

(definitions for the terms "lanyard", "lifeline" and "safety belt", respectively), insofar as those provisions relate to steel erection. Through this amendment, OSHA will maintain the existing fall protection requirements for steel erection activities pending rulemaking that addresses the steel erection industry.

B. Scope and Application—Subpart M

OSHA is amending § 1926.500(a), Scope and application, of subpart M to indicate clearly that the provisions of revised §§ 1926.501, Duty to have fall protection; 1926.502, Fall protection systems criteria and practices; and 1926.503, Training requirements, do not apply to steel erection activities. The revised provision clearly indicates that subpart R and specified provisions of subpart E cover steel erection.

Exemption From Delayed Effective Date Requirement

Under 5 U.S.C. 553, OSHA finds that there is good cause for making this amendment effective upon publication in the **Federal Register**. This amendment simply maintains the fall protection requirements which have applied to the steel erection industry, notwithstanding the promulgation of subpart M, Fall protection, so it does not increase the existing regulatory burden.
