—(i) *In general.* S's income, gain, deduction, and loss from an intercompany transaction are its intercompany items. For example, S's gain from the sale of property to B is intercompany gain. An item is an intercompany item whether it is directly or indirectly from an intercompany transaction.

(ii) **Related costs or expenses.** S's costs or expenses related to an intercompany transaction are included in determining its intercompany items. For example, if S sells inventory to B, S's direct and indirect costs properly includible under section 263A are included in determining its intercompany income. Similarly, related costs or expenses that are not capitalized under S's separate entity method of accounting are included in determining its intercompany items. For example, deductions for employee wages, in addition to other related costs, are included in determining S's intercompany items from performing services for B, and depreciation deductions are included in determining S's intercompany items from renting property to B.

(iii) **Amounts not yet recognized or incurred.** S's intercompany items include amounts from an intercompany transaction that are not yet taken into account under its separate entity method of accounting. For example, if S is a cash method taxpayer, S's intercompany income might be taken into account under this section even if the cash is not yet received. Similarly, an amount reflected in basis (or an amount equivalent to basis) under S's separate entity method of accounting that is a substitute for income, gain, deduction or loss from an intercompany transaction is an intercompany item.

(3) **Corresponding items**—(i) *In general.* B's income, gain, deduction, and loss from an intercompany transaction, or from property acquired in an intercompany transaction, are its corresponding items. For example, if B pays rent to S, B's deduction for the rent is a corresponding deduction. If B buys property from S and sells it to a nonmember, B's gain or loss from the sale to the nonmember is a corresponding gain or loss; alternatively, if B recovers the cost of the property through depreciation, B's depreciation deductions are corresponding deductions. An item is a corresponding item whether it is directly or indirectly from an intercompany transaction (or from property acquired in an intercompany transaction).

(ii) **Disallowed or eliminated amounts.** B's corresponding items include amounts that are permanently disallowed or permanently eliminated, whether directly or indirectly. Thus, corresponding items include amounts disallowed under section 265 (expenses relating to tax-exempt income), and amounts not recognized under section 311(a) (nonrecognition of loss on distributions), section 332
