#### **Availability of Draft Application Format and Content Guidance and Review Plan and Acceptance Criteria for Non-Power Reactors**

The U.S. Nuclear Regulatory Commission (NRC) is in the process of developing for Non-Power Reactors (NPRs) a "Format and Content for Applications for the Licensing of Non-Power Reactors" (F&C) and a "Standard Review Plan and Acceptance Criteria for Applications for the Licensing of Non-Power Reactors" (SRP). The NRC has made available a draft of Chapter 16, "Other License Considerations," of the F&C and SRP documents for comment. Other draft chapters will be made available for comment as they are completed.

Copies of these chapters have been placed in the NRC Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555. Single copies of these documents may be requested in writing from Alexander Adams, Jr., Senior Project Manager, US Nuclear Regulatory Commission, MS: 0-11-B-20, Washington, DC 20555. Comments on this chapter should be sent by October 12, 1995 to the Director, Non-Power Reactors and Decommissioning Project Directorate at the above address.

Dated at Rockville, MD, this July 12, 1995.

For the Nuclear Regulatory Commission.

[Docket No. 50-400]

#### **Carolina Power & Light Co.; Notice of Withdrawal of Application for Amendment to Facility Operating License**

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Carolina Power & Light Company (the licensee) to withdraw its August 20, 1993, application for proposed amendment to Facility Operating License No. NPF-63 for the Shearon Harris Nuclear Power Plant, Unit No. 1, located in New Hill, North Carolina 27562.

The proposed amendment would have revised the TS to allow the repair of degraded steam generator tubes by sleeving as an alternative to removing the tube from service by plugging. The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on September 15, 1993 (58 FR 48378). However, by letter dated July 5, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated August 20, 1993, and the licensee's letter dated July 5, 1995, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and at the local public document room located at the Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Dated at Rockville, Maryland, this 12th day of July 1995.

For the Nuclear Regulatory Commission.

[Docket Nos. 50-424 and 50-425]

#### **Georgia Power Company, et al.; Vogtle Electric Generating Plant, Units 1 and 2; Exemption**

##### **I**

Georgia Power Company, et al. (the licensee) is the holder of Facility Operating License Nos. NPF-68 and NPF-81 for the Vogtle Electric Generating Plant, Units 1 and 2. The licenses provide, among other things, that the licensee is subject to all rules, regulations, and orders of the Commission in effect now and hereafter.

The facility consists of two pressurized water reactors near Waynesboro in Burke County, Georgia.

##### **II**

Title 10 of the Code of Federal Regulations (10 CFR) 73.55, "Requirements for Physical Protection of Licensed Activities in Nuclear Power Reactors Against Radiological Sabotage," paragraph (a), in part, states that "The licensee shall establish and maintain an onsite physical protection system and security organization which will have as its objective to provide high assurance that activities involving special nuclear material are not inimical to the common defense and security and do not constitute an unreasonable risk to the public health and safety."

Section 73.55(d), "Access Requirements," paragraph (1), specifies that "The licensee shall control all points of personnel and vehicle access into a protected area." Section 73.55(d)(5) requires that "A numbered picture badge identification system shall be used for all individuals who are authorized access to protected areas without escort." Section 73.55(d)(5) also states that an individual not employed by the licensee (i.e., contractors) may be authorized access to protected areas without escort provided the individual "receives a picture badge upon entrance into the protected area which must be returned upon exit from the protected area \* \* \*"

The licensee has proposed to implement an alternative unescorted access control system that would eliminate the need to issue and retrieve badges at each entrance/exit location and would allow all individuals with unescorted access to keep their badges when departing the site.

An exemption from 10 CFR 73.55(d)(5) is required to allow contractors who have unescorted access to take their badges offsite instead of returning them when exiting the site. By letter dated February 14, 1995, the licensee requested an exemption from the requirements of 10 CFR 73.55(d)(5) for this purpose.

##### **III**

Pursuant to 10 CFR 73.5, "Specific exemptions," the Commission may, upon application of any interested person or upon its own initiative, grant such exemptions in this part as it determines are authorized by law and will not endanger life or property or the common defense and security, and are otherwise in the public interest. Pursuant to 10 CFR 73.55, the Commission may authorize a licensee to provide alternative measures for
