7304.20.40.20, 7304.20.40.30, 7304.20.40.40, 7304.20.40.50, 7304.20.40.60, 7304.20.40.80, 7304.20.50.15, 7304.20.50.30, 7304.20.50.45, 7304.20.50.60, 7304.20.50.75, 7304.20.60.15, 7304.20.60.30, 7304.20.60.45, 7304.20.60.60, 7304.20.60.75, 7305.20.20.00, 7305.20.40.00, 7305.20.60.00, 7305.20.80.00, 7306.20.10.30, 7306.20.10.90, 7306.20.40.00, 7306.20.30.00, 7306.20.40.00, 7306.20.80.10, 7306.20.60.50, 7306.20.80.10, and 7306.20.80.50.

Drill pipe is classifiable under *HTSUS* item numbers 7304.20.70.00, 7304.20.80.30, 7304.20.80.45, and 7304.20.80.60. However, pursuant to the ITC's negative determination regarding drill pipe, we have deleted these numbers from the scope of this order.

Although the *HTSUS* subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

## **Countervailing Duty Order**

In accordance with section 705(a) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1671(a)), on June 19, 1995, the Department made its final determination that producers or exporters of OCTG in Italy receive benefits which constitute subsidies within the meaning of the countervailing duty law (60 FR 33577, June 28, 1995). On August 3, 1995, in accordance with section 705(d) of the Act, the U.S. International Trade Commission (ITC) notified the Department that imports of OCTG from Italy materially injure a U.S. industry. Therefore, in accordance with sections 706 and 751 of the Act (19 U.S.C. sections 1671e and 1675), the Department hereby directs United States Customs officers to assess, upon further advice by the administering authority pursuant to sections 706(a)(1) and 751 of the Act, countervailing duties equal to the amount of the estimated net subsidy on all entries of OCTG from Italy. These countervailing duties will be assessed on all unliquidated entries of OCTG from Italy entered, or withdrawn from warehouse, for consumption on or after December 2, 1994, the date on which the Department published its preliminary determination notice in the Federal Register (59 FR 61870), and before April 1, 1995, the date on which we instructed the U.S. Customs Service to discontinue the suspension of liquidation, and all entries and withdrawals for consumption made on or after the date of publication of this order in the

**Federal Register**. Entries of OCTG made on or after April 1, 1995, and prior to the date of publication of this order in the **Federal Register** are not subject to the assessment of countervailing duties since we cannot suspend liquidation of the subject merchandise, begun on December 2, 1994, for more than 120 days without the issuance of a final affirmative ITC injury determination.

On or after the date of publication of this notice in the **Federal Register**, U.S. Customs officers must require, at the same time as importers would normally deposit estimated duties of this merchandise, the following cash deposit for OCTG from Italy.

## OCTG

Country-Wide *Ad Valorem* Rate 1.47 Percent.

This notice constitutes the countervailing duty order with respect to OCTG from Italy, pursuant to section 706 of the Act. Interested parties may contact the Central Records Unit, Room B–099 of the Main Commerce Building, for copies of an updated list of countervailing duty orders currently in effect. This order is published in accordance with section 706 of the Act and 19 CFR 355.21.

Dated: August 4, 1995.

## Susan G. Esserman.

Assistant Secretary for Import Administration. [FR Doc. 95–19817 Filed 8–9–95; 8:45 am] BILLING CODE 3510–DS–P

## Applications for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C.

*Docket Number:* 94–154R. *Applicant:* University of Hawaii, School of Ocean and Earth Science and Technology, Department of Geology & Geophysics, 2525 Correa Road, Honolulu, HI 96822. Instrument: ICP Mass Spectrometer, Model PlasmaQuad. Manufacturer: Fisons Instruments, United Kingdom. Intended Use: Original notice of this resubmitted application was published in the FEDERAL REGISTER of January 26, 1995.

Docket Number: 95–060. Applicant: University of California, Santa Cruz, Earth Sciences Department, 1156 High Street, Santa Cruz, CA 95064. Instrument: 5 ea. Seismograph, Model STS-2. Manufacturer: G. Streckeisen, Switzerland. Intended Use: The instrument will be used to record earthquakes all over the world for study to improve the understanding of the source process of earthquakes. In addition, the instrument will be used to study the nature of the deep extension of the San Andreas Fault in California. Application Accepted by Commissioner of Customs: July 14, 1995.

Docket Number: 95–061. Applicant: University of Southern California, 1540 Alcazar, Bldg. CHP 155, Los Angeles, CA 90033. Instrument: 3-Dimensional Motion Analyser, Model Vicon System 370. Manufacturer: Oxford Metrics, Ltd., United Kingdom. Intended Use: The instrument will be used for the study of the walking patterns of human subjects in order to understand the biomechanics of the human gait, particularly as this applies to the treatment of rehabilitation patients. Application Accepted by Commissioner of Customs: July 18, 1995.

Docket Number: 95–062. Applicant: Carnegie Mellon University, 4400 Fifth Avenue, Pittsburgh, PA 15213. Instrument: Electron Microscope, Model H-7100. Manufacturer: Nissei Sangyo, Japan. Intended Use: The instrument will be used in research projects aimed at an understanding of fundamental cell, developmental, neurobiological, and physiological processes. Specific projects will include: (1) correlated electron microscopic and light optical studies; (2) high resolution immunolocalization studies; (3) ultrastructural analysis of mutant visual systems in Drosophila, and of tissues in transgenic mice; (4) determination of the subcellular distribution of mRNAs by electron microscopic in situ hybridization; and (5) structural studies of the motor protein kinesin, including conformational changes in the protein under varying ionic conditions and kinesin-microtubule interactions. In addition, the instrument will be used in the course Techniques in Electron Microscopy to teach basic methods in transmission electron microscopy to graduate students and advanced undergraduate students.
