on the perpetual subordinated debt do not otherwise affect the allocation of income between the partners. FP has the right to require the liquidation of FX if FX fails to make an interest payment. For U.S. tax purposes, the perpetual subordinated debt is treated as a partnership interest in FX and the payments on the perpetual subordinated debt constitute guaranteed payments within the meaning of section 707(c). On July 1, 1996, FX makes a loan of \$10,000,000 to DS in exchange for a 7-year note paying interest at 8 percent per annum.

(ii) Because FP has the effective right to force payment of the "interest" on the perpetual subordinated debt, the instrument constitutes a financing transaction within the meaning of paragraph (a)(2)(ii)(A)(2) of this section. Moreover, because the note between FX and DS is a financing transaction within the meaning of paragraph (a)(2)(ii)(A)(1) of this section, together the transactions are a financing arrangement within the meaning of (a)(2)(i) of this section. Without regard to this section, 90 percent of each interest payment received by FX would be treated as exempt from U.S. withholding tax because it is beneficially owned by G, while 10 percent would be subject to a 30 percent withholding tax because beneficially owned by FP. If FP held directly the note issued by DS, 100 percent of the interest payments on the note would have been subject to the 30 percent withholding tax. The significant reduction in the tax imposed by section 881 resulting from the participation of FX in the financing arrangement is evidence that the participation of FX in the financing arrangement is pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account.

Example 16. Time period between transactions. (i) On January 1, 1995, FP lends \$10,000,000 to FS in exchange for a 10-year note that pays no interest annually. When the note matures, FS is obligated to pay \$24,000,000 to FP. On January 1, 1996, FS lends \$10,000,000 to DS in exchange for a 10-year note that pays interest annually at a rate of 10 percent per annum.

(ii) The FS note held by FP and the DS note held by FS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(1) of this section and together constitute a financing arrangement within the meaning of (a)(2)(i) of this section. Pursuant to paragraph (b)(2)(iii) of this section. Pursuant to paragraph (b)(2)(iii) of this section, the short period of time (twelve months) between the loan by FP to FS and the loan by FS to DS is evidence that the participation of FS in the financing arrangement is pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account.

Example 17. Financing transactions in the ordinary course of business. (i) FP is a holding company. FS is actively engaged in country T in the business of manufacturing and selling product A. DS manufactures product B, a principal component in which is product A. FS' business activity is substantial. On January 1, 1995, FP lends \$100,000,000 to FS to finance FS' business operations. On January 1, 1996, FS ships \$30,000,000 of product A to DS. In return, FS

creates an interest-bearing account receivable on its books. FS' shipment is in the ordinary course of the active conduct of its trade or business (which is complementary to DS' trade or business.)

(ii) The loan from FP to FS and the accounts receivable opened by FS for a payment owed by DS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(1) of this section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. Pursuant to paragraph (b)(2)(iv) of this section, the fact that DS' liability to FS is created in the ordinary course of the active conduct of DS' trade or business that is complementary to a business actively engaged in by DS is evidence that the participation of FS in the financing arrangement is not pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account.

Example 18. Tax avoidance plan—other factors. (i) On February 1, 1995, FP issues debt in Country N that is in registered form within the meaning of section 881(c)(3)(A). The FP debt would satisfy the requirements of section 881(c) if the debt were issued by a U.S. person and the withholding agent received the certification required by section 871(h)(2)(B)(ii). The purchasers of the debt are financial institutions and there is no reason to believe that they would not furnish Forms W–8. On March 1, 1995, FP lends a portion of the proceeds of the offering to DS.

(ii) The FP debt and the loan to DS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(1) of this section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. The owners of the FP debt are the financing entities, FP is the intermediate entity and DS is the financed entity. Interest payments on the debt issued by FP would be subject to withholding tax if the debt were issued by DS, unless DS received all necessary Forms W-8. Therefore, the participation of FP in the financing arrangement potentially reduces the tax imposed by section 881(a). However, because it is reasonable to assume that the purchasers of the FP debt would have provided certifications in order to avoid the withholding tax imposed by section 881, there is not a tax avoidance plan. Accordingly, FP is not a conduit entity.

Example 19. Tax avoidance plan—other factors. (i) Over a period of years, FP has maintained a deposit with BK, a bank organized in the United States, that is unrelated to FP and its subsidiaries. FP often sells goods and purchases raw materials in the United States. FP opened the bank account with BK in order to facilitate this business and the amounts it maintains in the account are reasonably related to its dollar-denominated working capital needs. On January 1, 1995, BK lends \$5,000,000 to DS. After the loan is made, the balance in FP's bank account remains within a range appropriate to meet FP's working capital needs.

(ii) FP's deposit with BK and BK's loan to DS are financing transactions within the meaning of paragraph (a)(2)(ii)(A)(1) of this

section and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. Pursuant to section 881(i), interest paid by BK to FP with respect to the bank deposit is exempt from withholding tax. Interest paid directly by DS to FP would not be exempt from withholding tax under section 881(i) and therefore would be subject to a 30% withholding tax Accordingly, there is a significant reduction in the tax imposed by section 881, which is evidence of the existence of a tax avoidance plan. See paragraph (b)(2)(i) of this section. However, the district director also will consider the fact that FP historically has maintained an account with BK to meet its working capital needs and that, prior to and after BK's loan to DS, the balance within the account remains within a range appropriate to meet those business needs as evidence that the participation of BK in the FP-BK-DS financing arrangement is not pursuant to a tax avoidance plan. In determining the presence or absence of a tax avoidance plan, all relevant facts will be taken into account.

Example 20. Tax avoidance plan—other factors. (i) Assume the same facts as in Example 19, except that on January 1, 2000, FP's deposit with BK substantially exceeds FP's expected working capital needs and on January 2, 2000, BK lends additional funds to DS. Assume also that BK's loan to DS provides BK with a right of offset against FP's deposit. Finally, assume that FP would have lent the funds to DS directly but for the imposition of the withholding tax on payments made directly to FP by DS.

(ii) As in Example 19, the transactions in paragraph (i) of this Example 20 are a financing arrangement within the meaning of paragraph (a)(2)(i) and the participation of the BK reduces the section 881 tax. In this case, the presence of funds substantially in excess of FP's working capital needs and the fact that FP would have been willing to lend funds directly to DS if not for the withholding tax are evidence that the participation of BK in the FP-BK-FS financing arrangement is pursuant to a tax avoidance plan. However, other facts relevant to the presence of such a plan must also be taken into account. Even if the district director determines that the participation of BK in the financing arrangement is pursuant to a tax avoidance plan, BK may not be treated as a conduit entity unless BK would not have participated in the financing arrangement on substantially the same terms in the absence of FP's deposit with BK. BK's right of offset against FP's deposit (a form of guarantee of BK's loan to DS) creates a presumption that BK would not have made the loan to DS on substantially the same terms in the absence of FP's deposit with BK. If the taxpayer overcomes the presumption by clear and convincing evidence, BK will not be a conduit entity.

Example 21. Significant financing activities. (i) FS is responsible for coordinating the financing of all of the subsidiaries of FP, which are engaged in substantial trades or businesses and are located in country T, country N, and the United States. FS maintains a centralized cash management accounting system for FP and its subsidiaries in which it records all
