industrial banks are not depository institutions within the meaning of the Act, and therefore are not subject to the expedited availability and disclosure requirements of Subpart B. These banks do, however, maintain accounts as defined in § 229.2(a), and a paying bank returning a check to one of these banks would be required to return the check to the depositary bank, in accordance with the requirements of this section.

F. 229.30(f) Notice in Lieu of Return

1. A check that is lost or otherwise unavailable for return may be returned by sending a legible copy of both sides of the check or, if such a copy is not available to the paying bank, a written notice of nonpayment containing the information specified in § 229.33(b). The copy or written notice must clearly indicate it is a notice in lieu of return and must be handled in the same manner as other returned checks. Notice by telephone, telegraph, or other electronic transmission, other than a legible facsimile or similar image transmission of both sides of the check, does not satisfy the requirements for a notice in lieu of return. The requirement for a writing and the indication that the notice is a substitute for the returned check is necessary so that the returning and depositary banks are informed that the notice carries value. Notice in lieu of return is permitted only when a bank does not have and cannot obtain possession of the check or must retain possession of the check for protest. A check is not unavailable for return if it is merely difficult to retrieve from a filing system or from storage by a keeper of checks in a truncation system. A notice in lieu of return may be used by a bank handling a returned check that has been lost or destroyed, including when the original returned check has been charged back as lost or destroyed as provided in § 229.35(b). A bank using a notice in lieu of return gives a warranty under § 229.34(a)(4) that the original check has not been and will not be returned.

2. The requirement of this paragraph supersedes the requirement of U.C.C. 4– 301(a) as to the form and information required of a notice of dishonor or nonpayment. Reference in the regulation and this commentary to a returned check includes a notice in lieu of return unless the context indicates otherwise.

3. The notice in lieu of return is subject to the provisions of §229.30 and is treated like a returned check for settlement purposes. If the original check is over \$2,500, the notice of nonpayment under §229.33 is still required, but may be satisfied by the notice in lieu of return if the notice in lieu meets the time and information requirements of §229.33.

4. If not all of the information required by \S 229.33(b) is available, the paying bank may make a claim against any prior bank handling the check as provided in \S 229.35(b).

G. 229.30(g) Reliance on Routing Number

1. Although § 229.35 and Appendix D require that the depositary bank indorsement contain its nine-digit routing number, it is possible that a returned check will bear the routing number of the depositary bank in fractional, nine-digit, or other form. This paragraph permits a paying bank to rely on the routing number of the depositary bank as it appears on the check (in the depositary bank's indorsement) when it is received by the paying bank.

2. If there are inconsistent routing numbers, the paying bank may rely on any routing number designating the depositary bank. The paying bank is not required to resolve the inconsistency prior to processing the check. The paying bank remains subject to the requirement to act in good faith and use ordinary care under § 229.38(a).

XVII. Section 229.31 Returning Bank's Responsibility for Return of Checks A. 229.31(a) Return of Checks

1. The standards for return of checks established by this section are similar to those for paying banks in § 229.30(a). This section requires a returning bank to return a returned check expeditiously if it agrees to handle the returned check for expeditious return under this paragraph. In effect, the returning bank is an agent or subagent of the paying bank and a subagent of the depositary bank for the purposes of returning the check.

2. A returning bank agrees to handle a returned check for expeditious return to the depositary bank if it:

a. Publishes or distributes availability schedules for the return of returned checks and accepts the returned check for return;

b. Handles a returned check for return that it did not handle for forward collection; or c. Otherwise agrees to handle a returned

check for expeditious return.

3. Two-day/four-day test. As in the case of a paying bank, a returning bank's return of a returned check is expeditious if it meets either of two tests. Under the "two-day/fourday" test, the check must be returned so that it would normally be received by the depositary bank by 4:00 p.m. either two or four business days after the check was presented to the paying bank, depending on whether or not the paying bank is located in the same check processing region as the depositary bank. This is the same test as the two-day/four-day test applicable to paying banks. (See Commentary to §229.30(a).) While a returning bank will not have first hand knowledge of the day on which a check was presented to the paying bank, returning banks may, by agreement, allocate with paying banks liability for late return based on the delays caused by each. In effect, the twoday/four day test protects all paying and returning banks that return checks from claims that they failed to return a check expeditiously, where the check is returned within the specified time following presentment to the paying bank, or a later time as would result from unforeseen delays.

4. Forward collection test.

a. The "forward collection" test is similar to the forward collection test for paying banks. Under this test, a returning bank must handle a returned check in the same manner that a similarly situated collecting bank would handle a check of similar size drawn on the depositary bank for forward collection. A similarly situated bank is a bank (other than a Federal Reserve Bank) that is of similar asset size and check handling activity in the same community. A bank has similar check handling activity if it handles a similar volume of checks for forward collection as the forward collection volume of the returning bank.

b. Under the forward collection test, a returning bank must accept returned checks, including both qualified and other returned checks ("raw returns"), at approximately the same times and process them according to the same general schedules as checks handled for forward collection. Thus, a returning bank generally must process even raw returns on an overnight basis, unless its time limit is extended by one day to convert a raw return to a qualified returned check.

5. Cut-off hours. A returning bank may establish earlier cut-off hours for receipt of returned checks than for receipt of forward collection checks, but the cut-off hour for returned checks may not be earlier than 2:00 p.m. The returning bank also may set different sorting requirements for returned checks than those applicable to other checks. Thus, a returning bank may allow itself more processing time for returns than for forward collection checks. All returned checks received by a cut-off hour for returned checks must be processed and dispatched by the returning bank by the time that it would dispatch forward collection checks received at a corresponding forward collection cut-off hour that provides for the same or faster availability for checks destined for the same depositary banks.

6. Examples.

a. If a returning bank receives a returned check by its cut-off hour for returned checks on Monday and the depositary bank and the returning bank are participants in the same clearinghouse, the returning bank should arrange to have the returned check received by the depositary bank by Tuesday. This would be the same day that it would deliver a forward collection check drawn on the depositary bank and received by the returning bank at a corresponding forward collection cut-off hour on Monday.

b. i. If a returning bank receives a returned check, and the returning bank normally would collect a forward collection check drawn on the depositary bank by sending the forward collection check to a correspondent or a Federal Reserve Bank by courier, the returning bank could send the returned check in the same manner if the correspondent has agreed to handle returned checks expeditiously under § 229.31(a). The returning bank would have to deliver the check by the correspondent's or Federal Reserve Bank's cut-off hour for returned checks that corresponds to its cut-off hour for forward collection checks drawn on the depositary bank. A returning bank may take a day to convert a check to a qualified returned check. Where the forward collection checks are delivered by courier, mailing the returned checks would not meet the duty established by this section for returning banks.

ii. A returning bank must return a check to the depositary bank by courier or other means as fast as a courier, if similarly situated returning banks use couriers to deliver their forward collection checks to the depositary bank.
