

Administrator hereby enters his final order based upon the investigative file.

By letter dated July 27, 1992, the Missouri Department of Health denied Respondent's application for a Missouri Controlled Substances Registration effective June 24, 1992. The Missouri Department of Health's decision was based on the following: (1) Respondent's inability to accept responsibility for diverting Demerol (a Schedule II controlled substance) for personal use and abuse; and (2) Respondent's having provided false or misleading information on his application by failing to disclose the revocation of his Mississippi Veterinary License in September of 1976.

The DEA has consistently held that it does not have statutory authority under the Controlled Substances Act to register a practitioner unless that practitioner is authorized to dispense controlled substances by the state in which he proposes to practice. See *Lawrence R. Alexander, M.D.*, 57 FR 22256 (1992); *Bobby Watts, M.D.*, 53 FR 11919 (1988); *Robert F. Witek, D.D.S.*, 52 FR 4770 (1987). Because Respondent is not authorized to handle controlled substances in the State of Missouri, the Deputy Administrator cannot permit him to obtain a DEA Certificate of Registration in that state.

Accordingly, the Deputy Administrator of the Drug Enforcement Administration, pursuant to 21 U.S.C. 823 and 824 and 28 CFR 0.100(b) and 0.104, hereby orders that any pending applications for a DEA Certificate of Registration as a practitioner on behalf of Jonathan L. Wilson, be, and they hereby are denied. This order is effective September 1, 1995.

Dated: July 27, 1995.

Stephen H. Greene,

Deputy Administrator.

Estimated Time Per Respondent: .15 hours.

Total Burden Hours: 8,250.

Description: The information collected in this supplement will be used to determine the size and nature of the population affected by job displacement and, hence, the needs and scope of the Job Training Partnership Act Programs (or subsequent consolidated programs serving adult displaced workers). The information collected also will be used to assess employment stability by determining the length of time workers have been with their current employer and estimating the incidence of occupational change over the course of a year. In addition, data on job tenure for all workers are needed to calculate displacement rates among various worker groups so that comparison can be made over time and among different affected groups. Combining the questions on displacement, tenure, and occupational change will enable analysts to obtain a more complete picture of employment stability.

Theresa M. O'Malley,

Acting Departmental Clearance Officer.
