and an agency basis. Banc One may also act as the lead underwriter for a syndicate of securities underwriters.

Certificateholders are entitled to receive monthly, quarterly or semi-annual installments of principal and/or interest or lease payments due on the receivables, adjusted, in the case of payments of interest, to a specified rate—the pass-through rate—which may be fixed or variable.

5. Some of the certificates will be multi-class certificates. Banc One requests exemptive relief for two types of multi-class certificates: "strip" certificates and "fast-pay/ slow-pay" certificates. Strip certificates are a type of security in which the stream of interest payments on receivables is split from the flow of principal payments and separate classes of certificates are established, each representing rights to disproportionate payments of principal and interest.¹⁷

'Fast-pay/slow-pay'' certificates involve the issuance of classes of certificates having different stated maturities or the same maturities with different payment schedules. Interest and/or principal payments received on the underlying receivables are distributed first to the class of certificates having the earliest stated maturity of principal, and/or earlier payment schedule, and only when that class of certificates have been paid in full (or has received a specified amount) will distributions be made with respect to the second class of certificates. Distributions on certificates having later stated maturities will proceed in like manner until all the certificateholders have been paid in full. The only difference between this multi-class passthrough arrangement and a single-class pass-through arrangement is the order in which distributions are made to certificateholders. In each case, certificateholders will have a beneficial ownership interest in the underlying assets. In neither case will the rights of a plan purchasing a certificate be subordinated to the rights of another certificateholder in the event of default on any of the underlying obligations. In particular, if the amount available for distribution to certificateholders is less

than the amount required to be so distributed, all senior certificateholders then entitled to receive distributions will share in the amount distributed on a *pro rata* basis.¹⁸

6. For tax reasons, the trust must be maintained as an essentially passive entity. Therefore, both the sponsor's discretion and the servicer's discretion with respect to assets included in a trust are severely limited. Pooling and servicing agreements provide for the substitution of receivables by the sponsor only in the event of defects in documentation discovered within a short time after the issuance of trust certificates (within 120 days, except in the case of obligations having an original term of 30 years, in which case the period will not exceed two years) Any receivable so substituted is required to have characteristics substantially similar to the replaced receivable and will be at least as creditworthy as the replaced receivable.

In some cases, the affected receivable would be repurchased, with the purchase price applied as a payment on the affected receivable and passed through to certificateholders.

Parties to Transactions

7. The originator of a receivable is the entity that initially lends money to a borrower (obligor), such as a home owner or automobile purchaser, or leases property to the lessee. The originator may either retain a receivable in its portfolio or sell it to a purchaser, such as a trust sponsor.

Originators of receivables included in the trusts will be entities that originate receivables in the ordinary course of their business, including finance companies for whom such origination constitutes the bulk of their operations, financial institutions for whom such origination constitutes a substantial part of their operations, and any kind of manufacturer, merchant, or service enterprise for whom such origination is an incidental part of its operations. Each trust may contain assets of one or more originators. The originator of the receivables may also function as the trust sponsor or servicer.

8. The sponsor of a trust will be one of three entities: (i) a special-purpose corporation unaffiliated with the servicer, (ii) a special-purpose or other corporation affiliated with the servicer, or (iii) the servicer itself. Where the sponsor is not also the servicer, the

sponsor's role will generally be limited to acquiring the receivables to be included in the trust, establishing the trust, designating the trustee and assigning the receivables to the trust.

9. The trustee of a trust is the legal owner of the obligations in the trust. The trustee is also a party to or beneficiary of all the documents and instruments deposited in the trust, and as such, is responsible for enforcing all the rights created thereby in favor of certificateholders.

The trustee will be an independent entity, and therefore, will be unrelated to Banc One, the trust sponsor or the servicer. Banc One represents that the trustee will be a substantial financial institution or trust company experienced in trust activities. The trustee receives a fee for its services which will be paid by the servicer, sponsor or the trust as specified in the pooling and servicing agreement. The method of compensating the trustee will be specified in the pooling and servicing agreement and disclosed in the prospectus or private placement memorandum relating to the offering of the certificates.

10. The servicer of a trust administers the receivables on behalf of the certificateholders. The servicer's functions typically involve, among other things, notifying borrowers of amounts due on receivables, maintaining records of payments received on receivables and instituting foreclosure or similar proceedings in the event of default. In cases where a pool of receivables has been purchased from a number of different originators and deposited in a trust, it is common for the receivables to be "subserviced" by their respective originators and for a single entity to "master service" the pool of receivables on behalf of the owners of the related series of certificates. Where this arrangement is adopted, a receivable continues to be serviced from the perspective of the borrower by the local subservicer, while the investor's perspective is that the entire pool of receivables is serviced by a single, central master servicer who collects payments from the local subservicers and passes them through to certificateholders.

Receivables of the type suitable for inclusion in a trust invariably are serviced with the assistance of a computer. After the sale, the servicer keeps the sold receivables on the computer system in order to continue monitoring the accounts. Although the records relating to sold receivables are kept in the same master file as receivables retained by the originator, the sold receivables are flagged as

¹⁷It is the Department's understanding that where a plan invests in REMIC "residual" interest certificates to which this exemption applies, some of the income received by the plan as a result of such investment may be considered unrelated business taxable income to the plan, which is subject to income tax under the Code. The Department emphasizes that the prudence requirement of section 404(a)(l)(B) of the Act would require plan fiduciaries to carefully consider this and other tax consequences prior to causing plan assets to be invested in certificates pursuant to this exemption.

¹⁸ If a trust issues subordinated certificates, holders of such subordinated certificates may not share in the amount distributed on a *pro rata* basis with the senior certificateholders. The Department notes that the exemption does not provide relief for plan investment in such subordinated certificates.
