700 meters. Bottom sediments in both areas are generally soft, consisting of silty clays. Exploration and development activities in these areas require precautions commensurate with the potential hazards.

(g) Archaeological Resources. Bidders are advised that a Final Rule regarding archaeological resources was published in the Federal Register on October 21, 1994 (59 FR 53091), granting specific authority to each MMS Regional Director to require archaeological surveys and reports (under 30 CFR 250, 256, 260, and 281) and the submission of these reports to the Regional Director prior to exploration, development and production, or installation of lease-term or right-of-way pipelines. MMS Notice to Lessees (NTL) 91-02 (Outer Continental Shelf Archaeological Resources Requirements for the Gulf of Mexico OCS Region) published in the Federal Register on December 20, 1991 (50 FR 66076) effective February 17, 1992, specifies survey methodology, linespacing, and archaeological report writing requirements for lessees and operators in the Gulf of Mexico Region.

Two additional documents are available from the MMS Gulf of Mexico Region Public Information Office (see

paragraph 14(a)):

"List of Lease Blocks Within the High-Probability Area for Historic Period Shipwrecks on the OCS" dated January 30, 1995. This list supersedes the list promulgated by the MMS Letter to Lessees (LTL) of November 30, 1990.

"List of Lease Blocks Within the High-Probability Area for Prehistoric Archaeological Resources on the OCS" dated January 30, 1995.

Implementation of this Final Rule and NTL 91–02 obviates the need for the Protection of Archaeological Resources Stipulation required for previous issues.

(h) Proposed Rigs to Reefs. Bidders are advised that there are OCS artificial reef sites and planning sites for the Gulf of Mexico. These are generally located in water depths of less than 200 meters. While all existing and proposed sites require a permit from the U.S. Army Corps of Engineers, this "Rigs to Reefs" program is implemented through State sponsorship through the following State Coordinators:

Alabama Mr. Walter M. Tatum, (334) 968–7578

Louisiana Mr. Rick Kasprzak, (504) 765–2375

Mississippi Mr. Mike Buchanan, (601) 385–5860

Texas Ms. Jan Coulbertson, (713) 474–2811

For more information, on artificial reef sites, prospective bidders should

contact the above listed State Artificial Reef Coordinators for their areas of interest.

- (i) Proposed Lightering Zones. Bidders are advised that the U.S. Coast Guard has proposed designating certain areas of the Gulf of Mexico (60 FR 1958 of January 5, 1995), as lightering zones for the purpose of permitting single hull vessels to off-load oil within the U.S. Exclusive Economic Zone. Such designation may have implications for oil and gas operations in the areas. Additional information may be obtained from Lieutenant Commander Stephen Kantz, Project Manager, Oil Pollution Act (OPA 90) Staff, at (202) 267–6740.
- (i) Statement Regarding Certain Geophysical Data. Pursuant to Sections 18 and 26 of the OCS Lands Act, as amended, and the regulations issued thereunder, MMS has a right of access to certain geophysical data and information obtained or developed as a result of operations on the OCS. MMS is sensitive to the concerns expressed by industry regarding the confidentiality of individual company work products and client lists and the potential burden of responding to a myriad of requests from MMS pertaining to the existence and availability of these types of reprocessed geophysical data. To resolve the concerns of both industry and MMS with respect to such cases, MMS has worked with industry to develop the requirements contained within paragraph 3(b) Method of Bidding above. These requirements are being imposed on a trial basis to determine their effectiveness and are subject to modification in future sales.

The details of this requirement are specified in the document "Trial Procedures for Access to Certain Geophysical Data in the Gulf of Mexico," which is provided in the Sale Notice package and which is available upon request from the MMS Gulf of Mexico Region Public Information Office (see paragraph 14(a)). In brief, these requirements include:

- 1. In the period for ninety (90) days after the sale, bidders will allow MMS to inspect such data within seven (7) days of a written request from MMS, and upon further written request will transmit to MMS, within ten (10) working days, such data. After this ninety day period, a response time of thirty (30) days following an MMS written request will be considered adequate.
- 2. Successful bidders must retain such data for three (3) years after the sale, and unsuccessful bidders must retain such data for six (6) months after the sale, for possible acquisition by MMS.

For the six (6) month period after the sale, based on a review of the allowable cost of data reproduction to MMS for three-dimensional and two-dimensional data sets, the company providing the reprocessed data will be reimbursed at a rate of \$480 per block or part thereof for three-dimensional data and \$2 per line mile for two-dimensional data. Afterwards, reimbursement will be subject to the terms and conditions of 30 CFR 251.13(a).

All geophysical data and information obtained and reviewed by MMS pursuant to these procedures shall be held in the strictest confidence and treated as proprietary in accordance with the applicable terms of 30 CFR 251.14.

For additional information, contact the MMS Gulf of Mexico Regional Office of Resource Evaluation at (504) 736– 2720.

- (k) Information about Indicated Hydrocarbons. Bidders are advised that MMS makes available, about 3 months prior to a lease sale, a list of unleased tracts having well bores with indicated hydrocarbons. Basic information relating to production, well bores, and pay range for each tract is included in the list. The list is available from the Public Information Unit, Minerals Management Service, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394; telephone (800) 200–GULF or (504) 736–2519.
- (1) Minimizing Oil and Gas Structures Near the Flower Garden Banks. Bidders are reminded of Notice to Lessees and Operators (NTL) 85-8, "Minimizing Oil and Gas Structures in the Gulf of Mexico," dated November 26, 1985. Section II of the NTL sets forth the MMS' policy with regard to the minimization of structures for drilling, development, and production on OCS leases. The policy requires that such structures including lease-term pipelines be placed in a manner that causes minimum interference with other significant uses of the OCS. Please be advised that the MMS will strictly adhere to this policy when reviewing **Exploration Plans and Development Operations Coordination Documents** which propose the use or installation of such structures within the "Four-Mile Zone" and adjacent areas surrounding
