

Background

The FAA continues to receive reports of replacement parts being offered for sales as aircraft quality and where the origin of the parts are unknown or questionable. Such parts may be advertised or presented as "unused," "like new," or "remanufactured." Purchasers of these parts may not be aware of the potential hazards involved with replacement parts for which acceptability for installation on a type-certificated product has not been established. In determining whether installation of a part conforms with all applicable regulations, the installer can establish that the part was manufactured under a production approval pursuant to part 21 of the Federal Aviation Regulations (FAR), that an originally acceptable part has been maintained in accordance with part 43 of the FAR, or that the part is otherwise acceptable for installation, e.g., has been found to conform to data approved by the FAA. This AC would address means to help the installer make the required determinations.

Issued in Washington, D.C., on July 31, 1995.

William J. White,

Deputy Director, Flight Standards Service.
