particular television or radio broadcast station or cable television system. The FY 1995 cost allocation for this category is \$1,500,000, resulting from the mandatory adjustment to its FY 1994 revenue requirement under the statutory fee schedule. Payment units are estimated to be 50,000 licenses. Dividing the category's revenue requirement by its estimated payment units results in a fee of \$30 per license. See Appendix E. Thus, we are proposing that licensees of commercial auxiliary stations be assessed a \$30 annual regulatory fee for FY 1995 on a per call sign basis. We are proposing no change to the rules for calculating or submitting regulatory fee payments by licensees of facilities in this service category. See FY 1994 Report, Appendix B at para. 28.

# k. International HF Broadcast (Short Wave)

39. This category covers international broadcast stations licensed under Part 73 to operate on a frequency in the 5,950 Khz to 26,100 Khz range to provide service to the general public in foreign countries. The proposed fees for International HF Broadcast are set forth in the International Service category in the FY 1995 fee schedule. For FY 1995, the cost allocation for the category is \$4,560, resulting from the mandatory adjustment to its FY 1994 revenue requirement under the statutory fee schedule. Payment units are estimated to be 19 licenses. Dividing the category's revenue requirements by its estimated payment units results in a fee of \$240 per license. See Appendix E. Thus, for FY 1995, we are proposing to assess an annual regulatory fee of \$240 per station license. We are proposing no change to the rules for calculating and submitting fees by licensees of facilities in this service category. See FY 1994 Order, Appendix B at para. 29.

### 3. Cable Services

## a. Cable Television Systems

40. This category includes operators of cable television systems, as the term is defined in Section 76.5 of our rules, providing or distributing programming or other services to subscribers under Part 76 of our Rules. For FY 1995, the cost allocation for cable television systems is \$29,070,000, resulting from the mandatory adjustment to the category's FY 1994 revenue requirement under the statutory fee schedule. Estimated payment units are 57,000,000 subscribers. Dividing the categories cost allocation by its estimated payment units results in a fee of \$.51 per subscriber. See Appendix F. Therefore,

we are proposing a fee of \$.51 per cable television subscriber. 16

41. Payments for cable systems are to be made on a per subscriber by community unit basis as of December 31, 1994 as reported on each cable system's 1994 Annual report of Cable Systems (FCC Form 325). As in FY 1994, cable systems should determine their subscriber numbers by calculating the number of single family dwellings, the number of individual households in multiple dwelling units, e.g., apartments, condominiums mobile home parks, etc., paying at the basic subscirber rate, the number of bulk rate customers and the number of courtesy or fee customers. In order to determine the number of bulk rate subscribers, a system should divide its bulk rate charge by the annual subscription rate for individuals households. We are proposing no change in the rules for calculating or submitting regulatory fees by cable system operators. See FY 1994 Order, Appendix B at para. 31.

## b. Cable Antenna Relay Service

42. This category includes cable television relay service (CARS) stations used to transmit television and related audio signals, signals of AM and FM broadcast stations and cablecasting from the point of reception to a terminal point from where the signals are distributed to the public by a cable television system. For FY 1995, the cost allocation for CARS is \$635,010, resulting from the mandatory adjustment to its FY 1994 revenue requirement based upon the statutory fee schedule. Payment units are estimated to be 2,082 licenses. Dividing the revenue requirement for CARS by its estimated payment units results in a fee of \$305 per license. See Appendix F. Thus, for FY 1995, we are proposing to assess a \$305 regulatory fee per CARS license. We are proposing no change to the rules for calculating and submitting regulatory fees by CARS licensees.

## 4. Common Carrier Services

#### a. Mobile Services

43. Public Mobile/Cellular Radio Services, set forth in the FY 1995 fee schedule within the wireless radio service category, include common carriers and others (e.g., cellular radio licensees) offering, under Parts 22 and 24, a wide variety of land-based or airto-ground mobile telephone, paging or data transmission services to the public.

Licensees include those using radio to provide telephone services at fixed locations, such as Basic Exchange Telecommunications Radio Services, Rural Radio and Offshore Radio. For FY 1994, we required a fee payment on a subscriber basis pursuant to the statutory requirement to charge a per subscriber fee. See 47 U.S.C. § 159(g).

44. We recognize that the statutory language permitted a licensee to submit a single per subscriber fee for an entity subscribing to its service no matter how many actual units of communication services that subscriber obtained from the licensee. Nevertheless, we believe that a more equitable payment formulation would require each licensee to submit a fee based upon the total number of telephone numbers or call signs that it provides to customers so that its fee payment would better reflect the benefit that the licensee receives from its use of frequencies of communications. Therefore, for FY 1995, we propose to exercise our authority to make permitted amendments to the fee schedule to propose that each licensee in the Public Mobile/Cellular Radio Services pay an annual regulatory fee for each mobile or cellular unit (mobile or cellular call sign or telephone number), including paging units, assigned to its customers, including resellers of its services. For FY 1995, the service category's cost allocation is \$4,420,000, resulting from the mandatory adjustment to its FY 1994 revenue requirement under the statutory fee schedule. Payment units under our proposed formulation are estimated to be 34,000,000 subscribers. Dividing the category's cost allocation by its estimated subscribers results in a regulatory fee of \$.13 per payment unit. See Appendix G. Thus, we are proposing a fee of \$.13 per subscriber. With the exception of extending the regulatory fee to all units provided by licensees in this service category, we are proposing no change to the rules for payment of fees by licensees in the Public Mobile/Cellular Radio Services. See FY 1994 Order, Appendix B at para. 31.17

#### b. Fixed Radio Services

45. Domestic Public Fixed Radio Service includes stations authorized under Part 21 of the Commission's Rules to use microwave frequencies for video and data distribution within the United States. This category includes licensees

<sup>16</sup> Consistent with our earlier interpretation of Congressional intent, we propose to require payment of the cable system regulatory fees on a per subscriber basis rather than per 1,000 subscribers as set forth in the statutory fee schedule. See FY 1994 Order at para. 100.

<sup>&</sup>lt;sup>17</sup> As noted above, we are proposing no regulatory fee for Personal Communications Services (PCS) and Commercial Mobile Radio Services (CMRS) for FY 1995 because no facilities were authorized for PCS and CMRS by our proposed date for calculating fees, October 1, 1994.
