Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth

* * * * *

ANM WY E5 Sheridan, WY [Revised] Sheridan County Airport, WY (Lat. 44°46′15″N, long. 106°58′43″W)

Sheridan VORTAC

(Lat. 44'50'32'N, long. 107°03'40"W)

That airspace extending upward from 700 feet above the surface within a 6.1-mile radius of the Sheridan County Airport; that Airspace extending upward from 1,200 feet above the surface within 6.1 miles southwest and 8.7 miles northeast of the Sheridan VORTAC 138° and 318° radials extending from 16.1 miles northwest to 29.6 miles southeast of the VORTAC, and that airspace southeast of Sheridan bounded on the north by a line located 4.3 miles south of and parallel to the Sheridan VORTAC 104° radial, on the east by a 30.5-mile radius of the Sheridan VORTAC, and on the south by a line located 8.7 miles north of and parallel to the Sheridan VORTAC 138° radial.

Issued in Seattle, Washington, on September 14, 1995.

Helen Fabian Parke,

Manager, Air Traffic Division, Northwest Mountain Region.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Parts 1915 and 1926 RIN 1218-AB25

Occupational Exposure to Asbestos

AGENCY: Occupational Safety and Health Administration, Department of Labor. **ACTION:** Final rule; amendments.

SUMMARY: This document corrects the Asbestos final rule which was published August 10, 1994 (59 FR 40964, 29 CFR 1915.1001 and 1926.1101) and corrected and clarified June 29, 1995 (60 FR 33974).

EFFECTIVE DATE: These amendments take effect on October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Ms. Ann Cyr, Acting Director of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N3647, 200 Constitution Avenue, NW., Washington, DC 20210, telephone (202) 219–8151.

supplementary information: OSHA issued improved asbestos standards for general industry, construction, and shipyard employment on August 10, 1994 at 59 FR 40964 to better protect workers from lung cancer, asbestosis and other diseases caused by asbestos exposure. OSHA published a notice correcting and clarifying certain provisions on June 29, 1995. This document further corrects and clarifies various provisions of the construction and shipyards employment standards. The general industry standard is not further amended.

Because the corrections are based on the existing rulemaking record and are not intended to affect the protection afforded by the standard in a significant way, OSHA finds good cause, pursuant to 29 CFR 1911.15 and the Administrative Procedure Act, for promulgating the corrections without notice and opportunity for public comment.

OSHA briefly describes in this preamble, changes to the regulatory text of the standards which are more than typographical in nature.

In both the construction and shipyards standards paragraph (g)(7)(iii) is redesignated as (g)(7)(ii)(C) to clarify that dropcloths are required beneath all indoor removal activity.

OSHA has determined that when gaskets are removed intact, wet methods are not required. Therefore, paragraph (g)(8)(iv)(B) is deleted and the word "wet" is removed from (g)(8)(iv)(C). The standard still requires that when gaskets are visibly deteriorated, they must be removed using glovebags and wet methods.

Paragraph (g)(11) of 1926.1101 and paragraph (g)(12) of 1915.1001 are revised to allow bituminous or asphaltic pipeline coating to be handled using the same "alternative methods" set forth in the June 1995 correction notice, for certain bituminous/resinous roofing materials. OSHA recognizes that asphaltic wrap is similar to these roofing materials because the highly effective material used to bind asbestos fibers, is the same. A new paragraph (g)(11)(vi) of the construction standard (1926.1101) and (g)(12)(vi) of the shipyard employment standard (1915.1001) is added to specify that activities that disturb asphaltic pipeline wrap must be performed using wet methods. Submissions by Exxon to the 1994 rulemaking record which indicate that these activities generate low fiber levels were performed using wet methods (Docket H033e, Exhibit 127).

In the preamble to the June 29 Federal Register correction document, OSHA stated its intention to allow the use of powered air-purifying respirators adequately fitted to give a good face seal when exposure assessment and monitoring data indicate that asbestos exposure levels do not exceed 1.0 fibers per cubic centimeter as an 8-hour time weighted average. However, this provision was inadvertently omitted from the regulatory text. Paragraph (h)(2)(v) of both standards is corrected to include this provision.

Paragraph (o)(4) of both standards is corrected to allow competent/qualified person training to be obtained in a course that meets the EPA criteria for supervisors, one which is stateapproved, or one which is equivalent in stringency, content, and length. This restores the August 10, 1994 regulatory text allowing training in state-approved courses for competent/qualified persons which was inadvertently omitted from the June 19 document.

List of Subjects in 29 CFR Parts 1915 and 1916

Asbestos, Occupational Safety and Health.

This document was prepared under the direction of Joseph A. Dear, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Accordingly, pursuant to sections 4, 6(b), 8(c), and 8(g) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); Sec. 107, Contract Work Hours and Safety Standards Act (Construction Safety Act, 40 U.S.C. 333); Sec. 41, Longshore and Harbor Workers' Compensation Act (33 U.S.C. 941); 5 U.S.C. Sec. 553; and 29 CFR Part 1911; 29 CFR Parts 1915 and 1926 are amended as set forth below.

Signed at Washington, DC this 25th day of September, 1995.

Joseph A. Dear,

Assistant Secretary, Occupational Safety and Health Administration.

PART 1915—OCCUPATIONAL SAFETY AND HEALTH STANDARDS FOR SHIPYARD EMPLOYMENT

§1915.1001 [Amended]

1. and 2. The authority citation of 29 CFR Part 1915 continues to read as follows:

Authority: Sec. 41, Longshore and Harbor Workers Compensation Act (33 U.S.C. 941); sections 4, 6, and 8, Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); sec. 4 of the Administrative Procedure Act (5 U.S.C. 553); Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–
