General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage

Determinations Issued Under the Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487-4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 512-1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 28th day of July 1995.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-445 and 50-446]

Texas Utilities Electric Company; Comanche Peak Steam Electric Station, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. NPF-87 and NPF-89, issued to Texas Utilities Electric Company (TU Electric, the licensee), for operation of the Comanche Peak Steam Electric Station (CPSES), Units 1 and 2, located in Somervell County, Texas.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would consist of revisions to 10 CFR part 20 references to recognize the new section numbers, revise definitions to ensure

consistency with 10 CFR part 20, and change administrative controls for reporting and recordkeeping to maintain compliance with the new 10 CFR part 20. The changes would revise the limitations on concentrations of radioactive material released in liquid effluents and the limitations on the dose rate resulting from radioactive material released in gaseous effluents and reflect the relocation of the prior 10 CFR 20.106 requirements to the new 10 CFR 20.1302. These changes are in response to the licensee's application for amendment dated August 12, 1994, implementing the new 10 CFR part 20.

The Need for the Proposed Action

The proposed action is needed in order to retain operational flexibility consistent with 10 CFR part 50, appendix I, concurrent with the implementation of the revised 10 CFR part 20.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed action, in regard to the actual release rates as referenced in the Technical Specifications as a dose rate to the maximally exposed member of the public, and concludes that the change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.
